

Window Stickers: A Guide to Vehicle Safety

If you're shopping for a new car, this sticker should look familiar. But, beginning with 2012 models, you'll see star ratings from the new 5-Star Safety Ratings System. It's simple—*More Stars. Safer Cars.* Five stars is the highest safety rating, one is the lowest.

NHTSA: At the forefront of safety.

For more than 30 years, the National Highway Traffic Safety Administration (NHTSA) has been crash testing vehicles to ensure your safety. We've raised the bar once again by introducing a rigorous, new standard for measuring vehicle safety. New safety ratings for a sample of 2011 models will be available at SaferCar.gov, but not displayed on window stickers until 2012.

The window sticker will display either stars or description ratings to communicate the new test results.

5-Star Safety Ratings
More Stars. Safer Cars.

GOVERNMENT SAFETY RATINGS

Frontal Crash	Driver	★★★★★
	Passenger	★★★★★

Star ratings based on the risk of injury in a frontal impact. Frontal ratings should ONLY be compared to other vehicles of similar size and weight.

Side Crash	Front seat	★★★★★
	Rear seat	Not Rated

Star ratings based on the risk of injury in a side impact.
▲ Safety concern: Visit www.safercar.gov or call 1-888-327-4236 for more details.

Rollover		★★★★★
-----------------	--	-------

Star ratings based on the risk of rollover in a single vehicle crash.

Star ratings range from 1 to 5 stars (★★★★★) with 5 being the highest.
Source: National Highway Traffic Safety Administration (NHTSA).

Did you know?

1. Every new vehicle sold in the United States must display a window sticker known as the Monroney label.
2. The Monroney label contains a variety of information about the vehicle, including a section that displays 5-Star Safety Ratings.
3. These ratings tell you how the vehicle performed in NHTSA's 5-Star Safety Ratings tests, including a full-frontal crash test, a side crash test, and a rollover test.
4. Since the new and old ratings are based on different test conditions, test dummies, and injury criteria, 2010-prior ratings and 2011-future ratings **should not** be compared.
