

**2011-2016 Public Health Emergency  
Preparedness Capabilities: Opportunities for  
Clinician Engagement with State and Local Public  
Health Departments**

**Clinician Outreach and  
Communication Activity (COCA)  
Conference Call  
January 25, 2012**

# Objectives

**At the conclusion of this session, the participant will be able to accomplish the following:**

- ❑ **Understand CDC's capability-based methodology for determining priorities for state/local public health preparedness and response**
- ❑ **Describe types of current public health preparedness activities being considered between public health departments and clinical providers**
- ❑ **Identify opportunities for clinicians to develop and support a shared engagement of public health preparedness capabilities at the state or local level**

# Continuing Education Disclaimer

**In compliance with continuing education requirements, all presenters must disclose any financial or other associations with the manufacturers of commercial products, suppliers of commercial services, or commercial supporters as well as any use of unlabeled product or products under investigational use. CDC, our planners, and the presenter for this presentation do not have financial or other associations with the manufacturers of commercial products, suppliers of commercial services, or commercial supporters. This presentation does not involve the unlabeled use of a product or products under investigational use. There was no commercial support for this activity**

# Accrediting Statements

**CME:** The Centers for Disease Control and Prevention is accredited by the Accreditation Council for Continuing Medical Education (ACCME®) to provide continuing medical education for physicians. The Centers for Disease Control and Prevention designates this electronic conference/web-on-demand educational activity for a maximum of 1 *AMA PRA Category 1 Credit™*. Physicians should only claim credit commensurate with the extent of their participation in the activity. Non-physicians will receive a certificate of participation.

**CNE:** The Centers for Disease Control and Prevention is accredited as a provider of Continuing Nursing Education by the American Nurses Credentialing Center's Commission on Accreditation. This activity provides 1 contact hour.

**CEU:** The CDC has been approved as an Authorized Provider by the International Association for Continuing Education and Training (IACET), 1760 Old Meadow Road, Suite 500, McLean, VA 22102. The CDC is authorized by IACET to offer 1 ANSI/IACET CEU for this program.

**CECH:** Sponsored by the *Centers for Disease Control and Prevention*, a designated provider of continuing education contact hours (CECH) in health education by the National Commission for Health Education Credentialing, Inc. This program is designed for Certified Health Education Specialists (CHES) to receive up to 1 Category I CECH in health education. CDC provider number GA0082.

**CPE:**  The Centers for Disease Control and Prevention is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. This program is a designated event for pharmacists to receive 1 Contact Hour in pharmacy education. The Universal Activity Number is 0387-0000-11-100-L04-P and enduring 0387-0000-11-100-H01-P. Course Category: This activity has been designated as knowledge based.

**AAVSB/RACE:** This program was reviewed and approved by the AAVSB RACE program for 1.2 hours of continuing education in the jurisdictions which recognize AAVSB RACE approval. Please contact the AAVSB Race Program at [race@aavsb.org](mailto:race@aavsb.org) if you have any comments/concerns regarding this program's validity or relevancy to the veterinary profession.

# Today's Presenter

**Christa-Marie Singleton, MD, MPH**

Senior Medical Advisor

Division of State and Local Readiness

CDC

**2011-2016**

**Public Health Emergency Preparedness Capabilities:  
Opportunities for Clinician Engagement with State and  
Local Public Health Departments**

**Christa-Marie Singleton, M.D., M.P.H**  
**Senior Medical Advisor**

**Office of Public Health Preparedness and Response**  
**Division of State and Local Readiness**

**Clinician Outreach and Communication Activity (COCA) Conference Call**  
**January 25, 2012**

Office of Public Health Preparedness and Response  
Division of State and Local Readiness

Section 1

# **PHEP COOPERATIVE AGREEMENT OVERVIEW**

# Public Health Emergency Preparedness (PHEP) Cooperative Agreement

- ❑ Established in 1999 as a \$40 million competitive grant with a bioterrorism focus and 53 awardees
- ❑ Managed by the Division of State and Local Readiness (DSLRL) within CDC's Office of Public Health Preparedness and Response (OPHPR)
- ❑ Today, the PHEP cooperative agreement supports all-hazards preparedness nationwide
  - Formula-based, providing more than \$7 billion as of FY 2010
  - \$698,259,211 in fiscal year 2010 funding
  - 62 awardees: 50 states, 4 localities, 8 territories and freely associated states
- ❑ New program announcement began August 2011

