For Immediate Release  
June 24, 2009

The National Energy Technology Laboratory (NETL) has selected Jamie Parker as a contract specialist. He will join a team of specialists responsible for overseeing the administration of various federal contracts and grants. Previously, he worked at the West Virginia University Health Sciences Center in legal affairs and risk management.

Parker grew up in Madison, WV. He earned his B.S. in journalism, public relations from WVU and his J.D. from the WVU College of Law. Parker lives in Morgantown with his wife, Melissa.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – “the ENERGY lab” – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
