For Immediate Release  
September 28, 2009

After working in the National Energy Technology Laboratory's (NETL) Financial Management Division as an accountant, Susan Kulsic has been promoted to accountant (leader) in the same division. She has been employed at NETL's Pittsburgh location for about 23 years.

Kulsic holds a B.S.-B.A. in computer science from Robert Morris University and has a minor in accounting. She and her husband, Charles, reside in Monroeville, Pa. Her daughter, Rachel, is attending college.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – “the ENERGY lab” – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
