REPORT ACKNOWLEDGEMENTS

Report direction and guidance came from Mike Linsenbigler and Misty Jones. The report was prepared by the Conservation and Environmental Program Division with contributions from Katina Hanson, Beverly Preston, Jean Agapoff, and Kathie Moh. Cathie Feather and Alex Barbarika from the Economic and Policy Analysis Staff also contributed to this report.

INFORMATION

Additional information about the Farm Service Agency's Conservation and Environmental Program Division can be accessed at www.fsa.usda.gov.

The United States Department of Agriculture (USDA) prohibits discrimination on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202.720.2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director Office of Civil Rights, Room 326-W, Whitten Federal Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or phone 202.720.5964 (voice or TDD). USDA is an equal opportunity provider and employer.

Office of the Secretary
Washington, D.C. 20250

June 13, 2011

Dear Conservation Supporters:

This year, we celebrate the 25th Anniversary of the Conservation Reserve Program (CRP) and continue to build on the tremendous benefits of this program in cooperation with our Nation's farmers and ranchers. In March 1986, the first CRP contract was signed, igniting a movement that has helped reduce soil erosion by 8 billion tons, provided natural habitats for wildlife, restored more than 2 million acres of wetlands, and removed hundreds of millions of tons of carbon dioxide from the air.

Since 1986, CRP has restored grasses, trees, and wetlands on millions of acres. These lands provide water quality protection, enhance wildlife habitat, and maintain soil productivity. CRP not only benefits farmers and ranchers and their local communities but suburban and urban residents as well. CRP helps protect the water supplies and air quality of many major cities. CRP provides numerous recreation benefits to Americans in the form of wildlife hunting and viewing.

CRP continues to evolve from its beginning as an erosion control initiative, authorized in the 1985 Farm Bill, to an environmental program that addresses diverse local and national resource priorities. CRP continues to promote partnerships with local and State conservation authorities through the Conservation Reserve Enhancement Program (CREP). Currently, there are 45 CREP agreements in 33 States that will improve water quality, reduce soil erosion, aid in flood control, enhance wildlife habitat, and provide additional protection for watersheds.

The 2011 announcement of the 41st CRP Signup supports President Barack Obama's commitment to help our Nation's farmers and ranchers maintain a healthy environment and a sound agricultural economy. I hope the information contained in this report continues to assist in your efforts to conserve and protect America's greatest treasure, our natural resources.

A handwritten signature in black ink, appearing to read "Thomas J. Vilsack". Below the signature, the name "Thomas J. Vilsack" is printed in a smaller, standard font, followed by the word "Secretary" in a slightly smaller font.

CRP Overview

Background

The Conservation Reserve Program (CRP) is a voluntary conservation program available to agricultural producers to assist them to enhance environmentally-sensitive lands. Producers enrolled in the CRP plant long-term, resource-conserving covers such as introduced or native grasses or trees to improve the quality of water, control soil erosion, and enhance wildlife habitat.

In return, FSA provides participants with rental payments and cost-share assistance for 10 to 15 years.

The 41st CRP Signup

On January 28, 2011, USDA Secretary Tom Vilsack announced that a CRP general sign-up would begin on March 14, 2011, and continue through April 15, 2011.

Eligibility Criteria

For land to be eligible for general signup, it must be:

- cropland that has been planted or considered planted to an agricultural commodity 4 of the 6 years between 2002 through 2007; and
- physically and legally capable of being planted in a normal manner to an agricultural commodity; or
- certain marginal pastureland.

Also, cropland must:

- have a weighted average Erosion Index of 8 or greater;
- be expiring CRP; or
- be located in a national or State Conservation Priority Area.

CRP rental rates are based on local dryland cash rental rates. Producers may offer land at these rates or may offer a lower rental rate to increase the likelihood that their offer will be acceptable.

CRP cost share assistance is available to eligible participants in an amount not to exceed 50 percent of the eligible costs of establishing the approved practice.

General Signup

Because not all offers can be accepted, they are evaluated and ranked using an Environmental Benefits Index (EBI) based on the environmental benefits expected to accrue if the land is enrolled in the CRP.

Use of the EBI ensures that the most environmentally-sensitive lands relative to cost are selected and that all offers are considered fairly.

The six EBI factors are:

- N1, Wildlife Habitat Cover Benefits;
- N2, Water Quality Benefits From Reduced Erosion, Runoff and Leaching;
- N3, On-Farm Benefits of Reduced Erosion;
- N4, Enduring Benefits;
- N5, Air Quality Benefits; and
- N6, Cost.

