

Personal Income for Metropolitan Areas for 2008

By David G. Lenze

CURRENT-DOLLAR personal income growth slowed in 2008 in most of the nation's metropolitan statistical areas, according to statistics from the Bureau of Economic Analysis.¹ Personal income growth slowed in 322 metropolitan areas, increased in 42 areas, and remained unchanged in 2 areas. In five metropolitan areas, personal income declined. On average, metropolitan area personal income grew 3.3 percent in 2008, down from 6.0 percent in 2007. In 2008, metropolitan areas accounted for 88 percent of U.S. personal income.

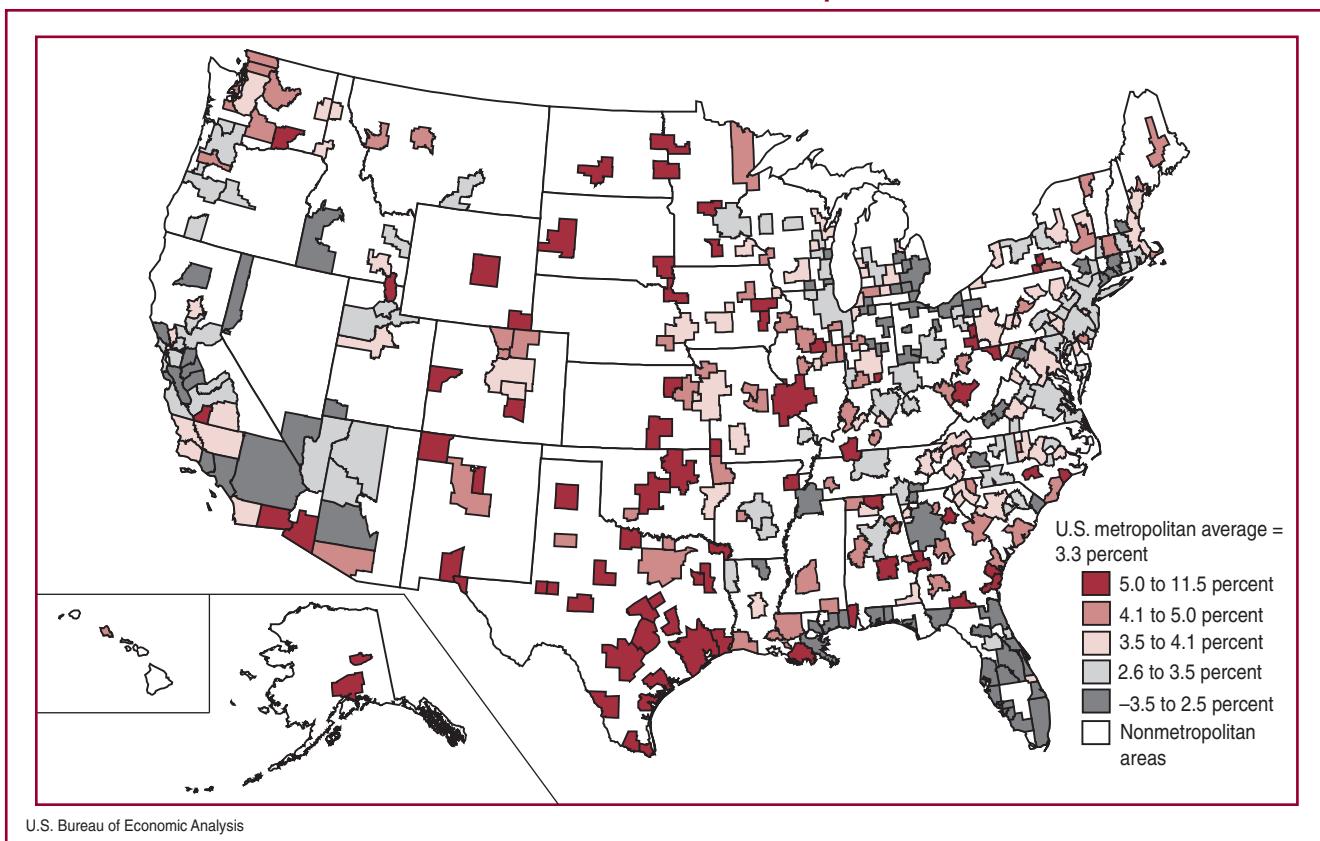

1. Personal income is defined as the income received by all persons from all sources in current dollars. It is the sum of net earnings by place of residence, rental income of persons, personal dividend income, personal interest income, and personal current transfer receipts. Net earnings is earnings by place of work (the sum of wage and salary disbursements, supplements to wages and salaries, and proprietors' income) less contributions for government social insurance plus a residence adjustment to convert earnings by place of work to earnings by place of residence. Personal income is measured before the deduction of personal income taxes and other personal taxes.

Highlights for 2008 include the following:

- Metropolitan areas in the central portion of the United States tended to be in the highest quintiles when ranked by the percent change in personal income, while areas in the bottom quintiles tended to be in the east or west (chart 1).
- Some of the fastest growing areas benefited from high oil prices. In contrast, areas with declining personal income were hit hard by sluggishness in manufacturing.
- Per capita personal income growth in the metropolitan portion of the United States averaged 2.2 percent.
- BEA prepared statistics for three new metropolitan areas designated by the Office of Management and Budget.² All three are relatively small.

2. "Metropolitan Statistical Areas have at least one urbanized area of 50,000 or more population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties.... Metropolitan Statistical Areas are defined in terms of whole counties (or equivalent entities)." See Office of Management and Budget, "Appendix," *Bulletin No. 09-01* (November 20, 2008): 2.

