Technical comments:³

The preferred Chemical Abstracts name of this chemical is 1,3-Dioxane-5-methanol, 5-ethyl-. Further, the HTS subheading cited in the article description appears to be incorrect. This chemical appears to be more appropriately classified in subheading 2932.99.90.

³ The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.
