LOMICK

Section 01011
8 - Who has GFE? State when it will be available. Indicate what is GFE
12 - Where will utility connections be?

Section 04200
3.2.3 State that acid shall not be used for cleaning brick or mortar.
State that existing brick (and mortar) to be matched are "Jamestown" by Boren Clay Products and Flamingo C-284 (Black) by Riverton Corp.

Section 07232
2.4.2 Delete clip fasteners if not applicable

07920
3.3.4.1 Add "including joints between plumbing fixtures and walls and floors.

09310
5.10 ANSI A118.4 is for organic adhesive Should it be A118.5 ?

10-4-82
Discussed comments rejected by L/D w/A-E. He agreed on items and would discuss w/L-D.

PROJECT Contract N62470-81-B-1766, FY 83 MCON Project P-608, Supporting Facilities, Naval Regional Medical Center, CLNC

DATE DUE LANTDIV

LOCATION
MARINE CORPS BASE, CAMP LEJEUNE, NORTH CAROLINA

DATE RETURNED LANTDIV

	ARCHITECTURAL		MECHANICAL		PRELIM.	REVIEWER: R. D. COLEY
	STRUCTURAL		ELECTRICAL	X	90% SUBMITTAL	CERTIFICATION OF CO OR OICC/ROICC
	CIVIL		SPECS & ESTIMATES		100% SUBMITTAL	DATE LANTDIV RETURN

DWG. NO./ PAR. NO.	ITEM NO.	OICC/ROICC OR STATION COMMENTS (MAKE GENERAL COMMENTS ON LAST SHEET)	LANTDIV REVIEW ACTION – KEY INC. IN LANTDIV TRANS. LTR
	C1-2	Indicate width of sidewalk at South end of building	Done RAS S.H
	C1-3	Detail 'Transitional Pvmt' - I-1 pavement called for in the specs verses I-2.	Shown on drawing 405
	C1-4	Cut ditch from lagoon to connect with North-east Creek.	not Required (S.H. 405
	C1-5	Plan Terrace - is the west wall and the planter wall the same elevation at the point of intersection? Indicate elevations or add note to clarify.	Instructions on drawing (S.H. 405B
		Add the word 'VERIFY' to the given elevation where the planter wall intersects the West wall.	
		Indicate dimensions between control joints.	
		If the tree planters have the same control joint layout in the concrete slab, indicate same for easterly tree planter area.	
See NRMC DWGS.	Discuss	Indicate a grease trap approximately (55) ft. North of the building. ~50 To S End	

CONSTRUCTION SCHEDULE (No. DAYS ____)

SPECIAL REQUIREMENTS (Attach if necessary)

CONCURRENCE _____ DATE OICC/ROICC SIGN.

SPECIAL REMARKS (For LANTDIV use only)

Brick Bench Detail - Indicate size of WWF in concrete slab.

Indicate #4 bar cont. in thickened edge of concrete slab.

Indicate what the material is under the footing for the bench and thickened edge of the slab, i.e., base material and thickness or compacted soil.

Indicate whether or not the top of the bench slopes with the slab or is level.

PLANTER DETAIL

Indicate thickness of stone base course.
Indicate #4 bar cont. in thickened edge of slab.

Typical Section Parking Lot Pavement

I-1 pavement called for in specs in lieu of I-2

Typical Section Street 'C'

I-1 pavement called for in specs in lieu of I-2

DETAIL B/C1-4/C1-5

Provide detail of depressed slab at typ. inset light.

C2-1 Provide 2 - #8 AWG in 3/4" UC to comm. M.H. from Master Fire Alarm Box.
Provide 20 ft of slack wire for connection to the fire alarm circuit by the government in the Comm. M.H.
Add a #8 Grd. in the circuit for the AAA light fixture by MH 74.(i.e) 1-¼" C. 4 #6 & #8 Grd.

C2-2 Add existing S.S. and grease trap on plan of terrace

The EUC between the PWB and the sewage lift station is direct buried between the EFM and the EUE. The EUC enters the sewage lift station from the South.

Change EUP [illegible] to EUE.
Change EUC to EUE from the manhole West of the sewage lift station to the sewage lift station.

C2-4 Detail E/C1-2/C2-4

Change notes referring to drawings CV2-8 and CV2-11. Those drawings are not included in the contract.

C2-4 Sanitary Profile

Change top elevation of oil-water separator from 22.6 to 22.0.

Detail E/C1-2/C2-4

There is an 8" plug between the existing F.H. and the indicated 8" x 6" reducer. The 8" x 6" reducer is not existing. The 6" plug is not existing.

The 40' min. dist from the bldg is not compatible with the layout on Dwg C2-1.

L-2 No Will the NW and SE trees around the flag pole area cause visual obstructions for the security cameras on the building?

L-3 no Will the 1-QVIR in the island infringe on the coverage of the security cameras?

L-4 Ok Plan, Planting at Staff Plaza at the western inset of the bldg put stone mulch under the overhang by the entrance doors.

Plan, Planting at Visitor-Outpatient Plaza at the NE entrance (Main entrance to Area B). add stone mulch under overhang by doors.

Typical Edging Details

State what size of aluminum ring nails to be used.
12d annular

A-1 Floor Plan

Ok Provide detail for the west jamb of door P114C. Detail D will not work on the west jamb.
Ok Add drawing number in note "Entry vestibule concrete walk see"
Ok Add arrow to 'Storage P114A' to indicate location.
Ok Change drawing number for trench drain detail.
Ok The plumbing drawings indicate a single sink in lieu of a double sink in Room P105. Clarify.

Ok Detail 3/A-1/A-1

The beacon light support is existing.
There is an existing 3/4" conduit penetration.

Ok Detail 2/A-1/A-1

Indicate the Beacon light support is existing. Remove note pertaining to removing roof, etc.

Ok Detail 1/A-1/A-1 Roof Section

Add the word 'insulation' to its symbol.

A-2 Finish Schedule

✓ Ok as is F-1 Shops - Clarify what is meant by note #7 for the ceilings. A lighter color than 'B' would be better for the ceilings to give more light reflecting in the work areas.

GENERAL NOTES

Ok Note #4 Insert 'FINISH' in lieu of 'DOOR' in "DOOR SCHEDULE"

Ok Elev. 4/A-1/A-2

Locate electrical outlets on wall.

Ok DETAIL H/A-4/A-2

Indicate type of welds to be used to attach bent plates to steel joist.
Indicate how to attach C3x4.1 top capping bar to bent plates.

A-2 (Con't) FINISH SCHEDULE NOTES

Note #5 - The leafs shall be stainless steel and the frame aluminum.

A-3 Typical steel stud wall intersection detail

Add metal stud at wall intersection to anchor perpendicular wall stud.

Typical Partition Perpendicular to steel joist where exposed to view detail

-Add note to "CAULKE CONT." over expansion material.
-Provide detail to indicate what is to be done where steel joist is not exposed to view.
-It is nearly impossible to fill void with grout as indicated if the roof is in place. If the grout is for fire protection, fire safing insul or cut block in the void is more pracitcal and can be accomplished.
-Typ shear wall closure Detail add "CAULK CONT' at joint with expansion material.
-Typ GWB partition perpendicular to steel hoist elevation add "CAULK CONT' at joint with expansion material
-Typ Masonry Partition Closure Detail add "CAULK CONT' at joint with expansion material.

Head (106) and Jamb (107) details

Delete weather stripping fin on frame. Add metal stop on head detail. Add weather stripping to door stiles and head.

-If the fin on the frame is used, the door cannot swing.

A-4 Reflected Ceiling Plan

Provide details for drop soffits inside the building (i.e.) toilets, water ~~chillers~~ coolers, etc.

Indicate height of light fixtures AFF and/or below joist in shop areas. The number of light fixtures or orientation would have to be changed if the lights slope with the ceiling.

Indicate that the symbol for the GWB partitions extending above the ceiling also includes the CMU partitions.

Provide detail for anchoring partitions which go to the underside of a ceiling. Head detail 104 is not applicable to all cases as presently indicated.

Typ. Shower at wall detail

This detail does not work with organic adhesive thin set tile. The flange of the basin causes the lowest tile to kick out approximately 1/8" at the bottom. Use mortar tile bed or set GWB in front of flange.