Chart 1. Personal Income Growth Rates in Quintiles for 366 Metropolitan Areas in 2008

Areas with declining personal income or slow growth

Personal income fell in five metropolitan areas in 2008. In four of these areas (Dalton, GA, Monroe, MI, Elkhart, IN, and Kokomo, IN), manufacturing was the major industry contributing to the decline. Personal income also fell in Gulfport, MS; the decline was accounted for by a tapering off in federal payments to rebuild residences destroyed or damaged by Hurricane Katrina. (Such payments made Gulfport the fastest growing metropolitan area in 2007.)

Four of the five slowest growing metropolitan areas with populations of at least 1 million were in the Sunbelt: San Jose, CA, Phoenix, AZ, Jacksonville, FL, and Tampa, FL. The other was in the Midwest: Detroit, MI. Although these areas sustained large declines in compensation in 2008, total personal income in each area increased because of growth in other components of personal income, namely, in transfer receipts and property income. As in the other slowest growing small metropolitan areas (with populations of less than 1 million), the weakness in San Jose, CA, and Detroit was accounted for by manufacturing. In Phoenix, AZ, Jacksonville, FL, and Tampa, FL, construction accounted for the weakness.

Areas with the fastest growth

The fastest growing metropolitan areas in 2008 benefited from the high oil prices of the first half of the year (Midland, TX, Odessa, TX, and Grand Junction, CO) or from the military's "Grow the Force" initiative (Jacksonville, NC, Manhattan, KS, and Hinesville, GA). Personal income grew 9 percent or more in these areas. All are relatively small, with populations of less than 200,000.

Five of the six fastest growing large metropolitan areas were in Texas and Oklahoma. Oil and gas extraction (mining) or construction made important contributions to growth in four of these areas: Oklahoma City, OK, Houston, TX, San Antonio, TX, and Dallas, TX. Austin, the state capital of Texas, had relatively strong growth in the state and local government and the services industries and avoided the declines in retailing and construction that hurt many other metropolitan areas. St. Louis, MO, which ranked third among the fastest growing large areas, owed its strong performance to severance pay and other types of compensation associated with a recent business acquisition.

