Community Issues Identified in 2006

- Environmental issues
- Access to information
- Area development issues
- Schedule of cleanup program

Do these still reflect community concerns? Any new ones?

Philadelphia District
US Army Corps of Engineers

Topics of Discussion - Recent RAB Meetings – 2008 and 2009

Contamination

- Uranium contamination
- Municipal wells – distance and sampling/monitoring of them
- DuPont pumping and affect on FUSRAP monitoring wells
- Half lives and mobility of radionuclides

Philadelphia District
US Army Corps of Engineers

Topics of Discussion - Recent RAB Meetings - 2008 and 2009

Feasibility Study

- Soil volumes and location of considered disposal facilities
- Transportation safety (rail) and long term integrity of disposal facilities
- Climate change and leaving waste in place
- Long-term monitoring

Philadelphia District
US Army Corps of Engineers

Community Involvement Activities This Year

- Community Newsletter, *The Bulletin*
- Continue to identify community issues and concerns
- Enhance project information on FUSRAP Website
- Coordinate with local officials and interested groups

Philadelphia District
US Army Corps of Engineers

Community Newsletter

- Winter 2009 edition
- Present overview of RI and risk assessment reports
- Re-evaluate mailing list – encourage email distribution

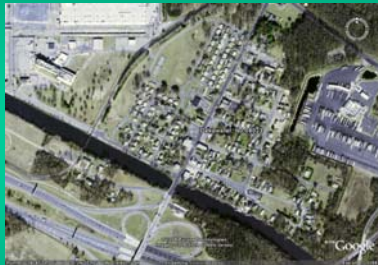

to improve community access to information and increase the community's involvement in CERCLA process.

US Army Corps of Engineers

Community Involvement Plan Update

- Ongoing initiative to maintain a dialogue with the surrounding communities of:
 - Deepwater
 - Pennsville
 - Penns Grove
 - Carneys Point

The Community Involvement Plan evolves as the environmental cleanup program moves forward.
