

National Broadband Plan - Impact upon Technology / Applications and Devices

Robb Topolski

Chief Technologist

NAF, Open Technology Initiative

Innovation Impacts

- A non-discriminatory network that
 - allows the best solutions to emerge naturally
 - does not pick “winners” or “losers”
 - does not require permission to innovate
- A world-leading network as a dev platform, if we’re not leading, we’re doomed to follow
 - we cannot bring forth tomorrow’s killer products from yesterday’s network
