*This represents a probable upper limit on the concentration of Bromodichloromethane; there is interference in this set by an unknown compound.

**Likewise, these represent a probable upper limit on the total THM content.

SPECIAL NOTE

Samples 042 through 082 (omitting 047) were rejected due to improper sampling as explained by Mike Hargett in his 6/4/82 letter to Ms. Elizabeth Betz.

NOTE: All results reported in micrograms per liter.

* Both Duplicates contained large air bubbles.

** Represents an upper limit on the Bromodichloromethane level.

*** Represents an upper limit on the total Trihalomithane Level.

NOTE: All results reported in micrograms per liter.
Analyses completed 8/10/82.

*All samples from this site show contamination from Tetrachloroethylene. This compound interferes with the determination of Chlorodibromomethane. The reported value represents a probable maximum on the level of this trihalomethane.

**All samples from this site show contamination from Trichloroethylene and Tetrachloroethylene. These compounds interfere with the determinations for both Bromodichloromethane and Chlorodibromomethane. The reported values represent a probable maximum on the levels of these two trihalomethanes.

NOTE: All results reported in micrograms per liter.
 Analysis completed 12/8/82.

Analysis completed 3/11/83.

*Analyzed in Duplicate.

**Reported value represents a probable upper limit on the Bromodichloromethane concentration. In this sample set Trichloroethylene interferes with the Bromodichloromethane determination.

***Reported value represents a probable upper limit on the Total Trihalomethane concentration.

* All samples from this site exhibit contamination from Tetrachloroethylene.

** All samples from this site exhibit contamination from both Trichloroethylene and Tetrachloroethylene. The reported values for Bromodichloromethane and Total Trihalomethane are probable upper limits on the concentrations for these parameters.

NOTE: All results reported in micrograms per liter.
 Analysis completed 9/8/83.

*Represents a probable upper limit on the chloroform concentration.
There is an interferent in this sample which prohibits the
quantitation of chloroform.

**Represents a probable upper limit on the total trihalomethane
concentration.

NOTE: All results reported in micrograms per liter.
Analysis completed 7/10/84.