New for Signup 41 EBI

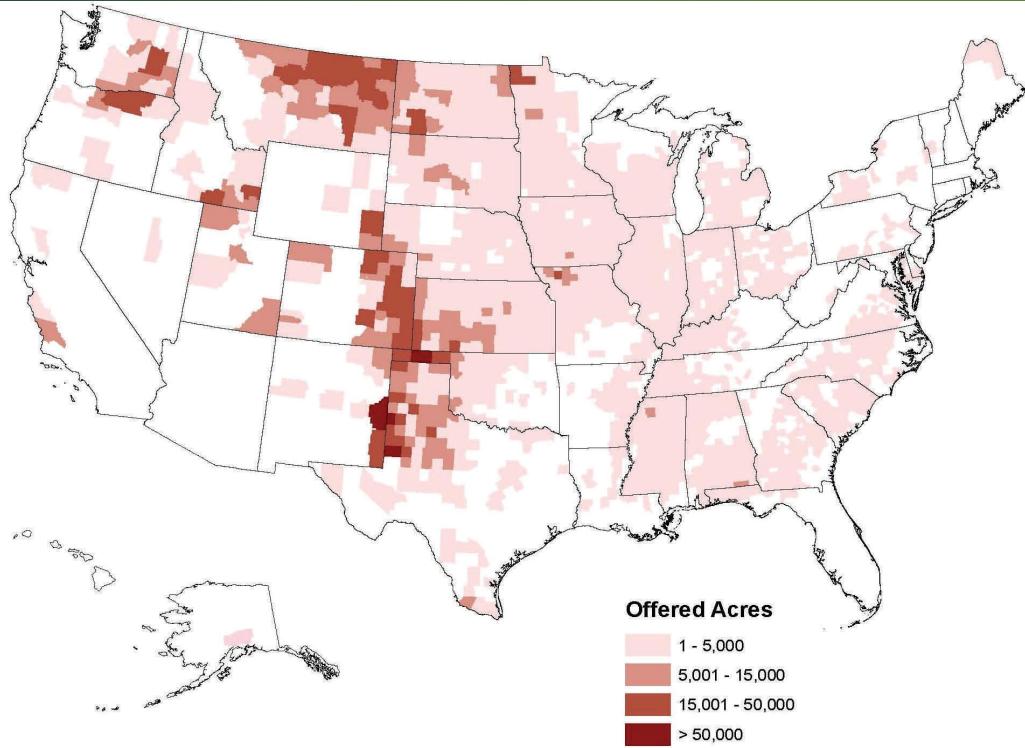

- A new practice, CP42, Pollinator Habitat, was added;
- Existing stands of grasses and trees were added to subfactor N1a wildlife habitat cover types;
- Water developments no longer receive EBI points under subfactor N1b for wildlife enhancement; and
- Subfactor N1c, Wildlife Priority Zones was changed to provide 30 points only when subfactor N1a score is greater than or equal to 40.

