Mr. Charles E. Rundgren
Water Supply Branch
Division of Health Services
Department of Human Resources
Post Office Box 2091
Raleigh, North Carolina 27602

Dear Mr. Rundgren:

This letter concerns the Safe Drinking Water Act (Public Law 93-523) and in reference to a letter to you from LCdr J. G. Leech of the Atlantic Division, Naval Facilities Engineering Command, dated 23 February 1978, and a meeting on 27 April 1978 relative to the Safe Drinking Water Act at Marine Corps Air Station, Cherry Point where implementation procedures were outlined by you and Dr. Brya.

According to LCdr Leech's letter and discussions at Cherry Point on 27 April 1978, the state of North Carolina will perform the required testing for organic chemicals, inorganic chemicals, radioactivity and some bacteriological testing for federal facilities in North Carolina. Therefore, it is requested that arrangements be made for the state laboratory to perform test for organic chemicals and radioactivity of the water supply systems at Marine Corps Base, Camp Lejeune. Personnel of this Command will assist in collecting samples.

In addition, it is requested that the Quality Control Laboratory and laboratory personnel at this base be certified to perform bacteriological and inorganic chemical tests. Should you require additional information or this certification, please contact Mr. Julian Wooten, Base Maintenance Department, telephone 451-5003/2033.

Sincerely,

J. KOVACE
Colonel, U. S. Marine Corps
Base Maintenance Officer
By direction of the Commanding General
