

Linking U.S. Agriculture to the World

Market Access Program

The Market Access Program (MAP) uses funds from the U.S. Department of Agriculture's (USDA) Commodity Credit Corporation (CCC) to aid in the development, expansion, and maintenance of foreign markets for U.S. agricultural commodities and products. The MAP is authorized by Section 203 of the Agricultural Trade Act of 1978, and is administered by USDA's Foreign Agricultural Service (FAS).

The MAP forms a partnership between non-profit U.S. agricultural trade associations, non-profit U.S. agricultural cooperatives, non-profit state-regional trade groups, small U.S. businesses, and USDA's CCC to share the costs of overseas marketing and promotional activities, such as trade shows, market research, consumer promotions, technical assistance, trade servicing, and seminars to educate overseas customers.

How the program benefits U.S. agriculture: Each year, the MAP helps launch and expand sales of U.S. agricultural, fish, and forest products overseas. American farmers, ranchers, and food processors and manufacturers benefit from the MAP. The MAP benefits all regions of the country through increased exports and rural job expansion.

How the program works: The MAP uses funds from the USDA's CCC to cost share foreign market promotion activities with program participants. The Food, Conservation, and Energy Act of 2008, enacted into law in June 2008, set funding for the MAP at \$200 million annually through fiscal year 2012. Each year, USDA announces an application period for participation in the MAP, publishing an announcement in the *Federal Register*. Applicants develop MAP proposals and submit them to USDA as part of the Unified Export Strategy (UES) process, which allows applicants to request funding for various USDA foreign market development programs through a single, strategically coordinated proposal.

MAP applications undergo a competitive review process based on criteria specified in the *Federal Register* announcement. Funds are awarded to applicants that demonstrate effective performance based on a clear, long-term strategic plan. FAS sets a program funding level and signs a program agreement with each participant. Participants must keep an itemized list of expenses incurred during the program year and submit them to FAS for reimbursement. Expenses are subject to audits, and participants are held accountable for maintaining proper documentation.

Agricultural cooperatives and small companies can receive assistance under the brand program. A for-profit firm, other than a cooperative or producer association shall be a small-sized entity that either owns the brand of the agricultural commodity to be promoted or has the exclusive rights to use such brand(s). To conduct branded product promotion activities, individual companies must provide at least 50 percent of funding. MAP regulations limit the promotion of branded products in a single country to no more than five years. For generic promotion activities, trade associations and others must meet a minimum 10-percent match requirement.

Participants are required to certify that federal funds used under the program supplement—not replace—private sector funds.

What commodities are covered: USDA has approved MAP proposals to promote a wide variety of U.S. commodities in almost every region of the world. Among those U.S. food and fiber products are apples, asparagus, canned peaches, fruit cocktail, catfish, cherries, citrus, cotton, dairy products, dry beans, eggs, feed grains, frozen potatoes, grapes, honey, hops, kiwifruit, meat, peanuts, pears, pet food, pistachios, poultry meat, prunes, raisins, rice, salmon, soybeans, strawberries, sunflower seeds, surimi, tallow, tomato products, walnuts, watermelons, and wheat.
