Broadband and persistent access to the web is a must if we are to transform education. If schools are to embrace rich media content and innovate to allow students to learn anywhere, anytime, they must provide for enough bandwidth to support video, audio and live instruction online. To allow for this with multiple concurrent users, they must have broadband access. We support the educational value of having persistent high bandwidth internet access to improve educational outcomes and leverage the advantages of web delivered programs into schools.

Peter Cohen  
CEO, Curriculum  
Pearson