Per capita personal income

Per capita personal income growth rates ranged from 12.0 percent in Hinesville, GA, to -3.7 percent in Gulfport, MS. Average metropolitan area per capita personal income growth was 2.2 percent. Per capita

personal income growth is a measure that highlights differences in economic conditions across metropolitan areas by removing the effect of differential population growth rates. The labor market conditions previously described account for many areas on either end of the growth-rate range.

In addition, the two Alaskan areas, Fairbanks and Anchorage, had relatively high per capita income growth because of the 98 percent increase in the Alaska Permanent Fund dividend to \$3,269 per person. A portion of oil lease rents and royalties received by the state are deposited in this fund.

The Economic Stimulus Act of 2008 also boosted per capita personal income. Because the income tax rebates authorized by the Act were targeted toward lower income families, the contribution of these rebates to per capita personal income growth varied inversely with per capita incomes. For example, the rebates contributed 1.7 percentage points to personal income growth in McAllen, TX, in 2008 (the metropolitan area with the lowest per capita income in the nation), but the rebates contributed only 0.1 percentage point to growth in Bridgeport, CT, (the area with the nation's highest per capita income).

Other industry highlights

Among industries, health care and state and local governments were the primary sources of personal income growth for the metropolitan portion of the United

Acknowledgments

The advance estimates of personal income for metropolitan areas were prepared by the Regional Income Division under the direction of Robert L. Brown, Chief. Joel D. Platt, Associate Director for Regional Economics, provided general guidance.

Nonfarm compensation statistics were prepared by Tina C. Highfill and Michael G. Pilot under the supervision of Sharon C. Carnevale, Chief of the Compensation Branch. All other components of personal income were prepared by Brian J. Maisano (with assistance from Carrie L. Litkowski and Michelle A. Harder on the farm income components) under the supervision of James M. Zavrel, Chief of the Regional Income Branch. Methodological research and analysis of the estimates were provided by David G. Lenze, Assistant to the Chief of the Regional Income Division. The database and tables were prepared by Gary V. Kennedy, Michael J. Paris, Callan S. Swenson, and Jonas D. Wilson under the supervision of Kathy A. Albetski, Chief of the Regional Economic Information System Branch.

States in 2008 (table A). Each contributed about 0.4 percentage point, about average for the last 3 years. Professional services was the other major contributor to personal income growth, but its contribution of 0.4 percentage point in 2008 was lower than its contribution in the previous 2 years.

Table A. Contribution of Compensation to the Percent Change in Personal Income by Industry for the Metropolitan Portion of the United States

[Percentage points]

| | 2006 | 2007 | 2008 |
|--|-------------|-------------|-------------|
| All industries | 4.13 | 3.67 | 1.59 |

| Utilities | 0.00 | 0.03 | 0.02 |
| Construction | 0.34 | 0.16 | -0.05 |
| Durable-goods manufacturing | 0.31 | 0.13 | -0.08 |
| Nondurable-goods manufacturing | 0.14 | 0.03 | -0.03 |
| Wholesale trade | 0.28 | 0.24 | 0.05 |
| Retail trade | 0.15 | 0.13 | -0.05 |
| Transportation and warehousing | 0.08 | 0.10 | 0.02 |
| Information | 0.11 | 0.12 | 0.03 |
| Finance and insurance | 0.49 | 0.38 | -0.09 |
| Real estate and rental and leasing | 0.08 | 0.04 | -0.02 |
| Professional and technical services | 0.54 | 0.49 | 0.36 |
| Management of companies and enterprises | 0.08 | 0.19 | 0.03 |
| Administrative and waste services | 0.17 | 0.18 | 0.00 |
| Educational services | 0.06 | 0.08 | 0.08 |
| Health care and social assistance | 0.38 | 0.41 | 0.43 |
| Arts, entertainment, and recreation | 0.05 | 0.04 | 0.03 |
| Accommodation and food services | 0.14 | 0.11 | 0.06 |
| Other services, except public administration | 0.08 | 0.10 | 0.08 |
| Federal, civilian | 0.11 | 0.10 | 0.11 |
| Military | 0.07 | 0.07 | 0.10 |
| State and local | 0.41 | 0.49 | 0.44 |

NOTE. An industry's contribution to percent change in personal income equals the dollar change in that industry's compensation divided by personal income in the previous year times 100.

