- Indicates the milestone is in progress
- **✓** Indicates the milestone is complete
- X Indicates the milestone is canceled

<sup>&</sup>lt;sup>1</sup> The PAM team was informed that FMS would not be conducting a DR exercise during 2010 due to the amount of work that would be required to prepare for the exercise and considering that PROC functions will be relocated to BPD by year-end 2011. This is expected to impact PAM C&A as a finding that a DR exercise was not conducted this year. The IR group is drafting wording to explain the decision not to conduct a DR exercise this year.

<sup>&</sup>lt;sup>2</sup> The actual transition of each agency, and training for end users, will be phased in over several months now that the implementation of PR 3.0 has been completed. Specific timeframes for transition activities were approved by the Directors in November and was subsequently revised to accommodate release 3.0.10.

<sup>&</sup>lt;sup>3</sup> Based on the availability of SAIC resources, independent testing was not completed until early October. As a result, official Comment Resolution activities were not completed until December. There were no significant findings identified during testing such that these results were used for obtaining the Authority to Operate (ATO) in advance of the planned implementation. In addition, the Interdependency Analysis will be completed in O1.

<sup>&</sup>lt;sup>4</sup> Due to additional scope items being added to PR 3.1, the scope document was re-evaluated at the request of the MSG and subsequently approved following the September meeting. In addition, a revised target date of 9/22 was established and achieved for PR 3.1 requirements, and did not impact PR 3.1 development.

<sup>&</sup>lt;sup>5</sup> Based on the PR 3.1 Scope Document approved by the MSG, there are no new interfaces currently planned for this release.

<sup>&</sup>lt;sup>6</sup> The PR 4.0 Scope Document was drafted in September and approved at the December MSG meeting.

<sup>&</sup>lt;sup>7</sup> FMS is pursuing an alternative to CCRC, the Xen product, and is working to address PAM requirements. In addition, the ROC relocation and other IT strategic efforts are expected to delay repository transition efforts beyond PR 3.1. No timeline for Xen efforts has been shared with the PAM project.