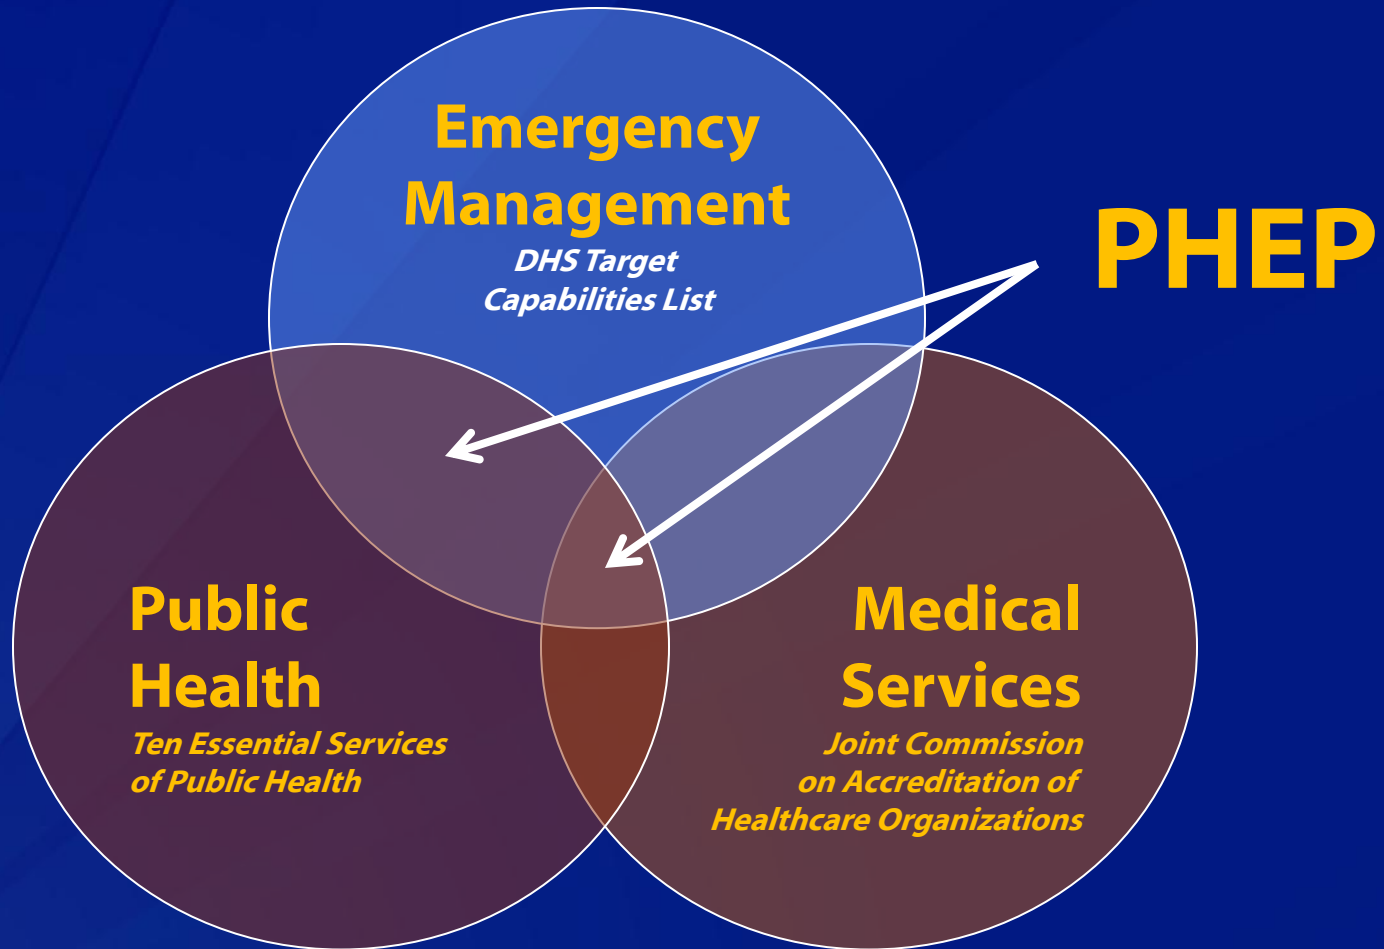

## PHEP Program Challenges

Determining a consistent set of priorities/objectives for PHEP program awardees has been challenging due to:

