

# 5 Metal and Nonmetal Miners Died In May 2010

Let's review these fatalities:

1. A miner was struck by a drill truck and fatally injured when the truck began to roll after he raised the jacks on the truck.
2. A miner was struck and fatally injured by drill steel that ruptured violently while he was cutting it with a torch.
3. A miner was fatally injured when he entered an energized roller mill without locking it out.
4. A miner was struck and fatally injured by loose material while he was scaling a rib.
5. A miner was fatally injured when he entered a blast area when a misfire shot detonated.

**Let's Reverse This Trend**  
**Always Take Time for Safety!**

As of 6/4/2010, 8 M/NM miners have been fatally injured
