For Immediate Release
June 8, 2009

James Ammer, a division director at the National Energy Technology Laboratory (NETL), has been awarded a Bronze Award for Excellence in the Outstanding Supervisor/Manager in a Professional Series category from the Pittsburgh Federal Executive Board (FEB).

FEB held its 26th annual Excellence in Government Awards Program luncheon, where the awards were presented, at the Westin Convention Center in Pittsburgh. NETL employees took home several of the awards,.

Ammer is director of the Natural Gas & Oil Project Management Division at NETL. He grew up in Pittsburgh, and earned a B.S. in petroleum and natural gas engineering from Penn State University. He lives in Mt. Morris, PA.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – “the ENERGY lab” – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