- ❑ Many different stakeholders in the process
- ❑ Multiple CDC programs involved
- ❑ Few formal processes
- ❑ Congressional drivers
- ❑ Disease du jour
- ❑ Competing interests
- ❑ Limited supporting science/evidence base

# Preparedness "Environment"

## 2011 to 2016 Program Direction

### Revisions to the cooperative agreement to address and resolve challenges and issues identified during the 2005-2010 cycle

- ❑ Develop a more systematic process for subject matter expert (SME) engagement
- ❑ Align with the TCL
- ❑ Align with the National Health Security Strategy (NHSS)
- ❑ Align with the CDC Strategic Preparedness Plan
- ❑ More focus on awardee strategic planning
- ❑ More focus on formal self-awardee assessment
- ❑ More focus on defining functions and demonstrations
- ❑ More focus on developing and implementing a “change management” process to protect against annual changes to the program

# PHEP Priority Determination

*\* Note: Partner documents are not an exhaustive list, shown for representation purposes only*

## **Priority Determination Process**

- ❑ **Process Resulted in the Selection of 20 Public Health Preparedness Capabilities**
  - Later reduced to 15 through combining of capabilities
  - No capabilities were eliminated
- ❑ **Peer Reviewed and Validated by OPHPR's Board of Scientific Counselors**
  - September 2009

# National Standards for State and Local Planning

Description of 15 capabilities and related functions, tasks, performance measures, and resources necessary for achieving each capability

Suggested activities for using the national standards to help public health departments organize work and identify most pressing needs

# Preparedness Capabilities

| <b>Capability Name</b> |   |
|------------------------|---|
| <b>1</b>               | <b>Community Preparedness</b>                                       |
| <b>2</b>               | <b>Community Recovery</b>   |
| <b>3</b>               | <b>Emergency Operations Coordination</b>                            |
| <b>4</b>               | <b>Emergency Public Information and Warning</b>                     |
| <b>5</b>               | <b>Fatality Management</b>  |
| <b>6</b>               | <b>Information Sharing</b>  |
| <b>7</b>               | <b>Mass Care</b>  |
| <b>8</b>               | <b>Medical Countermeasure Dispensing</b>                            |
| <b>9</b>               | <b>Medical Materiel Management and Distribution</b>                 |
| <b>10</b>              | <b>Medical Surge</b>  |
| <b>11</b>              | <b>Non-Pharmaceutical Interventions</b>                             |
| <b>12</b>              | <b>Public Health Laboratory Testing</b>                             |
| <b>13</b>              | <b>Public Health Surveillance and Epidemiological Investigation</b> |
| <b>14</b>              | <b>Responder Safety and Health</b>                                  |
| <b>15</b>              | <b>Volunteer Management</b>   |

