17. **CONTRACTOR'S NEGOTIATED AGREEMENT** (Contractor is required to sign this document and return **Orig + 2** copies to issuing office.) Contractor agrees to furnish and deliver all items or perform all the services set forth or otherwise identified above and on any continuation sheets for the consideration stated herein. The rights and obligations of the parties to this contract shall be subject to and governed by the following documents: (a) this award/contract, (b) the solicitation, if any, and (c) such provisions, representations, certifications, and specifications, as are attached or incorporated by reference herein. (Attachments are listed herein.)

18. **AWARD** (Contractor is not required to sign this document.) Your offer on Solicitation Number _____ including the additions or changes made by you which additions or changes are set forth in full above, is hereby accepted as in the items listed above and on any continuation sheets. This award consummates the contract which consists of the following documents: (a) the Government's solicitation and your offer, and (b) this award/contract. No further contractual document is necessary.

C.0 SECTION C DESCRIPTION/SPECIFICATIONS

(X) C.1 DISPOSAL OF PCB AND PCB CONTAMINATED MATERIAL

All PCB and material contaminated with PCBs under this contract shall be transported and disposed of within the continental United States (except for such outside transportation and disposal as would be required for ocean incineration). All PCB and material contaminated with PCBs shall be disposed of in accordance with U.S. Environmental Protection Agency guidelines in 40 CFR Part 761 entitled (Polychlorinated Biphenyls (PCB) Manufacturing, Processing, Distribution in Commerce, and use Prohibitions), except that use, reuse and or recycling of PCBs and materials contaminated with PCBs is prohibited under this contract. It is recognized that 40 CFR Part 761 permits, use, reuse and/or recycling of certain PCBs and material contaminated with PCBs. However, for purposes of this contract, all PCBs and material contaminated with PCBs will be disposed of in accordance with paragraph d. below. The contractor is cautioned that he is solely responsible to ascertain the extent to which 40 CFR Part 761 affects the operations resulting from this solicitation and to comply therewith.

a. PCB ARTICLES

For the purposes of this contract, the term PCB articles is defined to mean electrical components other than transformers and capacitors. The term PCB articles includes, but is not limited to: switches, regulators, filters, reactors, reclosers and rectifiers.

b. MIXED PCB ITEMS

For the purpose of this contract, the term mixed PCB items is defined to mean PCB items in drums, including but not limited to, transformers less than 1 KVA, small capacitors, switches, regulators, filters reactors, reclosers, and rectifiers.

c. PCB DEBRIS

For the purpose of this contract, PCB debris means rags, clothing, drums, cans pallets, wood, spill residue, etc.

d. DISPOSAL METHODS

The contractor shall dispose of all materials in a manner which is in conformity with 40 CFR 761.60, except for those methods in said regulation which would result in use, reuse or recycling of the contract property. For the purpose of this contract, conversion of PCB transformers to non-PCB transformers is prohibited and does not constitute disposal. All products of detoxification (refer (i), (v), (viii), and (xi)) will be incinerated or buried in a approved facility. Methods of disposal and disposal facilities shall be approved by USEPA and other government agencies.

The information is being provided to you for your information only and should not be disseminated to any other personnel.

C.1 (Cont'd)

