For Immediate Release  
May 17, 2010

The National Energy Technology Laboratory (NETL) has selected Rose Wolford as a management analyst. Wolford will be the NETL travel coordinator. Previously, she was a contractor for Performance Results Corporation (Morgantown, W.Va.) and worked in the NETL travel office.

Wolford grew up in Lake Lynn, Pa. and now lives in Morgantown.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – “the ENERGY lab” – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
