

Safety Share -- *Be a Safety Advocate*

To enhance safety and health at all Department of Energy facilities, we are asking that the drivers of larger vehicles (i.e., pickup trucks, SUVs, vans, etc.) refrain from using the end spaces in the interest of safety for all. Because of their size, these vehicles obstruct clear view of the roadway for car drivers as well as pedestrians.

Safety Expects the Unexpected

With the recent reduction in daylight hours, it is even more important for both drivers and pedestrians to be vigilant in their awareness of each other; as a greater opportunity for incidents exists.

In a similar manner, pedestrians should be careful when emerging from around parked vehicles that may obstruct the line of sight for oncoming drivers. Cross at designated areas and look both ways before entering the walkway.

This may seem like a simple request, but it could simply save someone from injury. Lets' work together to remain safe 24/7!

"Safety – around the clock, 7 days a week, 365 days a year!"