Six industries subtracted from personal income growth. Construction, durable-goods manufacturing, nondurable-goods manufacturing, retail trade, finance, and real estate reduced personal income growth 0.3 percentage point in 2008. As recently as 2006, these six industries contributed 1.5 percentage points to growth.

Other sources of change

Economic stimulus payments. In BEA's personal income statistics, the income tax rebates authorized by the Economic Stimulus Act of 2008 for individuals who pay no income taxes (or for whom the rebate would exceed the amount of the income taxes they do pay) are treated as personal current transfer receipts.³ These rebates amounted to \$24.7 billion for the metropolitan portion of the United States in 2008, contributing only 0.2 percentage point to growth (table B on pages 289 and 290).

Homeowner assistance programs. The amounts distributed under the federal homeowner assistance programs to rebuild residences destroyed or damaged by Hurricane Katrina declined in 2008 in all Louisiana and Mississippi areas except Houma-Bayou Cane-Thibodaux, LA (table C). This reduced personal income growth by 3.1 percentage points in New Orleans, LA, 7.4 percentage points in Gulfport, MS, and 7.7 percentage points in Pascagoula, MS. These were the three fastest growing metropolitan areas in 2007 because of the federal payments; in 2008, they were among the slowest growing metropolitan areas.

Table C. Homeowner Assistance Payments by Metropolitan Area in Louisiana and Mississippi

| | | Homeowner assistance payments | | Contribution to personal income growth | |
|-----------------------------------|--|-------------------------------|-------|--|------|
| | | Millions of dollars | | Percentage points | |
| | | 2007 | 2008 | 2007 | 2008 |
| Louisiana | | | | | |
| Alexandria | | 12 | (L) | 0.3 | -0.2 |
| Baton Rouge | | 235 | 33 | 1.0 | -0.8 |
| Houma-Bayou Cane-Thibodaux | | 80 | 133 | 1.2 | 0.7 |
| Lafayette | | 27 | 6 | 0.3 | -0.2 |
| Lake Charles | | 339 | 311 | 5.6 | -0.4 |
| Monroe | | 5 | (L) | 0.1 | -0.1 |
| New Orleans-Metairie-Kenner | | 4,356 | 2,822 | 10.4 | -3.1 |
| Shreveport-Bossier City | | 12 | (L) | 0.1 | -0.1 |
| Mississippi | | | | | |
| Gulfport-Biloxi | | 893 | 276 | 12.5 | -7.4 |
| Pascagoula | | 503 | 122 | 11.9 | -7.7 |

(L) Less than \$500,000.

NOTE. The contribution of homeowner assistance payments to metropolitan area personal income growth equals the change in the amount of those payments divided by personal income in the previous year times 100.

Special Hurricane Ike adjustments. The estimates of personal income for Beaumont-Port Arthur, TX, and several other areas reflect the effects of Hurricane Ike, which landed in Texas on September 13, 2008 (table D).⁴ In Beaumont, TX, rental income of persons was reduced \$300 million, and nonfarm proprietors'

4. The metropolitan area personal income estimates will not be revised to be consistent with the 2009 comprehensive revision of the national income and product accounts until next spring. Under the new treatment of natural disasters introduced by the comprehensive revision, personal income will no longer be affected by uninsured losses of residential and business property or by net insurance settlements. See Eugene P. Seskin and Shelly Smith, "Preview of the 2009 Comprehensive Revision of the NIPAs: Changes in Definitions and Presentations," SURVEY 89 (March 2009): 10–20. For details of the old treatment see the articles on state personal income in the January and April 2006 issues of the SURVEY.

