For Immediate Release
June 8, 2009

The National Energy Technology Laboratory (NETL) has selected Shelley C. Martin as a public affairs specialist. She will be responsible for preparing communications and outreach materials about NETL activities, programs, research, and events. Additionally, she will serve as a member of the NETL emergency public information team.

She joined NETL in November. Prior to that, she worked for the Monongalia County Health Department in Morgantown, WV as the public information officer.

Martin grew up in Masontown, WV and earned her B.A. in Communications Studies from West Virginia University. She lives in Morgantown with her husband, and they have one son.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – "the ENERGY lab" – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