# Preparedness Capabilities Structure

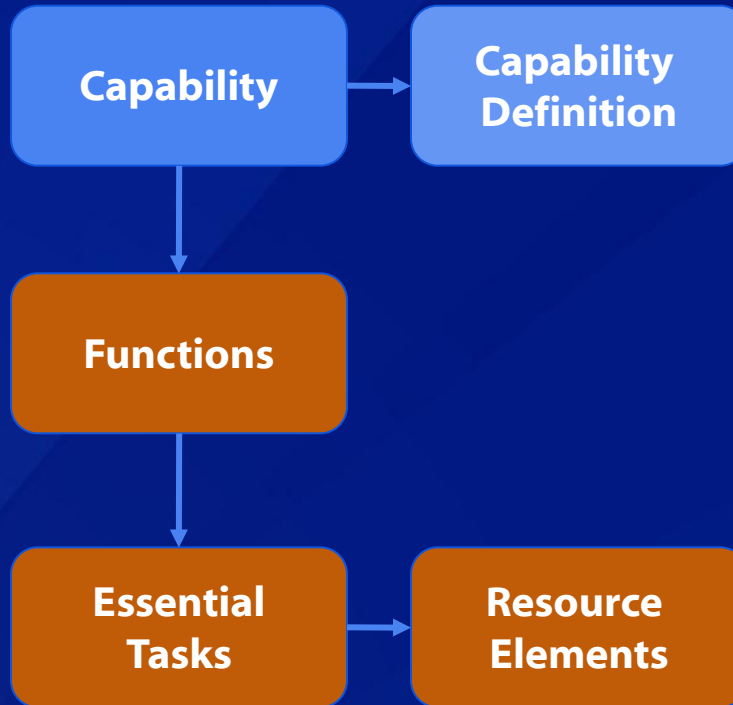

15 Preparedness Capabilities

3-5 broad "Functions" per Capability

A number of Essential Tasks for completion of each Function

Tasks form the basis for training and exercises

Tasks may appear in Capability or Demonstration Plans

Resource Elements include owning or, where applicable, having access to:

1. Plans (includes vulnerable populations, legal authorities)
2. Skills and Training
3. Equipment and Technology

Application Work Plan Component

Section 2

**CDC EXPECTATIONS FOR PUBLIC  
HEALTH'S ENGAGEMENT WITH  
HEALTHCARE PROVIDERS**

# CDC Expectations for Public Health's Engagement with Healthcare Providers

## □ Information Sharing

- Indicate how healthcare providers in the jurisdiction can exchange information:
  - electronic public health case-reporting systems
  - syndromic surveillance systems
  - immunization registries

# **CDC Expectations for Public Health's Engagement with Healthcare Providers**

## **❑ Medical Countermeasure Dispensing**

- Activate mechanism(s) for individuals and healthcare providers to notify health departments about adverse events

## **❑ Non-Pharmaceutical Interventions**

- Establishment of agreements with healthcare providers which must include at a minimum:
  - Procedures to communicate case definitions
  - Procedures for reporting identified cases of inclusion to the health department
- At the time of an incident, assist community partners with coordinating support services (e.g., medical care and mental health)

# **CDC Expectations for Public Health's Engagement with Healthcare Providers**

## **□ Public Health Epidemiology**

- Support healthcare providers to help determine cause and origin of, and definitively characterize, a public health incident
- Establish processes and protocols to gather and analyze data from reportable condition surveillance

# **CDC Expectations for Public Health's Engagement with Healthcare Providers**

## **□ Public Health Laboratory Testing**

- Coordinate activities, gain assistance from, and/or share data to healthcare providers who may be packaging and shipping samples and subsequently receiving sample results during a response
- Send laboratory data to healthcare providers, as permitted by all applicable laws, rules, and regulations

# CDC Expectations for Public Health's Engagement with Healthcare Providers

## □ Medical Surge

- Engage in healthcare coalitions and integrate healthcare activities into the jurisdictional response plan
- Clearly define processes and indicators as to when the jurisdiction's healthcare organizations/health care coalitions transition into and out of conventional, contingency, and crisis standards of care

# CDC Expectations for Public Health's Engagement with Healthcare Providers

## ☐ Medical Surge (continued)

- Document participation from jurisdictional and regional pediatric providers and leaders
- Assist or coordinate with medical facilities to assure the return of patients to their pre-incident medical environment or other applicable medical setting

Section 3

**PRELIMINARY PHEP AWARDEE  
ENGAGEMENT REVIEW: HEALTHCARE  
PROVIDERS AND PUBLIC HEALTH**

# Community Preparedness Functions

At the highest level, what things (Functions) need to occur?

**Determine Risks to the Health of the Jurisdiction**

Can the jurisdiction identify potential hazards, vulnerabilities, and risks in the community related to the public health, medical, and mental health systems?

**Build Community Partnerships to Support Health Preparedness**

Has the jurisdiction identified community partners? How have these community partnerships been utilized to address community public health, medical and behavioral services during an incident?

**Engage with Community Organizations to Foster Social Networks**

How connected are community organizations to public health's efforts to assure public health, medical and mental health services in a community before, during, and after an event?

**Coordinate Training to Ensure Community Engagement in Preparedness Efforts**

Has the jurisdiction provided guidance to community partners to assist them regarding preparedness, response, crisis/ disaster messaging, and recovery methods for the specific risks applicable to the jurisdiction?