Table D. Special Hurricane Ike Adjustments to Selected Metropolitan Area Personal Income for 2008

| | Adjustments | | | | Contribution to personal income growth | |
|---------------------------------------|----------------------------------|---------------|-------------------|-------|--|-------------------|
| | Millions of dollars, annual rate | | | | Percentage points | |
| | Nonfarm proprietors' income | Rental income | Transfer receipts | Total | Nonfarm proprietors' income plus rental income | Transfer receipts |
| Beaumont-Port Arthur, TX | -98 | -300 | 303 | -94 | -3.2 | 2.4 |
| Houston-Sugar Land-Baytown, TX | -413 | -1,266 | 1,280 | -398 | -0.6 | 0.5 |
| Owensboro, KY | -5 | -15 | 15 | -5 | -0.6 | 0.5 |
| Dayton, OH | -21 | -65 | 66 | -21 | -0.3 | 0.2 |
| Lake Charles, LA | -4 | -13 | 14 | -4 | -0.3 | 0.2 |
| Cincinnati-Middletown, OH-KY-IN | -43 | -132 | 134 | -42 | -0.2 | 0.2 |
| Springfield, OH | -2 | -5 | 6 | -2 | -0.2 | 0.1 |
| Other metropolitan areas | -84 | -259 | 262 | -81 | (L) | (L) |

(L) Less than 0.05 percent.

NOTE. The other metropolitan areas are in Arkansas, Illinois, Indiana, Kentucky, Louisiana, Missouri, Ohio, Pennsylvania, and Texas.

3. For details, see the box "Economic Stimulus Act of 2008" SURVEY OF CURRENT BUSINESS 88 (October 2008): 134.

income was reduced \$98 million; both reductions reflect uninsured losses of residential and business property. Transfer receipts from business were boosted \$303 million to reflect net insurance benefits paid to persons. The combined effect of these adjustments was to lower 2008 personal income \$94 million.

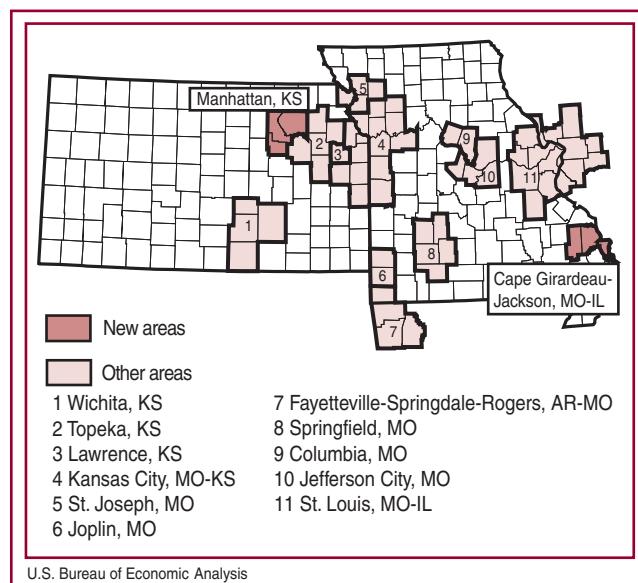

Adjustments in Houston, TX, were larger when measured in dollars but smaller relative to the component of income that was adjusted. Adjustments were also made to the personal income of several metropolitan areas that are far from the Gulf Coast, such as Owensboro, KY, and Dayton OH. As the remnants of Hurricane Ike moved across the United States, they caused severe damage in these areas. However, because other effects of the hurricane are embedded in the source data, BEA did not attempt to quantify their impact.

