For Immediate Release
August 17, 2010

The National Energy Technology Laboratory (NETL) has selected Susan Malie as an attorney in the Office of Chief Counsel, assisting with general legal issues. Previously, she worked as Deputy General Counsel for the Governor's Office of General Counsel, Commonwealth of Pennsylvania.

Malie grew up in Pittsburgh, Pa. and earned her J.D. from Duquesne University School of Law (Pittsburgh). She lives in Pittsburgh.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – “the ENERGY lab” – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
