During ROADCON **RED** and **BLACK**, AFN TV will post a crawl message informing viewers.

Definitions and Rules of Engagement

Color coded road conditions are based upon road conditions on individual KMC installations and are **NOT** to be used to determine road conditions in your local off-base area.

ROADCONs will be determined individually for each installation by Installation/Garrison Commanders or their designated representatives.

In ROADCON **Black**, installations are closed and POVs should not be on the roads on the installation.

In ROADCON **Red**, commanders will determine which military and Local National personnel are mission-essential and may initiate early release or delayed reporting based upon local mission requirements and individual circumstances. The 86 AW/CC, in consultation with other DOD Agencies in the KMC, will determine early release or delayed reporting for US and Non US Air Force civilian employees.

To allow for adequate time to complete notifications and ensure school bus accommodations for DoDDS:

- **Late reporting and closure decisions** are normally made no later than 0430hrs
- **Early release decisions** are normally made by 1030hrs

School buses often have difficulty transiting some areas and low temperature may be dangerous to children waiting at bus stops. Plan accordingly.

Army organizations and tenants on Army installations should notify USAG-K DPTMS EOC of any changes in operating status (closure, service reduction, etc).

Air Force organizations and tenants on AF installations should notify 86 AW Command Post of any changes in operating status (closure, service reduction, etc).

Winter Driving Conditions

GREEN

Road conditions are normal.

AMBER

Normal to dangerous. Drivers should exercise additional precautions. Most installation operations and services should be open, but changes in weather could lead to late reporting or early release.

RED

Road conditions are hazardous. GOV use off base/post is limited to emergency and mission-essential driving. POV use discouraged. Probable late reporting or early release of personnel and closure of services.

BLACK

Road conditions are hazardous to extremely hazardous. GOV use off base/post is at the discretion of the owning commander. POVs should not be on the road. Installations will be closed.