New metropolitan areas

The Office of Management and Budget designated three new metropolitan areas in November 2008 (charts 2 and 3): Cape Girardeau-Jackson, MO-IL (consisting of Alexander County, IL, Bollinger County, MO, and Cape Girardeau County, MO); Manhattan, KS (consisting of Geary, Pottawatomie, and Riley counties in Kansas); and Mankato-North Mankato, MN (consisting of Blue Earth and Nicollet counties in Minnesota). This brings the total number of metropolitan areas to 366.

Because these areas are defined in terms of counties and because BEA publishes estimates of income and employment for all counties back to 1969, a statistical portrait of the new metropolitan areas as of 2008 and a description of the rural-to-metropolitan evolution of the areas were easily assembled.

Chart 2. Location of Newly Designated Metropolitan Areas in Kansas and Missouri

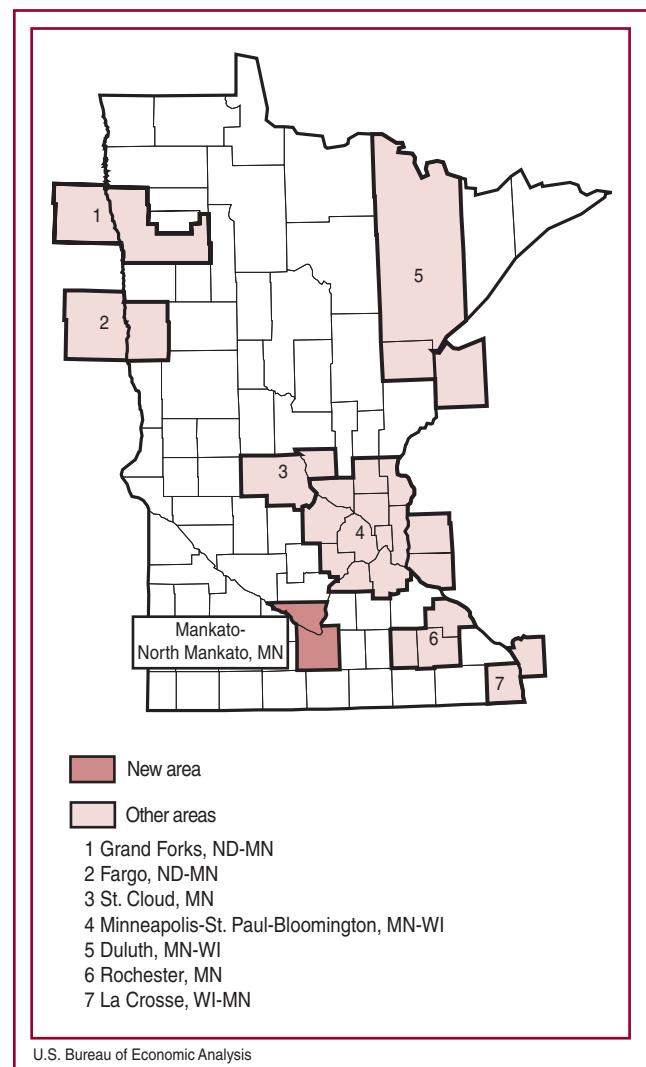

The new areas are small, especially when population rather than employment or total personal income is the measure of size. Manhattan, KS, has the largest population of the three, with nearly 122,000 residents in 2008. Manhattan, KS, ranked 305 according to population, while Cape Girardeau-Jackson, MO-IL, ranked 350, and Mankato-North Mankato, MN, ranked 352 (table E). These areas rank a bit higher when wage and salary employment is the measure of size: Manhattan's 72,000 jobs ranked 249 in 2007.⁵

Per capita personal income in 2008 was below average for all three; Cape Girardeau ranked 297, with \$30,051, Mankato ranked 181, with \$34,570, and Manhattan ranked 124 with \$36,987. The average for all metropolitan areas was \$41,455. Average wages per job in 2007 were also below the U.S. average of \$45,846; average wages were \$31,147 in Cape Girardeau, \$31,616 in Mankato, and \$34,607 in Manhattan.

