Memorandum for the Record

From: Ms. Betz, Quality Control Lab., Environmental Section, NREAB, BMaintDiv

Subj: Trihalomethane Sampling for May 1982

1. On 17 May 1982, Jerry Monahan and Elizabeth Betz sampled the Tarawa Terrace and Montford Point systems. We were kept waiting at the Tarawa Terrace Water Treatment for the operator. We experienced alot of problems with the caps on the sample containers. The samples are suppose to have no air in the bottles and by 18 May 1982 t the few samples that had been airless at the time of collection had developed air bubbles. I called Grainger and talked to Mike Hargett. Apparently the cap liners were in wrong. He sent containers to resample the systems and fhe caps were changed in the remaining sample bottles.
2. On 19 May 1982, the Tarawa Terrace and Montford Point systems were resampled and Holcomb Blvd system was sampled by Gaines Huneycutt and Elizabeth Betz. We were kept waiting at the Holcomb Blvd Water Treatment Plant for the operator.
3. On 20 May 1982. Gaines Huneycutt and Bob Lachapelle sampled the New River Air Station and Rifle Range systems. A master key to the water plants was obtained from the General Foreman, Mr. Price, so the lab would not have to wait on operators.
4. On 21 May 1982, Gaines Huneycutt and Bob Lachapelle sampled the Courthouse Bay and Onslow Beach systems.
5. On 24 May 1982, Gaines Huneycutt ~~and Bob Lachapelle~~ sampled the Hadnot Point system.
6. The Tarawa Terrace samples were mailed on 20 May 1982. The Montofrd Point, New River, Holcomb Blvd, Rifle Range, Courthouse Bay, and Onslow Beach samples were mailed on 21 May 1982. The Hadnot Point Samples were mailed on 24 MAy 1982.
