

US Army Corps of Engineers

Institute for Water Resources

BUILDING STRONG®

Recapitalization and support for Asset Management (2011)

Status: Completed

Purpose: Asset management and recapitalization work, this will provide a foundation to effectively manage the recapitalization of the Corps infrastructure on a consistent, national basis across B-L's and with extensive applications on the CW program that are both programmatically sound and fiscally responsible. A full range of investment decision outcomes would manifest from the framework.

Objective: 1. To provide assistance to the asset management program at headquarters 2. To move the recapitalization effort forward and integrate with existing IWR efforts

Benefits: To link asset management efforts with the recapitalization program (and associated efforts at IWR) to improve the Corps' water resources infrastructure for the nation.

Progress: In process, had a kick off meeting on June 7th with HQ AM manager and IWR personnel. IWR is working on PMP and getting contracts in place.