Typ. Shower Curb Detail

See comment for "Typ. Shower at wall detail" pertaining to flange. Change 'BRICK FILLER' to 'BRICK FILLER OR CONC CURB'.

With the dimensions given for the curb, small pieces of ceramic tile must be used with a full piece. This approach does not give a very desireable finish job.

A-4 (con't)

will correct finish
No wood @ this area w/ Black

DETAIL B/A-1/A-4 Black

Indicate finish on wood trim and plywood. Delete wood use GWB or Dummy mullion As detailed, this connection must be built before the wall is constructed. The use of a dummy window mullion is a good means of closing the area. Change detail.

A-5 OK EAST ELEVATION

Relocate TV camera due to bottom of concrete beam at 12'-0" A.F.F.

DETAIL A & B

OK as is leave as is

The cut brick in the parapet will be very small. Verify size and change detail.

A-6 DETAIL 4/A-5/A-6

will correct No

Move the ½" expansion joint out from under the sill of Door P120. This will allow anchoring of the sill to the concrete without spalling the concrete at the edge.

SECTION 5/A-7/A-6

Indicate thru wall flashing to hold grout in cavity between brick and CMU.

at regd? will correct

DETAIL D/A-6/A-6

OK Change #3 dowel to #4 dowel to be consistent with Section 5/A-7/A-6

OK Change counter flashing detail so that the counter flashing does not turn down behind brick course.

OK Provide detail to indicate construction where metal roof eave ties into parapet wall flashing to make the intersection water tight.

A-7 OK SECTION 1/A-5/A-7

Indicate detail for tie-in of metal coping cap into brick parapet.

JAMB 109

OK The steel mounting plate should be 11'-4" long for door P114C.

A-9 OK General - use vented reveal where the soffit is not insulated. Indicate the above by note.

S-1 FOUNDATION PLAN

OK Change the section designations for sections indicated on sheet A-4. They are not on drawing A-4.

ROOF FRAMING PLAN

OK Sections 1/S-1/A-4 and 3/S1/A-4 are not correct. Indicate correct sections designations.

OK Add section 14/S1/S3 in N-S partition running through the indicated AHU.

will correct ? Sheet A21-5 is not part of these drawings. Insert proper sheet number.

S-2 ELEVATION J/S2/S2

The sloped bond beam construction is very difficult and expensive to construct. Run the bond beam horizontally and in stacked sections. Review design to verify that bond beam must be ran on a slope as the roof.

Change sections refering to Sheet A-4 to proper sections.
EXAMPLE: 1/S2/A-4 there is no 1/S2/A-4 section.

S-3 SECTION 26

After "Building Paper" add the work '(Typ).

P-1 PLUMBING FLOOR PLAN

Provide floor drain in plumbing shop. Indicate type of all floor drains. Coordinate with spec 15401-2.1.4.
-Indicate height of all hose bibs.

-Coordinate layout of showers with architectural detail B/A-8. Clarify basin location and shower head location.

-Clarify type P-5 kitchen sink. Dwg. A-1 shows double sink. Dwg P-1 indicates single sink.

AIR COMPRESSOR DETAIL

-Provide housekeeping pad.
-Vibration isolation detail will not work. Floor pads cannot be bolted through. Provide spring isolation.

WATER HEATER DETAIL

-Show piping run and height of discharge of hot water heater relief valve discharge piping.

M-1 MECHANICAL HVAC FLOOR PLAN

-Show location of EF-11 in Room P111
-Show location of EF-10 in Room P110

-Exhaust fan numbers in room P127 and P126 do not agree with electric drawings or with exhaust fan schedule in dwg M-2. Clarify total number of exhaust fans, power supplies, and locations.

-Air conditioning condensate from units AH-1 and UV-1 drain onto paved main entrance. Provide alternate drainage location.

BOILER PIPING DIAGRAM

-Show chemical shot feeder required by specification 15651-8.1.
-Show sight gauge, drain, air release and relief valve on expansion tank.
-Add note under 2" System drain "Pipe to floor drain"

MECHANICAL ROOM FLOOR PLAN

-Indicate distance between fuel oil tank and building wall.
-Indicate location of F.O. pump.

