

OPTN / UNOS Transplant Coordinators Committee

Interim Report

December 28, 2010

Old Business

The Thoracic Proposal to Clarify Adult Heart Status IA was presented again (as there were several unanswered questions when first presented in November) and members voted in support: 8:0:0.

New Business

Stacey Burson then provided a Tutorial to show how to access and use the Online Help Documentation in UNetSM.

It was noted that there is help documentation available for the Secure Enterprise home page, where you can only access help information pertaining to the Secure Enterprise homepage. You will need to access the WaitlistSM, DonorNet®, and Tiedi® applications from the Secure Enterprise Homepage for online help documentation specific to their purpose and functionality.

To access the online help documentation for the Secure Enterprise Home page and each of the applications in UNetSM, you can select the “Help” link on the home page for each application and the Secure Enterprise home page, then select “Online Help,” or click on the question mark at the top of the page. An online help home page will appear for each application or Secure Enterprise, based on your selection. Help topics for the application content will appear on the left-hand side of the online help home page. However, if you do not see what you are looking for, you can use the search feature.

The next Live Meeting is tentatively scheduled for Tuesday, January 25th, 2011.
