MEMORANDUM FOR: SUPPLY PROCESS REVIEW COMMITTEE (PRC) MEMBERS

SUBJECT: Approved DLMS Change 9.5, Revision to DLMS Supplement (DS) 870S, Supply Status, for Unit of Issue (UI) (Supply)

The attached change to DOD 4000.25-M, Defense Logistics Management System (DLMS), is approved for implementation. This change is required to support continued operations in a DLMS/DLSS/DLSS-like environment. The updated DLMS Supplement will be posted to the DLMSO web site (<http://www.dla.mil/j-6/dlms/ICs/Default.htm>) within 30 days from the above date for implementation planning.

The attached change to DLMS will be incorporated into the DLMS manual/supplement, based upon the effective or availability date to be determined. DAAS and DLA have advance authorization to employ these procedures under Business Systems Modernization (BSM); however, configuration management/version control procedures must be observed allowing for sequential implementation to prevent rejection.

Addressees may direct questions to the DLMSO points of contact, Ms. Ellen Hilert, Chair, Supply Process Review Committee, 703-767-0676, DSN 427-0676, or e-mail: ellen_hilert@hq.dla.mil or Ms. Vermella Savage, DOD MILSTRIP System Administrator, 703-767-0674, DSN 427-0674, or e-mail: vermella_savage@hq.dla.mil. Others must contact their Component designated representative.

JAMES A. JOHNSON
Director
Defense Logistics Management
Standards Office

Approved DLMS Change 95
Revision to DS 870S, Supply Status, for UI

1. ORIGINATOR:

a. Service/Agency: DLMSO

b. Sponsor: Supply PRC, Chair: Ellen Hilert, DLA J-673, Defense Logistics Management Standards Office (DLMSO), 703-767-0676 (DSN 427), ellen_hilert@hq.dla.mil

2. FUNCTIONAL AREA: Primary: Supply

3. REFERENCE: DoD 4000.25-1-M, MILSTRIP

4. REQUESTED CHANGE:

a. Title: Revision to DS 870S, Supply Status, for UI

b. Description of Change: This revision incorporates additional qualifiers with DLMS notes to support a mixed DLSS/DLMS environment. The primary purpose of this change (items 5 and 6 below) is to add the capability to identify a second unit of issue (UI) within selected supply status transactions. Under MILSTRIP, the Supply Status transaction for Reject Status CE tells the customer both the originally requested UI and the correct UI for the material. This change supports the CE status as defined in MILSTRIP. In addition, this change highlights numerous administrative corrections, clarifications and updates to make this DS consistent with other more recently updated DLMS Supplements.

c. Procedures:

Revise DS 870S, Order Status Report (Supply Status) as follows:

#	Location	Revision	Reason	Federal IC
1.	DLMS Introductory Notes	<u>Add the following DLMS note 3e:</u> <i>e. Repetition of data (using multiple iterations or loops) which is not compatible with existing DLSS capability. Although supported by the use of the ANSI X12 standard, such data is not compatible with DLSS/DLMS conversion and may not be supported by the recipient's automated processing system. Components must coordinate implementation of enhanced capability with DLMSO prior to use.</i>	Add new clarification restricting use of ANSI functionality for data repetition	No Change required

2.	DLMS Introductory Notes	<p><u>Add new DLMS note 4 along with adding title of applicable ADCs:</u></p> <p>4. This revision to the DLMS Supplement (DS) incorporates Approved DLMS Changes (ADCs) listed. ADCs are available from the DLMSO website: http://www.dla.mil/j-6/dlms/Changes.</p> <p>- ADC 77, Air Force Unique Management Coding for Materiel Management Aggregation Code (MMAC) - ADC 95, Revision to DLMS Supplement (DS) 870S, Order Status Report (Supply Status) for UI.</p>	Update. To stay consistent with all DLMS Supplements	No Change required
3.	2/PO106/150	<p><u>Revise DLMS note to read the following:</u></p> <p>Use one of codes A1, A2, A4, FB, FS, FT, MG, YP or ZZ to identify the material which will be provided as indicated by the status code. Must use the National Stock Number (NSN) when known, except when appropriate brand name subsistence items are identified by the Subsistence Identification Number.</p>	Note provides additional functionality.	No change required to Federal IC
4.	2/PO106/150	<p><u>Add the following qualifier with DLMS note:</u></p> <p>ZZ – Mutually Defined</p> <p>Use to identify nonstandard material when all other authorized codes do not apply (includes management control numbers and locally assigned control numbers). May be used for DLSS-to-DLMS conversion when the translator cannot determine a more appropriate code.</p>	Update. To stay consistent with all DLMS Supplements.	Federal update required
5.	2/PO108/150	<p><u>Add the following qualifier with DLMS note:</u></p> <p>MB - Measurement Type Code</p> <p>1. Use to identify the original requested unit of issue associated with the status provided.</p> <p>2. Use in next available product/service pair. An ANSI data maintenance action will be taken to obtain a more appropriate code for use in a future version/release.</p>	Under MILSTRIP, the Supply Status transaction for Reject Status CE tells the customer both the originally requested UI and the correct UI for the material. This change supports the current functionality to identify the original UI. The correct UI is already provided in the DLMS.	Federal update required
6.	2/PO110/11/150	<p><u>Open next set of product service pairs.</u></p>	It may be necessary to use the next available pair if CE status applies to a requisition already employing a part number and CAGE codes to identify the material.	Federal update required

7.	2/LQ01/330	<p><u>Add the following qualifier with DLMS note:</u></p> <p><i>GQ – Group Qualifier Code</i></p> <p><i>Federal Note: Use to identify the Materiel Management Aggregation Code (MMAC).</i></p> <p><i>DLMS Note: Use to identify the MMAC for NSNs to be managed by a specific manager (i.e., system, program, aggregation, selected FSC, technology group). This is an Air Force unique data element, meaningful to the Air Force only. Non-Air Force Components perpetuate without action. An ANSI data maintenance request has been prepared to request a new data element 1270 code qualifier assignment for the MMAC. The code source is identified as the Air Force Manual (AFMAN) 23-110, Volume 1.</i></p>	<p>This qualifier is a primary data element for Air Force requisition processing. (See ADC 77.)</p>	<p>Federal update required</p>
----	------------	--	---	--------------------------------

d. Alternatives: None

5. REASON FOR CHANGE: This change is provided to support continued operation in a mixed DLMS/DLSS environment. RE the specific change for UI: The correct UI is already provided in the DLMS transaction. However, the original requested UI was not included under the DLMS “streamlining” concept, whereby data elements resident in the originators supply system would not be perpetuated in follow-on transactions. Due to the requirement for continued support of existing MILSTRIP functionality during the transition phase, previously streamlined data elements are reinserted.

6. ADVANTAGES AND DISADVANTAGES:

a. Advantages: Supports DLMS implementation

b. Disadvantages: None identified

7. IMPACT:

a. Publication(s): Federal Implementation Conventions 870S and corresponding DOD 4000.25-M DLMS Supplement.