UNDERGROUND FUEL STORAGE TANK DETAIL

-Indicate method of determining amount of fuel in the tank.
-Indicate depth of sand below tank pad.

Is oil pump required? Verify MIL-B-18897 contains requirement for fuel pump with a minumum of 15 feet suction lift. Also verify fuel pump, fan, and ignition do not exceed 20 amp service to boiler.

M-2 EXHAUST FAN SCHEDULE

MARKED

-Coordinate with electrical drawings and HVAC floor plan. Indicate room number locaton of each fan.

UNIT HEATER SCHEDULE

OK IF NECESSARY. CONT. OBTAINED ON CONTR. COVER

-Indicate quantity of each heater type. There are (4) UH-1's, (3) UH-2's, (4) UH-3's, (1) UH-4, and (2) UH-5's.

THROUGH WALL SELF CONTAINED UNIT VENTILATOR SHCEDULE

MARKED

-Electrical data indicate a 277 volt motor. Please verify.

SPLIT SYSTEM AIR CONDITIONER SCHEDULE

MARKED

-Electric date indicates a 460/1/60 outdoor fan motor. Please verify.

AH-1 HEATING COIL DETAIL

MARKED

Piping diagram is not compatible with specification 15651-9.2. Correct specification. A sequence of operation is required for connection of multiple units to a single boiler. Control scheme must include boiler, air handling units, unit heaters, circulating system, etc.

UNDERGROUND GASOLINE TANK

MARKED

Dwg CV3-8 is not included. Provide location of fuel tank pumps.

Clarify note '6" sand fill all around tank'.

DWG NO.

E-1 SITE PLAN

1. Feeders E-11 and C-5 run through MH #24 & MH #22.
2. Feeders F-3, B-91, & E-1 run through MH #23 & MH #20.
3. Ductway to existing lift station is power only.
4. Existing telephone cable is direct buried from Comm. MH #2.
5. MH at lift station is #27. Add existing manhole between MH #25 & MH #27. MH at helipad should be numbered #28.
6. Drawing EQ-2 is not included in set of drawings.

MARKED ON DWG

HELIPORT SINGLE LINE POWER DIAGRAM

1. Provide pothead at existing load center.
2. Coordinate manhole numbers with the herein before listed information on Site Plan.
3. Provide personnel protection by grounding grid at pad mount transformer.
4. Is Wye cabling cost-beneficial to single phase application?

SINGLE LINE POWER DIAGRAM/PUBLIC WORKS BLDG.

1. Provide equipment ground between substation "C" & new PW-MCC.

E-2 LIGHTING PLAN

MARKED ON DWG

1. Toggle switch by exterior entry door. P-114 cannot be installed in O.H. door frame. Relocate.
2. Provide control of corridor P-118 lighting at entry doors.
3. Provide mounting details of toggle switches that are located on wire mesh partitions.
4. Provide control of lighting in rooms P-102, P-121.
5. Provide branch circuity & conduit layout.

OK AS IS more needed

E-2 (cont'd)

POWER AND COMMUNICATIONS PLAN

1. North exterior wall - what is mounting heightf of W.P. receptacle and relocate. Wall detail indicates insufficient room within wall to locate receptacle.
2. Provide receptacle on south wall of Room P-107.
3. Provide GFI receptacles in Rooms P-124 & P-125.
4. Section 15651 specifies that air conditioner plug shall match receptacle for circuit design No. 33 in Room P-105.
5. Provide mounting height of receptacles at lunch room sink, Room P-105.
6. Identify security camera number and details.
7. Is 'A' cable required?

MARKED ON DWG JOH

MECHANICAL ROOM - ENLARGED POWER PLAN

1. Identify circuit for time clock, Design No. 24.

PANELBOARD SCHEDULES

1. Panel "MR1 & MR4" have more than 42 units.

E-3

LIGHTING FIXTURE SCHEDULE

1. Indicate mounting heights above finish floor and/or below joists. For fixture types "CC", "CC1", & "P1".
2. DAMP label on fixture type "UU 1" should be indicated.
3. Detail of concrete base for fixture type "AAA" is required.

