For Immediate Release
January 4, 2010

The National Energy Technology Laboratory (NETL) has selected Shelly Shore as an administrative specialist. Previously, she worked with the Department of Defense, U.S. Army Medical Research and Materiel Command at Fort Detrick, Md.

Shore grew up in Pasadena, Md., and is currently enrolled at Salem International University, where she will earn her bachelors of science degree in business administration with an accounting/finance concentration in May 2010. She lives in Grafton, W.Va., with her son Daniel.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – “the ENERGY lab” – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
