

# 940 Warehouse Shipping Order

---

## Functional Group=OW

---

**Purpose:** This Draft Standard for Trial Use contains the format and establishes the data contents of the Warehouse Shipping Order Transaction Set (940) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to enable the depositor to advise a warehouse to make a shipment, confirm a shipment, or modify or cancel a previously transmitted shipping order.

### Federal Note:

- 1. DoD Inventory Control Points/Integrated Materiel Managers (ICP/IMM) use this transaction to communicate with the storage activities holding the accountable record for ICP/IMM-owned materiel. The ICP/IMM may apply job order protection values and request re-warehousing of materiel prior to sale via this transaction.*
- 2. DoD industrial activity/maintenance sites use this transaction to communicate with the storage activities holding the accountable record for materiel prior to or at the time of purchase. The maintenance site may provide instructions for staging and picklist/call-out of the materiel via this transaction. In addition, the maintenance site (where authorized) may request an intra-Component ownership transfer of materiel in storage.*
- 3. Use a single occurrence of this transaction set to exchange a single or multiple transactions between identified organizations.*
- 4. DoD logistics users should refer to the Defense Logistics Management System (DLMS) Supplement to the Federal Implementation Convention (IC) available at URL: <http://www.dla.mil/j-6/dlms>. The DLMS Supplement provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.*

### DLMS Note:

- 1. Transaction structure:*
  - a. This transaction is designed for maximum flexibility using inherent looping capability to support multiple re-warehousing, staging or picklists service requests per transaction set. Each individual service request is considered a distinct transaction within the transaction set. However, only one type of service, e.g., re-warehousing, staging, or picklist, may be requested per transaction set.*
  - b. Summary or header data which are constant for the entire transaction set is identified once in the transaction set header (table 1).*
  - c. Each individual re-warehousing, staging, picklist, or ownership transfer service request transaction included in the transaction set is defined by a single iteration of the transaction detail (table 2).*
  - d. Each transaction may identify a single or multiple document numbers, with applicable materiel identification and other associated values, as a nested loop within the transaction detail.*
  - e. The transaction is designed so that data applicable to all the included document numbers is identified only once per transaction. Data content which differs by document number is identified at the document number level.*
- 3. Users operating under the Defense Logistics Management System (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table which can be found on the Defense Logistics Management Standards Web site at <http://www.dla.mil/j-6/dlms>.*
- 4. This DLMS Supplement to the Federal 940S implementation convention contains data associated with a DLMS enhancement authorized for implementation by modernized systems under DLMS migration. This data (including expanded field sizes) should be adopted during, or subsequent, to modernization when applicable to the Component's business process.*
- 5. This DS incorporates Proposed DLMS Changes (PDC) and Approved DLMS Changes (ADC) listed. PDC/ADCs are available from the DLA Logistics Management Standards Web site: <http://www.dla.mil/j-6/dlms/elibrary/Changes/processchanges.asp>*

# LQ Industry Code

Pos: 1900	Max: 100
Detail - Mandatory	
Loop: 0331	Elements: 2

**User Option (Usage):** Must use

**Purpose:** Code to transmit standard industry codes

## Syntax Rules:

1. C0102 - If LQ01 is present, then LQ02 is required.

## Federal Note:

*Use multiple occurrences to identify codes, as appropriate, consistent with management information requirements.*

## Element Summary:

LQ01	1270	Code List Qualifier Code	O	ID	1/3	Used

**Description:** Code identifying a specific industry code list

**Federal Note:** Use any code.

**DLMS Note:** For DLMS use, only the following codes are authorized.

**CodeList Summary** (Total Codes: 769, Included: 8)

### Code Name

83 Supply Condition Code

**DLMS Note:**

*Use to identify the condition of the materiel applicable to the requested action.*

98 Reason for Requisitioning Code

**DLMS Note:**

*Use to identify Reason for Requisitioning Code used by Naval shipyards specifying use of the materiel requirement. Cite the applicable value in LQ02.*  
*D - Direct Materiel Inventory (DMI)*  
*E - End Use Inventory*  
*M - Mission Support Materiel (MSM)*  
*U - Ripout/courtesy storage*  
*S - Nuclear Shop delivery*

COG Cognizance Symbol

**DLMS Note:**

*Use to identify the materiel cognizance symbol (COG) of the end item. Indicate NSL for non-stock numbered listed items. This is a Navy-unique data element meaningful to Navy only; Non-Navy Components are to perpetuate without action.*

EWC Evaluate Work Candidate Lookup

**DLMS Note:**

*Use to identify Requirement Churn Reason to identify materiel orders required by the industrial site to complete planned work above what was originally identified during the pre-planned process, ordered and delivered after the start of the availability.*

IMC Item Management Code

**DLMS Note:**

**Code Name**

*Use to identify the Item Management Code (IMC) for integrated materiel management. This is a Navy-unique data element meaningful to Navy only; Non-Navy Components are to perpetuate without action.*

SMC Special Materials Content Code

**DLMS Note:**

*Implementation Note: This is an X12 Migration Code approved for use in Version 4060. Implementers must manual update 4030 software to recognize this code.*

*2. This code applies to Navy Managed items only and is referred to as the Haz Mat Indicator within the Navy system (MAT).*

SMI Special Material Identification Code

**DLMS Note:**

*Use to identify the Special Materiel Identification Code (SMIC) for an end item. This is a Navy-unique data element meaningful to Navy only; Non-Navy Components are to perpetuate without action.*

# LE Loop Trailer

Pos: 2850	Max: 1
Detail - Mandatory	
Loop: LS	Elements: 1

**User Option (Usage):** Used

**Purpose:** To indicate that the loop immediately preceding this segment is complete

## Semantics:

1. One loop may be nested contained within another loop, provided the inner nested loop terminates before the other loop. When specified by the standards setting body as mandatory, this segment in combination with "LS", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop beginning segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.

## Comments:

1. See Figures Appendix for an explanation of the use of the LE and LS segments.

## Federal Note:

*Must use with every occurrence of the LS segment. Use of this segment prevents collision of segments.*