- (i) PCB fluids over 500 ppm shall be incinerated or detoxified.
- (ii) Transformers containing PCB fluids over 500 ppm shall be drained, refilled with a solvent in which PCBs are readily soluble, allowed to let stand for 18 hours, then be redrained and the solvent analyzed for PCB content. PCB fluid shall be disposed as per (i). The solvent shall be disposed as per (i) or (v) or (viii) depending on the results of the PCB analysis. The items shall be buried in a facility approved for PCB disposal.
- (iii) PCB articles containing PCB fluids over 500 ppm shall be drained and buried in a facility approved for PCB disposal. The fluid shall be disposed as per (i).
- (iv) Drained transformers previously containing PCB fluids over 500 ppm shall be refilled with a solvent in which PCBs are readily soluble, allowed to let stand for 18 hours, then be redrained and the solvent analyzed for PCB content. This fluid shall be disposed as per (i) or (v) or (viii) depending on the results of the PCB analysis. The items shall be buried in a facility approved for PCB disposal. Drained articles will not be refilled. They will be buried in a facility approved for PCB disposal.
- (v) PCB fluids between 50-499 ppm will be detoxified, incinerated, or buried in a facility approved for PCB disposal.
- (vi) Transformers and articles containing PCB fluids between 50-499 ppm will be drained and the fluid disposed as per (v). Containers will be buried in a facility approved for PCB disposal.
- (vii) Nonliquid PCBs in the form of contaminated rags, soil, or other debris shall be incinerated or buried in a facility approved for PCB disposal.
- (viii) PCB fluids below 50 ppm will be detoxified, incinerated, or buried in a facility approved for PCB disposal.
- (iv) Transformers and articles containing PCB fluid below 50 ppm will be drained and the fluid disposed as per (viii). Containers will be buried in a facility approved for PCB disposal.
- (x). Drained transformers and articles previously containing PCB fluid below 500 ppm will be buried in a facility approved for PCB disposal. (as defined by 40 CFR 761.3)
- (xi) Large PCB capacitors shall be detoxified, incinerated, and/or buried in a facility approved for PCB disposal. (as defined by 40 CFR 761.3)
- (xii) Small PCB capacitors shall be buried in a facility approved for PCB disposal.
- (xiii) Mixed PCB items shall be incinerated, or the items may be removed from the drum and individually treated in accordance with (i) through (xii).
- (xiv) All products of detoxification (i) (v) and (viii) will be incinerated or buried in an approved facility. Methods of disposal and disposal facilities shall be approved by USEPA and other government agencies.

C.0 SECTION C DESCRIPTION/SPECIFICATIONS

() C.2 STATEMENT OF WORK

The contractor agrees to provide all services necessary for the disposal of the hazardous waste listed in the schedule in accordance with: all local, state, and federal EPA solid and hazardous waste laws and regulations, specifically RCRA; and all the terms and conditions of this contract. These services shall include all necessary personnel, labor, transportation, packaging, detailed analysis (if required for disposal, including manifesting or completing waste profile sheets) equipment, and reports. All items listed in the schedule, regardless of their condition, are being discarded by the Government and are considered to be hazardous waste.

() C.3 STATEMENT OF WORK

The contractor agrees to provide all services necessary for the disposal of the CLINs listed in the schedule in accordance with all local, state, and federal laws, and regulations, and the terms and conditions of this contract. These services shall include all necessary personnel, labor, transportation, packaging, detailed analysis (if required for disposal, and/or transportation including manifesting or completing waste profile sheets) equipment and reports. All items listed in Part I of the schedule, CLINs 0001 thru 5999, regardless of their condition, are being discarded by the Government and are considered to be hazardous waste. Items listed in Part II of the schedule, CLINs 6000 thru 6500, are not considered to be RCRA/state regulated hazardous waste.

(X) C.4 PROCESSING (PCBs)

Contractor shall not drain and/or flush PCB items at Government installations. Draining will be allowed only to prevent leaking and to meet Department of Transportation Regulations.

(X) C.5 DEPARTMENT OF TRANSPORTATION REQUIREMENTS

The contractor agrees that transportation shall be in accordance with DOT Hazardous Material Regulations 49 CFR 100-199. The contractor shall also comply with state and local requirements including obtaining all necessary permits, licenses, and approvals. Contractor shall show Contracting Officer's Representative evidence of being a licensed Hazardous Waste Transporter prior to loading of any materials.

Subj: TURN-IN OF TRANSFORMER AND CONTAMINATED SOIL LOCATED AT MARINE CORPS AIR STATION-NEW RIVER (MCAS-NR)