# Resource Elements

What things (Resources) need to be in place to accomplish the function?

**Coordinate Training to Ensure  
Community Engagement in  
Preparedness Efforts**

***(Priority)* Written plans should include documentation that public health has participated in jurisdictional approaches to address how children's medical and mental/behavioral health care will be addressed in all-hazard situations**

***(Priority)* Written plans should include a process and procedures to build and sustain volunteer opportunities for residents to participate with local emergency responders and community safety efforts year round, e.g., Medical Reserve Corps.**

# Medical Surge Functions

At the highest level, what things (Functions) need to occur?

**Assess the Nature  
and Scope of the Incident**

**What are the needs of the incident and what are indicators for activation of surge operations? What should be the specific role of partner agencies?**

**Support Activation  
of Medical Surge**

**Which partners should be activated to provide additional health care services in response to an incident? What information should be communicated to partner agencies or to the public?**

**Coordinate Jurisdictional  
Medical Surge Operations**

**How are resource needs obtained and distributed during an incident? How are patients tracked?**

**De-escalate  
Medical Surge Operations**

**What is the process to release resources and return the system to pre-incident operations?**

# Resource Elements

What things (Resources) need to be in place to accomplish the function?

## Support Activation of Medical Surge

*(Priority)* Written plans should include documentation of process or protocol how the health agency will access volunteer resources through ESAR-VHP, MRC, other programs of credentialed personnel

*(Priority)* Written plans should include documentation of the process how the public health agency will engage in health care coalitions and partnerships regarding when the healthcare organizations and coalitions will transition into and out of conventional versus crisis standards of care

*(Priority)* Written plans should include processes and protocols to identify essential situational awareness information for federal, State, local, non-governmental agencies, private sector agencies, and other ESF 8 partners.

*(Priority)* Written plans should include documentation of participation from jurisdictional and regional pediatric providers and leaders from a variety of settings in jurisdictional response planning

## **Preliminary PHEP Awardee Review Status: Alternate Care Systems (ACS) or Alternate Standards of Care Planning**

- ❑ 29 of 57 awardees reported current status related to ACS or alternate standards of care planning as “partially in place”
- ❑ **Notable examples:**
- ❑ **State A: For the past 5 years, required its funded local health departments (LHDs) and healthcare facilities (HCFs) to participate in planning for redistribution of personnel, equipment, care standards in a public health emergency**
  - In 2009 distributed its “Guidance for Alterations in the Healthcare System During a Moderate or Severe Pandemic” to LHDs, HCFs
    - Includes assumptions, legal authorities, clinical triggers, emergency medical services

## **Preliminary PHEP Awardee Review Status: Alternate Care Systems (ACS) or Alternate Standards of Care**

- ❑ **State B: Created “Medical Surge Framework” describing the process for hospitals to request that the State Health Commissioner consider alterations to standards of care**
  - Established per state statute
  - Applies when there is a public health incident or when acute care facilities are under-resourced
  - Statute also authorizes State Health Commissioner to establish staffing, facility, screening/admission criteria, clinical standards

## **Preliminary PHEP Awardee Review Status: Alternate Care Systems (ACS) or Alternate Standards of Care**

- ❑ **State C: Executive Law Article that requires local emergency managers to work with partners to develop written standards, processes, and indicators to move in/out of various standards of care**
  - Standards to be based upon jurisdictional risk assessment
  - Created “Allocation of Ventilators in an Influenza Pandemic” guidelines (although awardee noted guidelines untested, ethical questions unresolved)
  - Developing toolkit (templates, medical protocols, legal constructs) to assist local community partner planning

## **Preliminary PHEP Awardee Review Status: Alternate Care Systems (ACS) or Alternate Standards of Care**

- ❑ **State D: Health Department convened state workgroup 2007-2008 of healthcare providers; initially pandemic focused, now all-hazard recommendations**
  - Scope of Practice, Standards of Care
  - Legal/liability issues
  - Staffing standards
  - Provision of care
  - Key population-based services
- ❑ **Recommendations being finalized by State Health Commissioner**

# Preliminary PHEP Awardee Review Status: Planning for Pediatric Care

## ❑ Community Preparedness

- 2 awardees reported engagement in pediatric mass casualty planning or expansion of critical care capacity

