Introducing Guam High School's Career and Technical Education (CTE) Program

CTE career and technical EDUCATION DODEA

Research shows that students taking CTE courses do better academically than those who do not. CTE works because it's practical as well as academic, and provides students with relevant contexts for learning. It's about the real world. It's about learning by doing.

CTE curriculum is organized around Career Clusters that identify pathways from high school to college and the workplace. Career Clusters and Pathways represent a nationwide effort to help schools ensure that students get the knowledge and skills they need for multiple career choices by matching what is taught in the classroom to business and industry standards.

WHAT WE OFFER

- Administration & Information Support
- Audio & Video Technology and Film
- Information Support & Services
- Interactive Multimedia
- Journalism & Broadcasting
- Management
- National Security
- Therapeutic Services

In addition to opportunities to earn career pathway endorsements on their DoDEA high school transcripts, CTE students can also earn industry-recognized certifications in various software programs i.e. Microsoft Office Specialist certifications in Word, PowerPoint, Excel and Access; and Adobe Photoshop and Adobe InDesign.