Encl: (1) DD 1348-1 M93182-8273-E016
(2) DD 1349-1 M93182-8273-E020

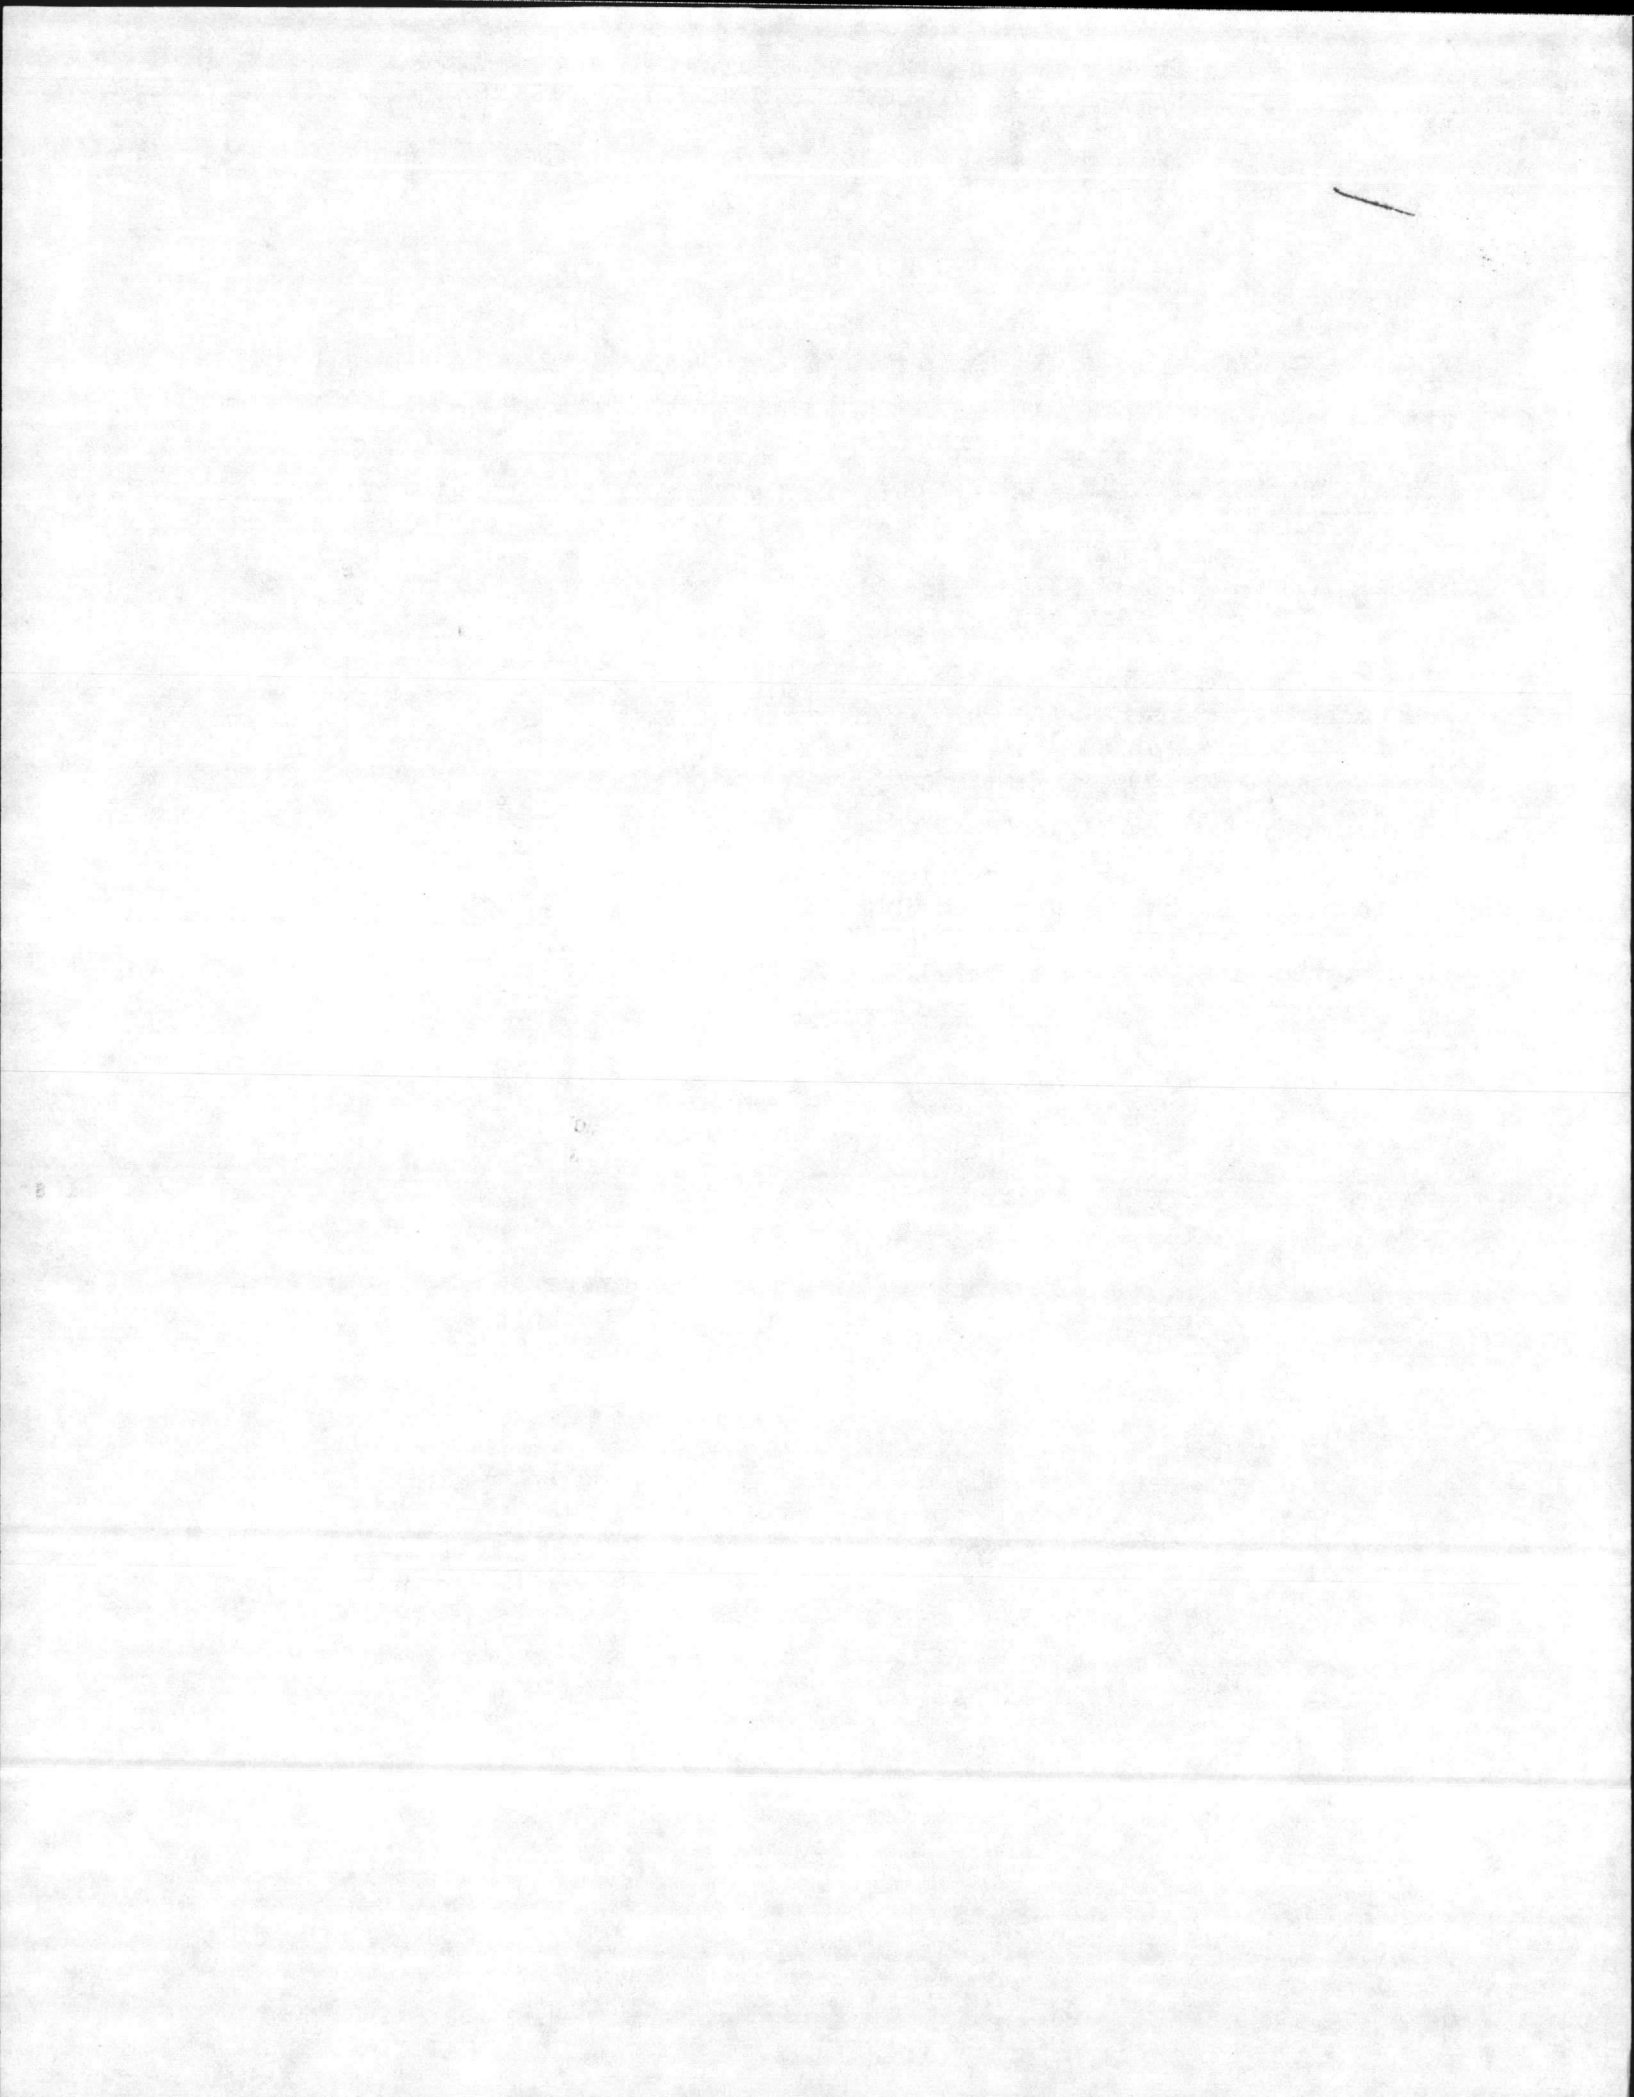

1. The enclosures are provided to turn in transformer serial # H21459-68P and soil contaminated with this transformers oil. The transformer is in an overpack located at the Base Maintenance Lot at MCAS-NR. The soil is also located at that lot on plastic and covered with plastic.

2. It is requested that a qualified PCB disposal contractor dispose of the soil, the transformer, and overpack. It is requested that soil be picked up in bulk. If this is not feasible, please advise immediately of how your agency recommends that the soil be containerized. Point of contact with this matter is Tom Barbee, x5977.

