7-4-85 - MP-178 - Row 4 Releaved water meters out. Pit on outside is full of water.

~~SP~~

7-4-85 - M-1 would not come on kept blowing fuses. Cut M-2 on at 12:30. Smoke was coming out of M-1 Switch stop

~~SP~~

7-4-85. Pumps for pond will not run. - SP

7-4-85-1730 - Failure light came on for #6 well. Turned on #7. Notified TI operator of change. About 1830 #2 well again and it came on, turned it back off because #7 needs to run. SP

7-4-85-1930 - Turned on booster pumps. M-2 well does not put out enough water for us to maintain a satisfactory reservoir level when system requires 2 Ni-lyt to run for extended periods. M-1 will not run. Recommend someone sit by pump if on getting it back on line S.P.

Booster pump 1930 - OFF 2300 = $3\frac{1}{2}$ hrs = 147,000 gallons

7-4-85 - Mac, - Lee said that he and Hardison do not want a shift change. They would prefer it to stay as it is. (SP)

8-31-85 - 1815 - Sewage plant operator said he had found
a leak in 6 in water line at final effluent. He said he had
notified emergency maint. I called Markelko and he stated
he couldn't notice a pressure loss. Mr. Pack from Sewage called
back and said he couldn't reach his leader or Davis so he had
called Mr. Price. He said Emergency maint had not checked
out leak yet. I went to Bldg 22 and the operator took me
to the leaks. One leak is at a coupling - the other leak is
underground. When I looked it appeared to be losing about 100 GPM
but Mr. Pack stated it had gotten worse since he first saw it. I
returned to 670 and notified Mr. Price (9-1-248-3629) (chgo to
451-5988) I followed his instructions. Mr. Tony Yopp at

KEEPS FLUZE UP + RUNNING OVER
ON TO THE YARD. DA

~~WELL~~ 649 well house has been locked by
C.P.L. and we can't get in. (K.L.)

9-15-85 - Wells cut off approximately 0500. I noted that
the raw water meter showed we still had water coming
to the plant. I went up and checked the sputter and there
was no flow. Lights on board showed sludge lime
feeds, lime pump and other accessory equipment still
in operation. Check to see if flow pointer was hung and
turned off accessory equipment. Checked fuses on meter ^(ok) and
looked for obvious problems. Checked Chlorine room and
found Chlorinator still feeding. Turned off valves at Cylinder
Counter on raw water meter still showing water flow.
Turned off Th wells but it made no difference. 0730 - Called Mr.
Frazelle to see if he wanted Vick to come in - He said to
tie pointer back.

~~10-24-85-1845~~ Went to elevated tank at H.P. to check on line
broken by contractor, they had broken line from pump pump
and had driven a wooden peg in it, removed peg so pit
would not fill with water. (Leak in pit should be repaired) EP
