

NOTICE

Kirtland Air Force Base (KAFB) has completed a discretionary Five-Year Review to evaluate implementation and performance of selected remedies for restoration sites in the Environmental Restoration Program (ERP), Environmental Compliance Program (ECP), and the Military Munitions Response Program (MMRP); and to determine if the selected remedy is or will be protective of human health and the environment. Five-Year Reviews are conducted to meet statutory mandate under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) §121(c) and as a matter of Air Force and EPA policy.

Currently, there are a total of 255 restoration sites for ERP and ECP and 32 MMRP sites on KAFB. Each site was evaluated to determine protectiveness, issues, recommendations, and follow-up actions directly related to protectiveness of the remedy. As part of the Five-Year review process, a site inspection was conducted and interviews with the site manager and site personnel were conducted. The Five-Year Review Report has been submitted to EPA Region 6 for review and comment. The Five Year Review Report is available to interested parties and can be found at the Central New Mexico Community College Montoya Campus Library, 4700 Morris NE, Albuquerque; or on the KAFB Web page at www.kirtland.af.mil by entering into "Environmental Issues"; "Public Records"; "Adv. Search"; File #3496. Any comments received from EPA on the report will be made available to the public at the Central New Mexico Community College Montoya Campus Library and on the KAFB website.

Any comments or questions regarding this document can be submitted to KAFB Public Affairs' email address: 377ABW.PA@kirtland.af.mil.