From: Commanding General, Marine Corps Base, Camp Lejeune, North Carolina 28542-5001
To: Resident Officer in Charge of Construction
Subj: POLICY FOR REMOVAL, HANDLING, AND STORAGE OF PCB TRANSFORMERS PRIOR TO DISPOSAL BY THE DEFENSE REUTILIZATION AND MARKETING OFFICE (DRMO)
Ref: (a) ROICC, JAX NC ltr N62470-87-B-9285 Jax/0015b/des of 9 Jun 88
(b) 40 CFR 761

1. This letter establishes the subject policy to be applicable to both the reference (a) contract and PCB management aboard Camp Lejeune. This policy applies to PCB transformers, other electrical equipment containing PCB's, and associated transformer oil, as defined in reference (b). The purpose of this policy is to maximize use of skilled private-sector firms in all phases of PCB transformer removal and disposal in order to minimize risk of exposure of base employees and the general public to hazards associated with PCB's.

2. Except in emergency situations, all transformers and associated equipment, will be tested for PCB's prior to removal from service. PCB transformers will be drained on-site prior to transportation to base PCB storage facilities. Valves, bushings, and other openings in drained transformers will be sealed with silicone sealant or equivalent prior to transportation. Sealing is not required if the transformer is transported in an EPA/ DOT approved overpack container or in an EPA/ DOT approved transportation container.

