

# ASIST Feedback from Fort Bliss Participants:

I feel it better prepared me to handle a suicide intervention scenario.

Outstanding & Great Workshop

Everyone is at risk, the more people are trained, the more people can assist and identify people who need help.

I would recommend ASIST because I would want someone to be prepared to handle dealing with me if I need help.

After dealing with very serious experiences in suicide, I am glad there is a class to teach Suicide Intervention.

This information can aid anyone in life.

It opens people's eyes up to stop stereo typing people just because they are suicidal.
