

H. ROBERT MOORE

Environmental Scientist
Environmental Science Division
Argonne National Laboratory

Education:

B.S. University of Montana, Forest Management and Engineering, 1955

Professional Experience:

1995-Present Environmental Scientist

Environmental Science Division

Argonne National Laboratory

Provides information and analyses for the development of natural resource management and land use strategies, processes, and documentation. Recommends EVS courses of action related to proposals and provides detailed requirements to implement recommendations. Conceives new program opportunities and recommends related changes in Division program activities. Represents the Division and Laboratory to sponsors, reviewers, federal and state organizations, and to the technical community.

Summary of Previous Experience:

U.S. Bureau of Land Management (BLM)

1990-1995 State Director, Colorado

1986-1990 Service Center Director, BLM

1981-1986 Associate State Director, Colorado BLM

1978-1981 Assistant Director for Coal Management, BLM

1955-1978 Forester, Engineer, Program Analyst, and Planning and Environmental Manager

As State Director, led 600 people in all facets of public administration of natural resources on 8.3 million surface acres and 27 million acres of subsurface mineral estate. A significant accomplishment was to shift the emphasis from traditional program development and commodity production to managing at the landscape level for healthy, sustainable natural systems. As Service Center Director, directed an organization to provide technical and administrative services, financial management, natural resources expertise, and automation support for BLM nationwide.