MARKED ON DWG JOH

RECEPTACLE DETAIL

1. Is "A" cable required?

SECURITY CAMERA J. BOX DETAIL

DWG OK AS IS JOH

1. Indicate power wiring to camera. will check w/ Vaughn

BROADBAND SYSTEM - DETAILS

1. Indicate new and existing equipment.

ELECT. LEGEND

MARKED ON DWG JOH

1. Indicate mounting heights of receptacle.
2. Conflict between "GF" on legend and "GFI" on plans.
3. Indicate B/B. outlet at 18" AFF "unless noted otherwise".
4. Telephone outlet should be 18" AFF in lieu of 48" AFF unless otherwise noted.
5. Need specifications for door switch.

E-4

ELECTRICAL EQUIPMENT & WIRING SCHEDULE

will check w/ vaughn

JOH OK AS IS

1. Circuit design #24 - Provide circuity number.
2. Circuit design #32 - Tank detail does not indicate fuel pump location. Circuit design #33 - UV-1 - are 277 volt air conditioning units available. Also refer to comments on Dwg. No. E-2.

MARKED ON DWG JOH

E-5 ELECTRICAL EQUIPMENT & WIRING SCHEDULE

1. Room locations of desig. Nos. 49, 52, 53, 54, 56, & 78 do not agree with mechanical dwg.
2. Indicate "FS: for desig. 59 type of controller.
3. Under disc. SW, Desig. 72, 73, & 75 through 81, define "C/C/C".
4. Step-down transformers ought to be grounded back to the MCC.
5. Need power riser diagram.
6. How are run time contacts connected to EMCS?
7. How is TV wiper control connected to EMCS?
8. Need I/O schedule for EMCS.

E-6 LIGHTNING PROTECTION PLAN

1. To compile with UL requirements all metals within 6 ft. of the main cable must be compatible with the main cable. Aluminum flashing and copper mains do not mix.
2. Indicate ground rod and down conductors.
3. Are ground rod connections required to be accessible along dock?

TYPICAL AIR TERMINAL MOUNTING DETAIL

1. Point projection protectors are not high strength. Delete requirement.

E-7 DETAIL 1/E7

1. Coordinate manhole number.
2. Should not floodlights be controlled separately from landing lights?
3. What type of manhole - power only?

SECTION 9 & 8

1. Where does 6 pair telephone and shielded cabling originate from?
2. Provide details to place direct buried telephone in power duct.

DETAIL 2

1. Indicate method of providing contactor control to contactor through pad mounted transformer.
2. Provide details for reinforced concrete pad.

DETAIL 4

1. Indicate top of concrete in lieu of grade.

NOTES:

1. What type, size and amount of reinforcing steel required by notes 1 & 3.
2. Provide circuit diagram indicating connections of interposing relays and contactor to control heliport lighting. Where does main line contactor derive its control power from?

E-1 LEGEND:

Symbols on diagrams do not conform i.e., C.L. fuse padmount trans.; potheads.

SPECS

Section 01011

Para. 8 - Who has elect. G.F.E.? Put date material will be available. Indicate what material is G.F.E. Gasoline pump

Para. 12 - Where can we connect for utilities?

Section 02200

Para. 3.1.1 - Leaving vegetation on the ground on the easterly approach to the helipad is not allowed by the Corps of Engineers. A large section of this area is wet lands and felled vegetation is classified as fill. A permit to fill wet lands is required from the Corps of Engineers prior to doing this.

Para. 3.3.1 - What is merchantable timber (define)? Tell what lengths to be cut in (should be approximately 17'-6" long). Does the contractor dispose of the merchantable timber or does the Base sell the timber? If the Base sells the timber, the contractor must stack timber. Coordinate with base personnel.

Para. 3.4.8 - Specify compaction effort. Define/clarify lower portion of backfill.

Section 02501

Para. 6 - Delete "asbestos cement" from 5th line.

Section 02613

Para. 13.2.1 - Change 'except' in line 2 to 'include'.
Para. 13.2.5 - there are two paragraphs with the same number (page 30 & 31).

Section 02680

Para. 3.2 (C) - Include density of mixture for each sample.

Section 04200

Para. 3.2.3 - Do not use muriatic acid on the brick or mortar to be used. The manufacturer of the brick used on the new hospital states "do not clean w/acid". Existing brick is "Jamestown" by Boren Clay Products Co.