Rental and Cost Share Payments

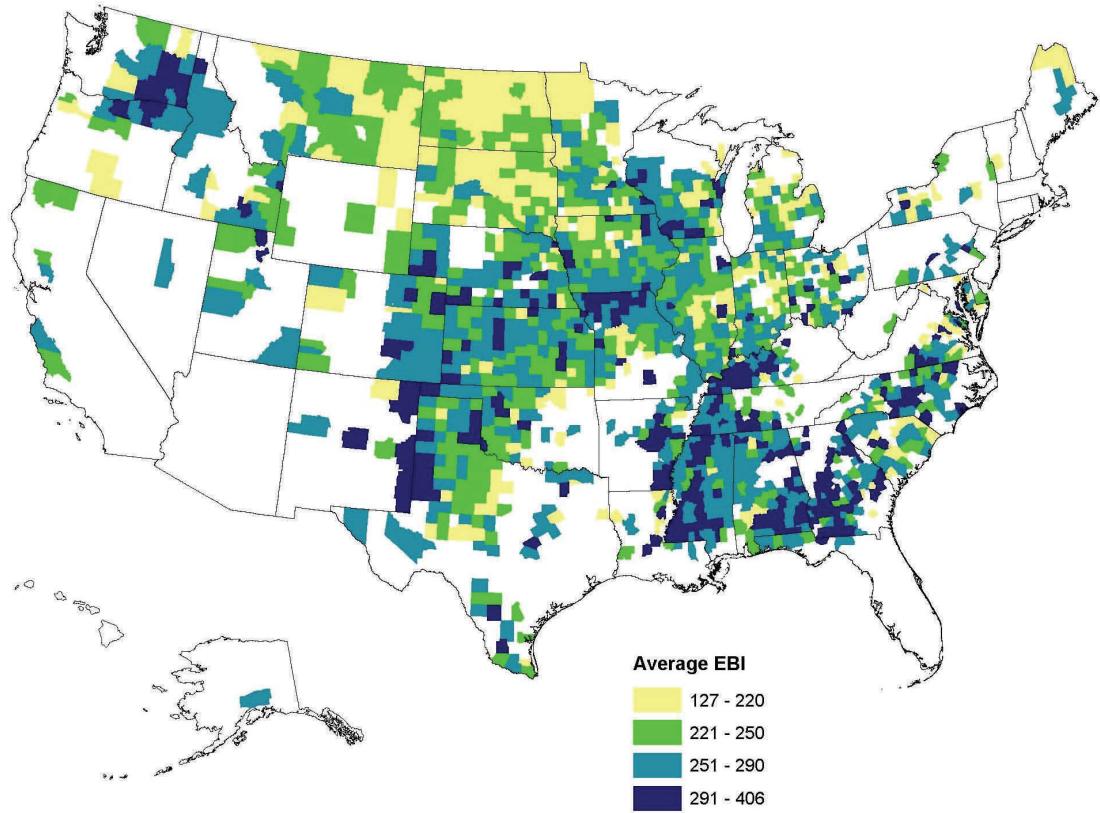

The 41st CRP Signup Results

Offered Acres

FSA received 38,715 offers to enroll about 3.75 million acres

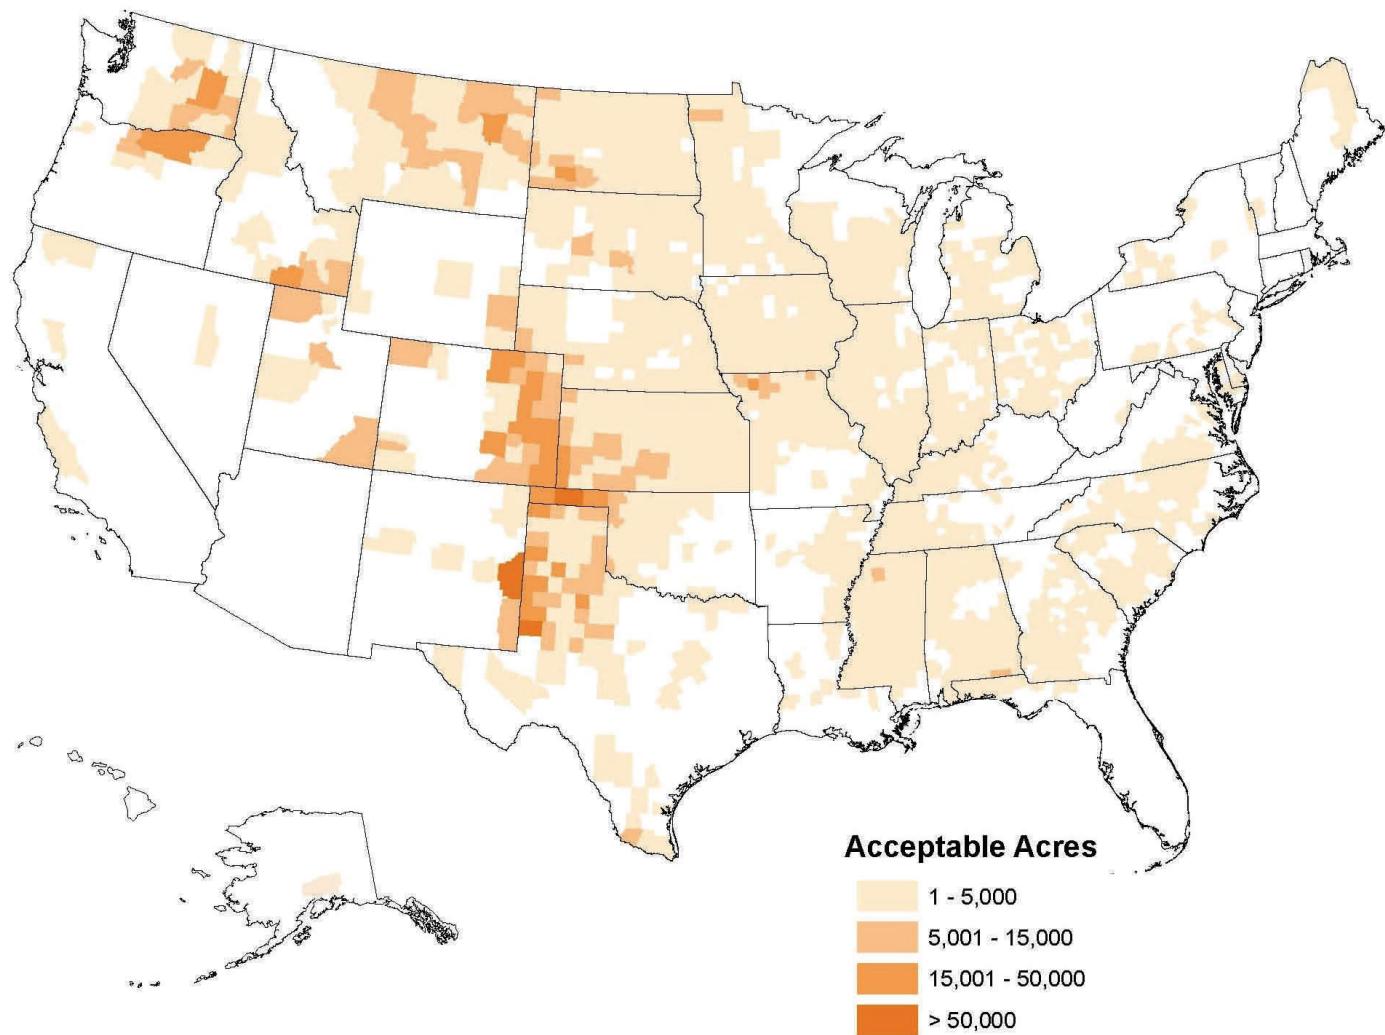

Average EBI Score

The 41st CRP Signup Results

Acceptable Acres

About 2.83 million acres on 29,878 offers were acceptable.

1/ Not including practices: permanent wildlife habitat, wildlife food plots, rare and declining habitat, and pollinator habitat.

*Data withheld to avoid disclosure of individual operations.

Continuous CRP

Continuous CRP Signup

Continuous signup provides an effective, ongoing means to enroll certain practices such as filter strips, riparian buffers, grass waterways, shelterbelts, field windbreaks, wetlands restoration, and high-value wildlife habitat.

As of April 30, 2011, there were cumulatively 5.0 million acres enrolled for all continuous sign up conservation practices. Of this total, nearly 1.4 million acres (30 percent) are enrolled in the following eight targeted continuous signup initiatives:

- The Upland Bird Habitat initiative helps producers plant ground covers, shrubs, and grasses, to provide appropriate habitat conditions for common upland birds such as northern bobwhite quail. Studies show that these conservation practices have increased the upland bird species populations. Up to 350,000 acres can be enrolled in this initiative. As of April 30, 2011, there were 233,000 acres enrolled.
- The Duck Habitat initiative helped increase duck populations by an estimated 60,000 birds annually and will restore 150,000 wetland acres. As of April 30, 2011, there were 136,000 acres enrolled.
