- ✳ **Private Sector speaker**, TBA

RSVP

Robert.Straetz@trade.gov or 202-482-4496 before Wednesday, April 13, 2011

The Restriction of Hazardous Substances (RoHS) Directive has just completed a revision bringing important changes to be applied across Europe in 18 months time.

The Energy Using Products (EuP) Directive has entered into a very important stage as implementing measures affecting specific products have been agreed and are now coming into force.

The Waste Electrical and Electronic Equipment (WEEE) Directive is undergoing a revision that will bring about key changes.

Steve Andrews and Chris Smith have extensive experience with this legislation and are well qualified to discuss how these directives will affect U.S. companies, and what companies can expect in the future. The company speaker will offer practical information on complying with these directives.