5. The most recent employment data are for 2007.

Chart 3. Location of Newly Designated Metropolitan Area in Minnesota

The industrial compositions of the three areas are distinctive. Cape Girardeau is a medical hub for southeast Missouri and southern Illinois. Its health care sector accounts for more than 21.5 percent of earnings in the area, compared with 9.8 percent for the metropolitan portion of the United States. Transportation and warehousing is also relatively large, accounting for more than 6.0 percent of earnings, compared with 3.2 percent for the United States.

Manhattan's economy is dominated by Fort Riley and other government activities. The military accounted for 39 percent of earnings, compared with 1.7 percent for the United States. The state and local government sector accounted for 17.0 percent, compared with 11.4 percent. And the federal civilian government accounted for 7.1

(D) An estimate for this industry is not shown to avoid disclosure of confidential information, but the estimate is included in total earnings.

1. A portion of the estimate is suppressed to avoid disclosure of confidential information.

percent, compared with 3.2 percent. In total, the government sector accounted for more than 63 percent of earnings in the Manhattan area.

Mankato-North Mankato, MN, has a rather large farm sector, accounting for 6.0 percent of earnings, compared with 0.3 percent for the United States. It also has relatively large manufacturing sector (16.5 percent, compared with 11.1 percent), health care sector (more than 13.4 percent, compared with 9.8 percent), and state and local government sector (16.1 percent, compared with 11.4 percent).

Manhattan, KS, has grown relatively rapidly over 1997–2007. Wage and salary employment growth has averaged 1.8 percent per year, well above the 1.2 percent growth rate for the United States. Per capita personal income growth has averaged 6.3 percent per year, compared with 3.9 percent. The area has managed above average growth while growing demographically at the same 1.1 percent pace as the United States.

In contrast, Cape Girardeau-Jackson, MO-IL, and Mankato-North Mankato, MN, have had below average population growth and personal income growth. In employment growth, the two areas differ. Over the past 10 years, Cape Girardeau grew slightly slower (1.1 percent) than the United States, but Mankato grew faster (1.8 percent).

Data Availability

This article presents summary advance statistics of metropolitan area personal income and per capita personal income for 2008 and previously published statistics for 2006–2007. More detailed statistics for 1969–2008 are also available.

The following estimates for metropolitan areas are at www.bea.gov/bea/regional/reis:

- Metropolitan area income and employment summary statistics, featuring personal income, per capita personal income, the derivation of personal income for 1969–2008, and employment totals, which are available only for 1969–2007
- Compensation of employees by industry by North American Industry Classification System (NAICS) subsectors for 2001–2007, by NAICS sectors for 2008, and by Standard Industrial Classification System (SIC) two-digit industries for 1998–2000
- Personal income by major source and earnings by NAICS subsectors for 2001–2007, by NAICS sectors for 2008, and by SIC two-digit industries for 1969–2000

For more information, call BEA's Regional Economic Information System at 202–606–5360, fax 202–606–5322, or e-mail reis@bea.gov.

1. The metropolitan area definitions used by BEA for its personal income estimates are the county-based definitions issued by the Office of Management and Budget in June 2003 (with revisions released February

2004, March 2005, December 2005, December 2006, November 2007, and November 2008) for federal statistical purposes.

Table 1. Personal Income and Per Capita Personal Income by Metropolitan Area, 2006–2008—Continues

p Preliminary

1.

2.

3.

Per capita personal income was computed using Census Bureau midyear population estimates.

Percent change calculated from unrounded data.

The metropolitan area definitions used by BEA for its personal income estimates are the county-based definitions issued by the Office of Management and Budget in June 2003 (with revisions released February 2004, March 2005, December 2005, December 2006, November 2007, and November 2008) for federal

statistical purposes.

NOTE. The personal income level shown for the United States is derived as the sum of the metropolitan area estimates and an estimate for the nonmetropolitan portion of the United States. It differs from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.