- Since 2005, the Non-floodplain Wetland Restoration initiative has provided an opportunity to enroll up to 250,000 acres of wetlands and playa lakes located outside of the 100-year floodplain. As of April 30, 2011, there were 114,000 acres enrolled.
- Since 2004, the Floodplain Wetlands Restoration initiative provided an opportunity to enroll up to 500,000 acres of wetlands located in the 100-year floodplain. As of April 30, 2011, 197,000 acres were enrolled.
- State Acres for Wildlife Enhancement (SAFE) provides States and regions the opportunity to conserve 850,000 acres for high priority wildlife such as sage grouse, lesser prairie chicken, and ring-necked pheasant. As of April 30, 2011, there were 91 projects in 35 States, and 463,000 acres were enrolled.
- The Longleaf Pine initiative's goal is to repopulate the natural longleaf pine forests ranges by enrolling up to 250,000 acres throughout nine southern States. Re-establishing some of the original range of 60 million acres will improve water quality, provide critical habitat for wildlife, and help sequester greenhouse gases. As of April 30, 2011, 103,000 acres were enrolled.
- The Farmable Wetlands Program (FWP) is allowed to restore up to 1,000,000 acres of farmable wetland and associated buffers by improving the land' hydrology and vegetation through CRP. Eligible lands types authorized include certain cropped wetlands, former commercial aquaculture, flooded land located in the prairie pothole region, and constructed wetlands to receive flows from row crop drainage systems. As of April 30, 2011, there were 274,000 acres enrolled.

CEPD, USDA.

- The Bottomland Hardwood initiative works to improve air quality and water quality as well as increase wildlife habitat along wetland areas. As of April 30, 2011, there were 61,000 acres enrolled.

