<b>Time Code</b>	<b>Description</b>
1:00:07:00	<b>Background information (text on screen):</b> <i>NOAA constructs barrier islands to protect Louisiana's shoreline and infrastructure. Despite Hurricane Katrina delays, NOAA is on schedule to complete the first phase of an 800-acre barrier island project in Plaquemines Parish, La. Dredging and major earthmoving activities are currently in progress on the Barataria Barrier Island Complex Project, which will create beach and marsh habitat to help protect Louisiana's coastal communities and infrastructure from the devastating effects of wind, waves and flooding. The project is being implemented in partnership with the Louisiana Department of Natural Resources.</i>
1:01:30:00	<b>Soundbites:</b> Rachel Sweeney, NOAA Fisheries Service (5 soundbites)
1:02:20:00	<b>Soundbites:</b> Steve Chatry, Vice President, Weeks Marine, Inc. (1 soundbite)
1:02:50:00	<b>B-Roll</b> <ul style="list-style-type: none"><li>• aerials of island</li><li>• aerials of dredging</li><li>• island groundlevel</li><li>• bulldozers</li><li>• new grass planting</li><li>• dredge material pumping</li></ul>
1:04:24:00	<b>NOAA Animated logo; end</b>