PCB
FILE

3. The oil will be packed in new containers and labeled according to reference (b). Containers will be properly secured to pallets. Containers will be transported to the designated PCB storage facility in the Hahne Point area. Reference (a) contract is constructing a new storage facility. Contractor will be responsible for loading palletized containers and transformers; transportation to the facility; unloading and weighing each transformer or container; placing these items into the facility as directed by operating personnel and reporting, containing, and cleaning up all spills which occur during handling.

Ref: (a) ROICC, JAX NC ltr N62470-87-B-9285 Jax/0015b/des of 9 Jun 88
(b) 40 CFR 761

1. This letter establishes the subject policy to be applicable to both the reference (a) contract and PCB management aboard Camp Lejeune. This policy applies to PCB transformers, other electrical equipment containing PCB's, and associated transformer oil, as defined in reference (b). The purpose of this policy is to maximize use of skilled private-sector firms in all phases of PCB transformer removal and disposal in order to minimize risk of exposure of base employees and the general public to hazards associated with PCB's.

2. Except in emergency situations, all transformers and associated equipment, will be tested for PCB's prior to removal from service. PCB transformers will be drained on-site prior to transportation to base PCB storage facilities. Valves, bushings, and other openings in drained transformers will be sealed with silicone sealant or equivalent prior to transport. Draining is not required if the transformer can be placed intact in an EPA/DOT approved overpack container on-site prior to transportation.

3. The oil will be packed in new EPA/DOT approved containers and labeled according to reference (b). Containers will be properly secured to pallets. Containers will be transported to the designated PCB storage facility in the Hadnot Point area. Reference (a) contract is constructing a new storage facility. Contractor will be responsible for loading palletized containers and transformers; transportation to the facility; unloading and weighing each transformer or container; placing these items into the facility as directed by operating personnel and reporting, containing, and cleaning up all spills which occur during handling.

Subj: POLICY FOR REMOVAL, HANDLING, AND STORAGE OF PCB
TRANSFORMERS PRIOR TO DISPOSAL BY THE DEFENSE
REUTILIZATION AND MARKETING OFFICE (DRMO)

4. Transformers will not be flushed and kerosene or other solvents without approval by Assistant Chief of Staff, Facilities, Marine Corps Base. Flushing greatly increases the volume of toxic material generated and results in excessive disposal costs. Disposal of any PCB's other than through the DRMO, Camp Lejeune, is prohibited unless specifically authorized in writing by the Assistant Chief of Staff, Facilities, Marine Corps Base.

5. POC is Mr. Alexander, extension 3034.

RR1 DPQ 2 * MN 2 AHXP

Form with multiple rows and columns, containing various fields and text. The text is oriented upside down relative to the page's layout. The form includes sections for 'RECEIVED', 'DATE', 'TIME', 'LOCATION', and 'REMARKS'. There are several lines of text, some appearing to be mirrored or bleed-through from another page. The text includes 'RECEIVED', 'DATE', 'TIME', 'LOCATION', 'REMARKS', and 'PROCESSED BY'. There are also some numbers and dates visible, such as '1948' and '1949'. The form is partially filled out, with some fields containing handwritten or stamped information.

THIS IS TO CERTIFY THAT THE ABOVE MATERIALS
ARE PROPERTY CLASSIFIED, DESIGNATED, PACKAGED,
MARKED AND LABELED AND ARE IN PROPER CONDITION
FOR TRANSPORTATION ACCORDING TO THE APPLICABLE
REGULATIONS OF DOT & BEA

sub: TURN-IN OF PCB TRANSFORMERS AND OIL

Encl: (1) CD1148-1a

1. The enclosure is provided for the turn-in and disposal of seventeen PCB transformers and six drums of PCB oil. The transformers have been drained and flushed and are located in the PCB Storage Building, 3P-464.

2. Before draining, fourteen of the transformers contained PCB oil labeled Intertan and three of the transformers contained PCB oil labeled Bakelol. It is assumed that these oils contain greater than 500 ppm of PCBs, therefore analysis has not been performed. The six drums also contain Intertan oil.

3. The point of contact on this matter is Tom Rucker, extension 5977.
