

Kunsan to AJOU HOSPITAL

COA: 28 Jan 2008

Leave Kunsan main gate, and bear left onto 26. Travel about 2.5mi down 26 and look for the interchange for **Hwy 21** on your right. You will enter the ramp on your right, but be careful to take the leftmost of the two roads, as this is the ramp (the right one just goes into private areas).

Now you will travel down 21 for a bit (about 11mi) and look for the ramp to **Expressway 15**. This is a left exit. Go left onto Hwy15 heading roughly north.

Get your ticket from the tollbooth, making sure to head North on Hwy 15 toward Seoul. Now you get to begin the really painful part...

Travel (roughly) North on **Hwy15** for somewhere around 90mi until you see *Ocean Park Resort* on your left and you arrive at a Big Bridge. Merge right and be on the lookout for the exit for **Hwy40** (about 6mi) on your right.

You will turn onto **Hwy40** (exit 28) and head roughly East on Hwy40 for about 13mi, looking for exit 4B for going to **Expressway 1** towards **SEOUL**.

Travel about 20 miles on Expressway and look for exit 44 going to **Hwy42** (Suwon/Singal).

Go through the tollbooth. When you get past the tollbooth, take a left at the stoplight.

Go straight ahead, until you get to the overpass. Once you pass after the overpass, start counting lights. At the third light, there should be a CINEDANO. At this point try to be on the far right of the lane. At the **ninth light**, there should be an elementary school on the Right. And at **the tenth light**, make a **right**. Then make a left following the sign to **AJOU University Hospital**.

Go under the tunnel. Past the tunnel, take a **right** at the **2nd stop light**. AJOU Hospital should be a building on a hill on the right side.

Drive up to the tollbooth. Stay on the far right lane, and go straight. The ER entrance should be at your left.
