MEMORANDUM FOR: SUPPLY PRC MEMBERS

SUBJECT: Approved DLMS Change 53A, Addendum for Revision to DLMS
Supplement (DS) 869F, Requisition Follow-up (Supply)

This change to the DoD 4000.25-M, Defense Logistics Management System (DLMS), revises the DS 869F to correct an oversight and improve the data mapping for consistency among like transactions. The updated DS will be posted to the DLMSO web site (<http://www.dla.mil/j-6/dlms0/ICs/Default.htm>) within 30 days from the above date for implementation planning. DLMSO will concurrently pursue coordination/approval with the DoD Logistics Functional Working Group, the DoD Electronic Data Interchange Standards Management Committee (EDISMC), and the Federal EDI Standards Management Coordinating Committee (FESMCC) for Federal implementation convention (IC) revisions.

Addressees may direct questions to the DLMSO points of contact, Ms. Ellen Hilert, Co-Chair, Supply Process Review Committee, 703-767-0676, DSN 427-0676, or email: ellen_hilert@hq.dla.mil or Ms. Vermella Saváge, DoD MILSTRIP System Administrator, 703-767-0674, DSN 427-0674, or e-mail: vermella_savage@hq.dla.mil. Others must contact their Service or Agency designated representative.

Approved DLMS Change 53A Addendum for Revision to DS 869F, Requisition Follow-up

1. ORIGINATOR:

Sponsor: Supply Process Review Committee, Ellen Hilert, Co-Chair, DLA J673, Defense Logistics Management Standards Office (DLMSO), 703-767-0676 (DSN 427), ellen_hilert@hq.dla.mil

2. FUNCTIONAL AREA: Supply

3. REQUESTED CHANGE:

a. Title: Addendum for Revision to DS 869F, Requisition Follow-up

b. Description of Change: This change modifies the DS to substitute a more appropriate qualifier for identification of the “To” activity (eliminating confusion) and to incorporate a requirement for identification of a forwarding activity.

c. Procedures: Revise DLMS Supplements as indicated.

#	Location	Revision	Reason	Federal IC
1	2/N101/110	<p><u>Delete qualifier Z4.</u></p> <p><u>Add the following qualifiers and associated notes:</u></p> <p>Z8 Last Known Source of Supply DLMS Note: Use to identify the supply source to receive the transaction set.</p> <p>ZL Party Passing the Transactions DLMS Note: Use to identify the processing point passing the requisition followup to another supply source for continued processing.</p>	<p>The IC/DS currently use Z4 to identify the owning ICP. The revision to use Z8 (instead of Z4) is consistent with the DLMS/DLSS procedures and similar mapping in the 869A.</p> <p>The addition of ZL is required to correct an oversight. This requirement is consistent with current functionality and supports conversion to the DLSS.</p>	Requires a Federal IC change to retain consistency with the DS.

d. Alternatives: None identified.

4. REASON FOR CHANGE: The use of the Z4 qualifier as the activity to which the transaction is forwarded was questioned during conversion testing because it is inconsistent with the 869A mapping and because the current DLSS procedures state that the transaction is to be forwarded to the “last known supply source” which is best

identified by qualifier Z8. In order to eliminate confusion, it was believed to be better to correct the mapping to use the most appropriate Z8 qualifier, before widespread implementation. Additionally, while this issue was being reviewed, DLMSO identified a gap in the required functionality. Specifically, the procedures provide for the requisition followup to be forwarded to another supply source. The IC/DS does not allow for identification of this processing point, so an additional qualifier (ZL) has been added.

5. ADVANTAGES AND DISADVANTAGES:

- a. **Advantages:** Supports DLMS implementation.
- b. **Disadvantages:** Requires mapping changes.

6. IMPACT:

- a. **Publications.** Corresponding Federal IC.
- b. DAAS DLMS/DLSS conversion maps will be updated as required.
