EM NEWS FLASH

Community Advisory Board 2010 Membership Recruitment Drive Underway

**Are you interested in learning more about the Nevada Test Site
and what's being done to clean up the environment from historic nuclear testing?**

If so, we want you!

The Community Advisory Board for Nevada Test Site Programs (CAB) is currently recruiting volunteer members from rural and urban communities in Southern Nevada. The CAB is federally-chartered to provide recommendations to the U.S. Department of Energy Environmental Management Program regarding environmental clean up activities at the Nevada Test Site.

The CAB meets bi-monthly to discuss and formulate recommendations on Environmental Management topics that include groundwater contamination, historic nuclear test location clean-up, radioactive waste transportation and disposal activities, and other environmental remediation activities. However, the Board does not address issues related to the Yucca Mountain Project.

If you are interested in working with others to make a difference in Nevada's future, please consider applying now. No related training or experience is required.

Applications and further information are available at www.nv.doe.gov/ntscab or by calling 702-657-9088. The deadline for application submittal is September 30, 2009. Please send completed applications to:
