Yes. I have glanced at it, and I have a quick question. Is it possible to shift work between various tasks if one takes more effort than another? For example, I expect more resources will be needed on risk management planning and far less on facilitating interagency operability. Overall, the pricing is not unreasonable for the quality I expect to see from this group.

Mary and Bob,

Please find below the proposal from Jane Mobley Associates. The total price proposed is \$99,940.25. Please review and approve the pricing and labor mix and hours.
