11-19-85- 2000 - Campbell called at 1800 and asked if I knew  
 of any changes made at M.P. I told him I had not been  
 informed of any. He said the pumps at M.P. had not been  
 running but the chart showed his elevated tank was  
 full. He checked the tank and found it was overflowing  
 and that the valves from TT were closed. He finally  
 located a new valve that he had not seen before at the  
 elevated tank. He turned valve off and overflow  
 stopped. TT had 11'6" at 1600 - 8'8" at 2000. SP

1-24-86 - 1400 - Ruff called and said he was sick and would not be in for 4-12 shift this evening. Called Peterson and he agreed to take 4-12 - at RR.

1-25-86 - 1230 - Kennedy notified me that a heavy flow of clear water was coming in to lift station at Boat Basin. Checked with Kelly and he said his chart had just started "straight lining". Sewage needed flow stopped so contractor could perform work. Turned off water at boat basin. Notified fire department, Steam plant, Mr. Price, - (298-3629 & 298-4700) Mr. Johnson. (393-8417) and alerted emergency maint. to the fact we may have leak in that area.

1-26-86 - Was informed by ~~John~~ that they were not going to finish up at the Boat Basin until about 3 or 4 AM

1-26-86 - 0600 - Parker called in and ask to be put on A/V due to his wife being sick.

1-26-86 - Coled sewage plant at 0730 also called on radio but did not get any answer to the condition of Boat Basin. Water still off.

2-5-86 - I was informed at 1600 that there was a break at the boat basin and Colby was sent out to check it out. Colby found that the water had been cut back on and that a fire hydrant had been left running. A contractor said maint. had left around 3 o'clock after fixing a 2" line. Colby also found a major leak across from A-8 and said A-1 & A-2 had no water. Emergency maint. notified and will fix it tomorrow. Fire department & Steam plant notified. Called Johnson about 7:15. ~~He said the water was quit today at 7:05.~~ Called Mack Traylor. ~~What would you do, do not call Mack Traylor.~~ He went out told me he is not part of water.

2-5-86 - 643 well - Aux engine runs for about 20 minutes and then cut off.

- |           |                            |                       |

670 Herring - Ellis

3-25-86-0940 - Received call from John Faoli (Housing-451-2246) He reported that a Mrs. Howlin, 1420 Toledo Rd, Knox trailer park was complaining of bad tasting water and that she wanted her water checked. She said she was going shopping and would not be back until 1330. She or Mr. Faoli wanted an appointment or time we would be there. I told him it would be difficult to give him a definite time but that we would try to get there after she got home. She told him her water has tested bad since she moved in in February. Her Phone # is 353-8417. (B)

3-25-86 - Parker notified me that packing on well M-142 was leaking badly. Packing is on order and I was told not to write a ticket. SP

4.5.86 1115 Receive call from L. Holland,  
Notified of schedule change. D.E.

4.5.86 1135 Receive call from D. Sympson at  
AS-110. He reported the influent valve  
at the South Elevated Tank (Beiger) was  
close he open it. The valve needs packing.

4.5.86 1240 Mrs. Freddie Duncan called  
said Duncan was sick wouldn't  
be in 4.12 CHB today.

4.5.86 1300 Called L. Holland, and S. Milla several times  
concerning working 4 1/2 CHB today. No answer

4.5.86 Inform L. Parker that he would  
have to work overtime 4.12 at CHB. He  
stated he had severe car problems. He got  
his car out of the shop last night, it  
gave him problems coming to work today.  
He felt it was to risky leaving job at  
night in case of a breakdown. He didn't  
want to work overtime due to this. I  
told him that I would work being that  
I couldn't get anyone to cover the  
shift. D.E.

4-17-86- Checked out our battery charger to MCAS. SP

4-18-86- 1145- Received call from J. Parker. He stated his  
bursetis was bad and that he would not be able to  
work at the RR this evening - 4-12. CHB will handle.

4-18-86- 1330 - Checked out snapper mower to MCAS-110. (Christman) SP

4-18-86- 1415- Samples from outside plumbing picked up Crane. SP

4-19-86- 1500 - Received call from Lt Mackey (C.G. duty officer) 0554  
He said TC-501 was over flowing and would not be going  
on. I call the Air Station and was told by Milton that the  
pumps had just shut off about 5 minutes before. He was  
going to have Christman check it out. I returned Lt Mackey's  
call and told him we were taking care of it. SP

4-19-86 well 646 has a gas leak in aux eng.

4-20-86 - There was no power outage at 0630  
as scheduled.

~~RAH~~

4-20-86. Well 610 will not run

6-6-86-2143 - Kelly reported light out in Chlorine room at CHB.

Reported to emergency master. (SP) Bad switch Repair 2315. SF

8-7-86 - Kelly has another Chlorine cylinders that he can't get the valve open. Are we getting this from a different location or is someone at the lot jamming these valves? We've had a few of these in the last month and the ones we are getting open seem to require more force than normal.

There is no way to get them open using the regular wrench. (SP)  
CHB & RR each need a Chlorine line. Neither plant has a spare.