Para. 2.2.3 - The industry standard is now 12% air content in lieu of 16%. 16% air content can't be obtained. Change percentage to 12% air content.

The mortar used on the new hospital is black to match Riverton Corp "Flamingo Masonry Cement" #C-284 (Black). This should be indicated in the plans & specs.

Section 07232

Para. 2.4.2 - Where are clip fasteners to be used? Paragraph 3.3.1.3 of spec has been deleted.

Section 07920

Para. 3.3.4.1 - Add after the word 'joints' in the 2nd line "including joints between plumbing fixtures and walls and floors".

Section 08110

Para. 2.5 - Frames for extra heavy duty doors are not specified.

Section 09310

Para 5.10 - Change ANSI A118.4 to ANSI A118.5. ANSI A118.4 refers to organic adhesive.

Section 15181

Para. 3.0 - The definition of a conditioned space is not adequate. The presence of a small unit heater in the ceiling would mean no insulation required.

Section 15411

Para 3.1 - Is this a duplex unit. If so, is single source wiring required? What voltage? What capacity? Automatic altenator?

Para. 4.3 - Are vibration isolators required?

Section 15651

Para. 3.6 - Steam or hot water - not both!

Para. 3.7.1 - No such thing as a 277 volt motor! Dwg calls for 208 volt single phase motors.

Section 15401

Are floor drains in finished area's the same as in shops?

Section 15011

Para 1.11 - Delete parenthesis in first and last sentence.

Section 15501

Para 1.17 - Identify sections that provide control and fire alarm wiring.

Section 16301

Para 1.1.9 - Change: NEC 70-1981 in lieu of 1978.

Para. 1.2.2 - Change helipad service to 12.4 KV, single pahse, 2 wire connected and 120/240 volts, single phase, 3 wire connected.

Para. 3.1.12.1 - Where is unsuitable earthwork material wasted on site?

Para. 3.1.15 - Splices shall be made only in manholes.

Section 16402

Para 2.1.12.4 - GFI receptacles are specified; Paragraph 2.1.13.2.2 specifies GFI breakers. Are both required?

Para. 2.1.12.5 - Specify air conditioning unit receptacles . Refer to Section 15651, paragraph 3.7.1.

Para. 2.1.19.1 - Delete "specified for outlet receptacles" as height is indicated.

Para. 3.1.3.1 - ~~Leave this paragraph in.~~ Comment not valid. Pt not needed.

Para 3.1.15.2 - When will Government furnished equipment be available?

Section 16461

Para. 2.3.1 - Dry-type transformers ought to be non-ventilating sealed type in the shop areas.

Para. 3.3 - Grounding as specified conflicts with grounding as indicated on dwgs.

Section 16510

Para. 3.1.1 - Main service disconnect switch (MCC) is 480/277 volts; exit lights are 120 volts. Please clarify the 120 volts service source for the exit lights.

Section 16530

Para. 2.1 - The luminary as indicated on the Fixture Designation sheet specifies a tapered standard which is a single source specification.

Will check w/ Vaughn

Sect 16610

Par 6.2 - Roof conductor is required by U.L. to be compatible with metal materials of the roofing system.

Se on 16722

P 6.12 - Add "box code wheel shall be cut for number 2231 with ½ second timing".

pi. 6.13.2 - Last sentence violates national electric code and national electric safety code.

ction 16762

ara. 3.5.2 - What is coil voltage of relay at helipad? The interposing relay at the FID "BE" (hospital telephone equipment room) ought to have 24 volt direct current coil.

Para. 3.8 - Specify intrusion devices (security door switches). These devices are not specified in finish hardware or coiling steel door specifications.

Gentlemen:

The attached is copy of the Data Base and Typical I/O Schedule for the Fans. This is another of the partial schedules which was explained in Joint Venture letter 445/LG/SA dated July 16, 1980.

Please advise if you have any questions or comments so that we may incorporate them prior to printing I/O Schedules.

Very truly yours,

LOCKWOOD GREENE/SIX ASSOCIATES

FANS

DESCRIPTION:

T23 FANS: Fans provide removal or supply of air from or to one or more spaces. The majority of these systems are usually independent; however some of these units are jointly operated in conjunction with a source of heated or cooled air from another system.

