For Immediate Release  
October 20, 2009

The National Energy Technology Laboratory (NETL) has selected Floris C. Weston as a project manager with the Weatherization Assistance Program. Previously, she worked for the Virginia Department of Housing and Community Development.

Weston grew up in Washington, D.C. and is a social work degree candidate at Virginia Commonwealth University (Richmond, Va.). She previously attended George Washington University (Washington, D.C.). She has relocated from Richmond and now resides in Bethel Park, Pa.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – “the ENERGY lab” – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
