

## Thanksgiving Day: Nov. 22, 2007

In the fall of 1621, the religious separatist Pilgrims held a three-day feast to celebrate a bountiful harvest, an event many regard as the nation's first Thanksgiving. It eventually became a national holiday in 1863 when President Abraham Lincoln proclaimed the last Thursday of November as a national day of thanksgiving. Later, President Franklin Roosevelt clarified that Thanksgiving should always be celebrated on the fourth Thursday of the month to encourage earlier holiday shopping, never on the occasional fifth Thursday.

### 272 million

The preliminary estimate of turkeys raised in the United States in 2007. That's up 4 percent from 2006. The turkeys produced in 2005 together weighed 7.2 billion pounds and were valued at \$3.2 billion. Source: USDA National Agricultural Statistics Service <<http://www.nass.usda.gov/>>

## Weighing in With a Menu of Culinary Delights

### 46 million

The preliminary estimate of turkeys Minnesota expects to raise in 2007. The Gopher State is tops in turkey production. It is followed by North Carolina (39 million), Arkansas (31 million), Virginia (21.5 million), Missouri (21 million) and California (16.8 million). These six states together will probably account for about two-thirds of U.S. turkeys produced in 2007.

### 690 million pounds

The forecast for U.S. cranberry production in 2007, essentially unchanged from 2006 and 11 percent more than 2005. Wisconsin is expected to lead all states in the production of cranberries, with 390 million pounds, followed by Massachusetts (180 million). New Jersey, Oregon and Washington are also expected to have substantial production, ranging from 18 million to 52 million pounds.

## 1.6 billion pounds

The total weight of sweet potatoes — another popular Thanksgiving side dish — produced by major sweet potato producing states in 2006. North Carolina (702 million pounds) produced more sweet potatoes than any other state. It was followed by California (381 million pounds). Mississippi and Louisiana also produced large amounts: at least 200 million pounds each.

## 1 billion pounds

Total pumpkin production of major pumpkin-producing states in 2006. Illinois led the country by producing 492 million pounds of the vined orange gourd. Pumpkin patches in California, Ohio and Pennsylvania also provided plenty of pumpkins: Each state produced at least 100 million pounds. The value of all the pumpkins produced by major pumpkin-producing states was \$101 million.

If you prefer cherry pie, you will be pleased to learn that the nation's forecasted tart cherry production for 2007 totals 294 million pounds. Of this total, the overwhelming majority (230 million) will be produced in Michigan.

## \$9.5 million

The value of U.S. imports of live turkeys during the first half of 2007 — 99.5 percent from Canada. Our northern neighbor accounted for all of the cranberries the United States imported (\$2.2 million). When it comes to sweet potatoes, however, the Dominican Republic was the source of 63 percent (\$1.7 million) of total imports (\$2.7 million). The United States ran a \$4.9 million trade deficit in live turkeys during the period but had surpluses of \$9.4 million in cranberries and \$15.3 million in sweet potatoes.