A JOINT VENTURE

Lockwood Greene-Six Associates
architects-engineers-planners

July 24, 1980

77239.18 - Naval Regional Medical Center

452/LG/SA
CWM - .18

Department of the Navy
Atlantic Division
Naval Facilities Engineering Command
Norfolk, Virginia 23511

Attention: Mr. Stephen D. Emrick, Code 09A21A

Subject: Contract N62470-75-C-1383, Architectural and Engineering Services for Hospital Replacement, Naval Regional Medical Center, FY1977 MCON Project P-600 at the Marine Corps Base, Camp Lejeune, NC

Gentlemen:

The attached is a copy of the Data Base, Typical I/O Schedule and Data Bast Notes for the Demand Meter. This is another of the partial schedules which was explained in Joint Venture letter 445/LG/SA dated July 16, 1980.

Please advise if you have any questions or comments so that we may incorporate them prior to printing I/O Schedules.

Very truly yours,

LOCKWOOD GREENE/SIX ASSOCIATES

Charles W. Minch

CWM:rgw

Enclosures

Mr. Bruce Byford
Mr. George Scott
Mr. James Curry

DEMAND METER

The Contractors shop drawings show only the location of the demand meter in Bay 4 of the 15 KV load interrupter switchgear. The Bill of Materials lists the device as a GE DSW-64 KWHDM. Although the meter is probably a suitable device for the EMCS, this cannot be confirmed until wiring data and terminal provision data is supplied to us from the Contractor. We recommend that the ROICC ask for this information and check to see if the provided GE Model Number is a complete model number. We believe other option codes are applicable.

T20 DEMAND METER: The demand meter is located in 15 KV load interrupter switchgear. This meter provides the historical records of the hospital kilowatt demand. One meter output is a pulse stream consisting of appropriately scaled kilowatt pulses indicative of the hospital demand. The other pulse is the End of Interval pulse which denotes the end of the particular measurement period. Internal EMCS action must be taken if this End of Interval pulse is not recognized.

Gentlemen:

The attached is copy of the Data Base and Typical I/O Schedule for the Dual Duct Air Handler. This is another of the partial schedules which was explained in Joint Venture letter 445/LG/SA dated July 16, 1980.

Please advise if you have any questions or comments so that we may incorporate them prior to printing I/O Schedules.

Very truly yours,

LOCKWOOD GREENE/SIX ASSOCIATES

Charles W. Minch

DUAL DUCT AIR HANDLER

DESCRIPTION:

T25 DUAL DUCT AIR HANDLER: A dual duct air handler provides conditioned air (both heated and cooled) to several places. Generally, the space temperatures are controlled by local thermostats which vary the temperature of air allowed into the space by altering the mixture ratio of hot andcold streams at individual zone terminal units. The main heating and cooling coils in the air handler are controlled by discharge air controllers to provide a limited adjustable or constant temperature hot and cold air streams. Heating and cooling energy is assumed to be provided by boilers, chillers, or other external means controlled independently from the air handler.Enthalpy/economizer capability may or may not be present on a particular air handler.

POINT DEFINITIONS

SPECIAL POINT REQUIREMENTS

THIS SYSTEM FIELD POINTS REQUIRED:

DIGITAL INPUTS:

.-A0 SUPPLY AIR FAN DIFFERENTIAL PRESSURE SWITCH

.-A1 RETURN AIR FAN DIFFERENTIAL PRESSURE SWITCH

.-A2 RETURN AIR DAMPER CLOSED

.-A3 MINIMUM OUTSIDE AIR DAMPER CLOSED

.-A4 MINIMUM OUTSIDE AIR DAMPER OPEN

.+B0 VARIABLE OUTSIDE AIR DAMPER CLOSED

.+B1 VARIABLE OUTSIDE AIR DAMPER OPEN

.-A5 EXHAUST AIR DAMPER CLOSED

.-A6 EXHAUST AIR DAMPER OPEN

.-A7 SMOKE DAMPER CLOSED

.-A8 HOT DECK SMOKE DAMPER CLOSED

.-A9 COLD DECK SMOKE DAMPER CLOSED

.-B1 FREEZESTAT