## ❑ Medical Surge

- 21 awardees reported “partially in place” status of engaging pediatric experts/providers in pediatric surge plans
- 16 awardees with pediatric planning “partially in place” engaged Emergency Medical Services for Children (EMSC) or related Emergency Medical Services programs as active partners

- ❑ **6 awardees who are currently engaged in altered standards of care planning reported pediatric issues are under consideration for this upcoming project period**

## Notable Examples - Planning for Scarce Pediatric Resources

- ❑ State A: Member of 5-state regional mutual aid compact designed to make pediatric clinical staff, medical, supplies available within this network
- ❑ State B: As specialized pediatric care only available in its larger population centers, one large region has developed and shared "Hospital Guidelines for Management of Pediatric Patients in Disasters" with other intrastate regions
- ❑ State C: Health Department's Children's Advisory Committee developed EMSC Interfacility Transport Matrix for use by community hospitals, out-of-hospital physician decision-planning
- ❑ State D: Sole pediatric facility has designated physician liaison to consult with other healthcare facilities to help them treat pediatric patients rather than transfer them

Section 4

# **NEXT STEPS CONSIDERATIONS**

# Considerations for Public Health and Clinician Engagement

- ❑ **Clinician input is needed at a minimum:**
  - Community Preparedness
  - Community Recovery
  - Information Sharing
  - Non Pharmaceutical Interventions
  - Medical Surge
  - Responder Safety and Health
- ❑ **Clinician feedback, opportunities, and challenges:**
  - Time for office staff to send data to public health
  - Formats for receipt of data
  - Clinical protocol access
  - Healthcare continuity of business planning
  - Outlets for patient care during surge situations

# Considerations for Public Health and Clinician Engagement

## ❑ **Collective partnership opportunities**

- Operational guidance to support jurisdictions with small or absent pediatric provider populations
- Operational guidance needed to support concept of pediatric consultant/liaison advisor to non-pediatric healthcare facilities
- Continue to partner to develop evidence-informed practices to support operationalizing pediatric practice guidelines

## Continuing Education Credit/Contact Hours for COCA Conference Calls

Continuing Education guidelines require that the attendance of all who participate in COCA Conference Calls be properly documented. All Continuing Education credits/contact hours (CME, CNE, CEU, CECH, and ACPE) for COCA Conference Calls are issued online through the CDC Training & Continuing Education Online system <http://www2a.cdc.gov/TCEOnline/>

Those who participate in the COCA Conference Calls and who wish to receive CE credit/contact hours and will complete the online evaluation by **Feb 25, 2012** will use the course code **EC1648**. Those who wish to receive CE credits/contact hours and will complete the online evaluation between **Feb 26, 2012** and **Jan 14, 2013** will use course code **WD1648**. CE certificates can be printed immediately upon completion of your online evaluation. A cumulative transcript of all CDC/ATSDR CE's obtained through the CDC Training & Continuing Education Online System will be maintained for each user.

Thank you for joining!

## 2011-2016 Public Health Emergency Preparedness Capabilities: Opportunities for Clinician Engagement with State and Local Public Health Departments

 = Continuing Education Credits

**Date:** Wednesday, January 25, 2012

**Time:** 2:00 - 3:00 pm (Eastern Time)

**Participate by Phone:**  
Dial: 888-677-1801  
Passcode: 6902857

**Participate by Webinar:** <https://www.mymeetings.com/nc/join.php?i=PW8812563&p=6902857&t=c>

**Presenter(s):**  
  **Christa-Marie Singleton, MD, MPH**  
Senior Medical Advisor  
Division of State and Local Readiness  
Office of Public Health Preparedness and Response  
CDC

**Overview:**  
One of the nation's key preparedness challenges has been determining appropriate state and local public health preparedness priorities. In March 2011 CDC released the Public Health Preparedness Capabilities: National Standards for State and Local Planning to serve as national public health preparedness standards that can support public health, medical, and mental/behavioral health systems during emergency incidents. Clinicians have a vital role in helping public health departments assure the public's health during emergency incidents. During this COCA conference call, a CDC subject matter expert will provide an overview of this National Standards document and highlight opportunities for clinician engagement.