Other CRP Initiatives

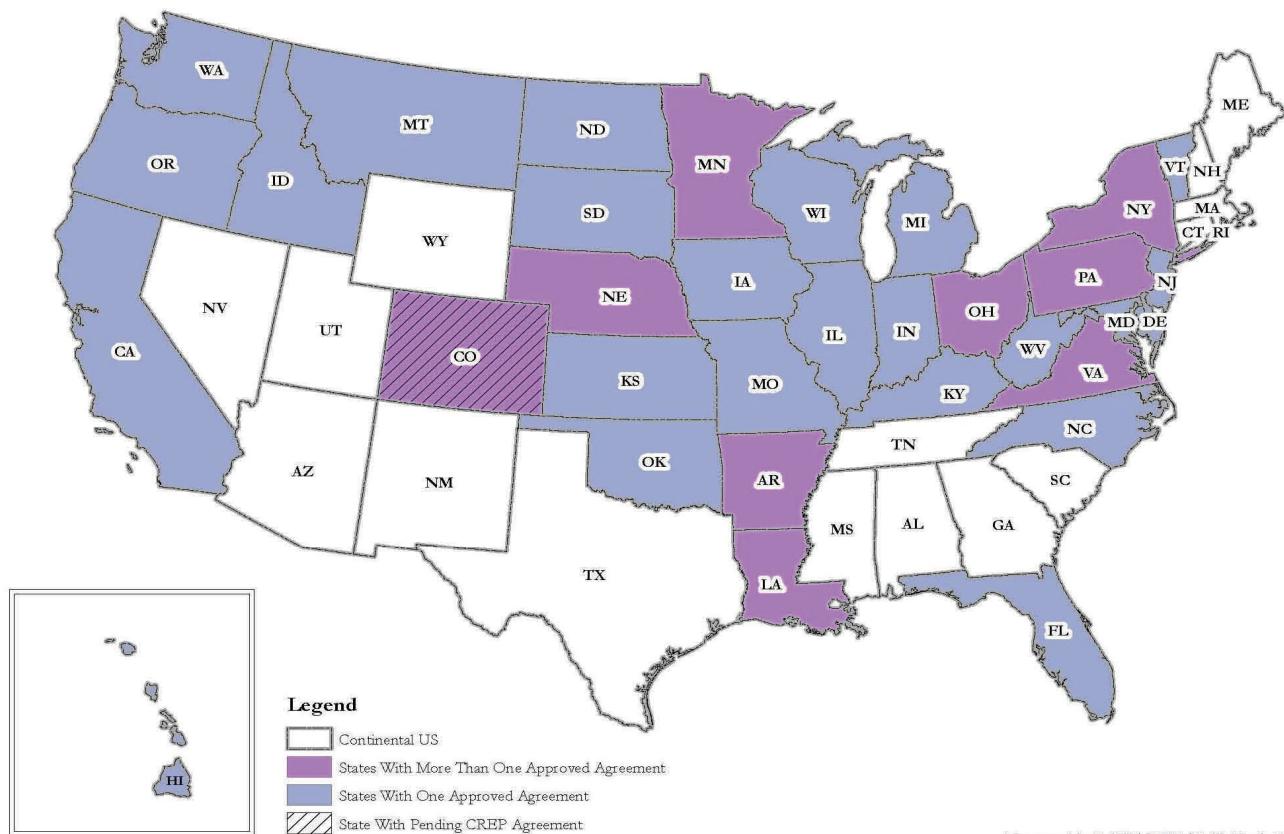

Conservation Reserve Enhancement Program

The Conservation Reserve Enhancement Program (CREP) is a continuous CRP signup program. It is voluntary and helps agricultural producers protect environmentally sensitive land, decrease erosion, restore wildlife habitat and safeguard ground and surface water. The program is a partnership among producers, tribal, State, and Federal Governments, and, in some cases, private groups.

CREP includes targeted conservation practices such as filter strips and riparian buffers. These conservation practices help protect streams, lakes, and rivers from sedimentation and agricultural runoff.

As of April 30, 2011, there were 1.2 million acres enrolled in 45 CREP projects in 33 States.

Conservation Reserve Enhancement Program States

About the Farm Service Agency's Conservation and Environmental Programs Division (CEPD):

The U.S. Department of Agriculture Farm Service Agency's Conservation and Environmental Programs Division serves the nation's agricultural producers, providing assistance and opportunities for producers to voluntarily invest in safeguarding environmentally sensitive lands.

The Division implements multiple diverse programs that help accomplish these goals, including the following programs:

- Biomass Crop Assistance Program
- Conservation Reserve Program
- Conservation Reserve Enhancement Program
- Emergency Forest Restoration Program
- Emergency Conservation Program
- Farmable Wetlands Program
- Grassland Reserve Program
- Source Water Protection Program
- Voluntary Public Access and Habitat Incentive Program
