For Immediate Release  
November 10, 2009

The National Energy Technology Laboratory (NETL) has selected Tara Swauger as an accountant in the Financial Management Division. She will work on Recovery Act grants and various other Recovery Act responsibilities.

Swauger grew up in Liberty Borough, Pa., and recently earned a bachelor of arts degree in business, with a concentration in accounting & marketing, from the University of Pittsburgh-Johnstown. She lives in Liberty Borough.

NETL is one of the U.S. Department of Energy's national laboratories. NETL – “the ENERGY lab” – focuses on America's economic prosperity, which requires secure, reliable energy supplies at sustainable prices. Three overarching issues characterize the energy situation in the United States. They are energy affordability, supply security, and environmental quality. The Department of Energy's only government-owned, government-operated national lab, NETL is a research and technology center where these energy challenges converge and energy solutions emerge. NETL implements a broad spectrum of energy and environmental research and development programs through its own research staff and through funded research at other labs, universities, and industry that will return benefits for generations to come.
