

13 MAR 81

Commanding General, Marine Corps Base, C.I.W.C.

I am requesting via the Freedom of Information Act and Privacy Act of 1974 all information regarding the Contaminated water containing PCE and TCE from 1968 until wells were closed down in 1985. In particular, who made the decision not to notify former residents of Camp Lejeune until the just last year.

As a former Marine stationed at Camp Lejeune and residing both in the Forever Terrace II Housing area and Berkeley Manor area from about 1970 to 1985, I need to know. I also have 2 children born at the old Naval Hospital, one in 1971 and one in 1976. My first born had a mass removed from her neck in 1976 and in the early 1990's was diagnosed with cancer in the neck area as well as back and chest. She is still being treated. The youngest has exhibited no problems yet but now he will be checked. And myself included.

We ~~are~~ sure as hell take care of our own don't we?

Thank you,
[Signature]

Any Costs will be born by me.
