Administrative Changes to Eliminate Override Procedures for DLMS Supplements 812L, Logistics Bill Adjustment Request Reply and 812R, Logistics Bill Adjustment Request (Finance)

1. ORIGINATOR:

- a. **Service/Agency:** Defense Logistics Management Standards Office (DLMSO)
- b. **Originator:** DLMSO, DSN 427-2117

2. FUNCTIONAL AREA: Finance

3. REQUESTED CHANGE:

- a. **Description of Change:** This administrative change does not impact any implemented procedures in DLMS or MILS. This change modifies the 812L and 812R DLMS Supplements to clearly identify as an enhancement (not approved for current use) the use of Table 1 Code Source Information in cases where the Agency code is applicable to all Table 2 iterations. This change also removes the use of override procedures for Code Source information, as override is no longer recognized as recommended procedure.
- b. **Procedures:** Revise 812L and 812R DLMS Supplements as follows:

1.	DLMS Introductory Notes	<u>Added new DLMS introductory note 5:</u> - ADC 275, Administrative Changes to Eliminate Override Procedures for DLMS Supplements 812L, Logistics Bill Adjustment Request Reply and 812R, Logistics Bill Adjustment Request (Finance)	To identify changes in the DLMS Supplement and for consistency with other Supplements
2.	1/LM/155	<u>Revise as follows:</u> Federal Note: <i>Use this 1/LM/155 loop to identify Agency unique data when any specific LQ01 qualifier code (e.g., 0) applies to ALL table 2 iterations and the same LQ02 Agency code applies to all or most of the table 2 iterations. For any specific table 2 iteration where the Agency code is to differ from the one indicated in table 1, use the 2/LM/205 loop and specify the matching qualifier in LQ01 and the different Agency code in LQ02. The code will override the table 1 Agency code for the current table 2 iteration. Do not cite any qualifier code in 1/LQ/156 that does not apply to all the table 2</i>	Identifies use of this loop as an enhancement (not approved for current use) and removes use of override procedures

3.	2/LM/205	<p>Revise as follows:</p> <p>Federal Notes:</p> <p><i>For any specific table 2 iteration, use this 2/LM/205 loop as needed 1) to identify an Agency code when the LQ01 qualifier code does not apply to all table 2 iterations and therefore was NOT indicated in the 1/LM/155 loop or 2) to identify an Agency code when the LQ01 qualifier applies to all table 2 iterations but the LQ02 Agency code varies among most of them or 3) to override an LQ02 Agency code in the 1/LM/155 loop with a different Agency code in the 2/LM/205 loop when the same LQ01 qualifier is used in both loops but the LQ02 Agency code is different. (Codes subject to override: 0, A9, DE, and DG.)</i></p> <p><u>Enhancement not approved for current use. When the 1/LM/155 loop is used to identify an Agency code applicable to all table 2 iterations, do not use 2/LM/205.</u></p>	Identifies procedures for use of this loop when 1/LM/155 loop is used as a future enhancement (not approved for current use), and removes use of override procedures

5. ADVANTAGES and DISADVANTAGES:

a. Advantages:

- i. For 812L and 812R, clearly identifies as an enhancement (not approved for current use) the use of Table 1 Code Source Information in cases where the Agency code is applicable to all Table 2 iterations.
- ii. Removes the use of override procedures for Code Source information, as override is no longer recognized as recommended procedure.

b. Disadvantages: None.

6. IMPACT: DOD 4000.25-M and DLMS 812L and 812R DLMS Supplements.
