NOAA Technical Memorandum NMFS

The National Marine Fisheries Service's Alaska Fisheries Science Center uses the NOAA Technical Memorandum series to issue informal scientific and technical publications when complete formal review and editorial processing are not appropriate or feasible. Documents within this series reflect sound professional work and may be referenced in the formal scientific and technical literature.

The NMFS-AFSC Technical Memorandum series of the Alaska Fisheries Science Center continues the NMFS-F/NWC series established in 1970 by the Northwest Fisheries Center. The NMFS-NWFSC series is currently used by the Northwest Fisheries Science Center.

ABSTRACT

The results of the 2008 Alaska Fisheries Science Center's (AFSC) bottom trawl survey of the groundfish and invertebrate resources of the eastern Bering Sea upper continental slope (EBSS) is presented. The 2008 EBSS survey is the third standardized biennial groundfish bottom trawl survey.

Two hundred successful survey bottom trawls were conducted from 200 to 1,200 m on the eastern Bering Sea slope. The survey area stretched from Unalaska and Akutan Island in Alaska (54° N) to the U.S-Russian border at 61° N lat. Sampling was stratified by six subareas running south to north and by five depth stratum within each subarea. Stations were chosen randomly and target sampling density was proportional to the area (km^2) in each subarea and depth stratum. Mean sampling density was approximately one tow per 163 km^2 .

This report provides estimates of biomass in metric tons (t), population number, and catch per unit effort (CPUE; no/ha and kg/ha) for all species identified on the survey. Size frequencies (42 species) and CPUE distribution plots (41 species) are presented for the most abundant species or species of commercial and ecological interest. The largest survey total catch weights of fish and invertebrate species were giant grenadier (*Albatrossia pectoralis*), Pacific ocean perch (*Sebastes alutus*), arrowtooth flounder (*Atheresthes stomias*), popeye grenadier (*Coryphaenoides cinereus*), walleye pollock (*Theragra chalcogramma*), cloud sponge (*Rhabdocalyptus* species), deep sea papillate sea cucumber (*Pannychia moseleyi*), and triangle Tanner crab (*Chionoecetes angulatus*).

INTRODUCTION

The Alaska Fisheries Science Center's (AFSC) Resource Assessment and Conservation Engineering Division (RACE) conducted a bottom trawl survey in 2008 to assess the groundfish and invertebrate resources on the eastern Bering Sea upper continental slope (EBSS). The survey area extended from Unalaska and Akutan Islands to the U.S.-Russian border near the International Date Line (166° E to 180° W) at depths from 200 to 1,200 m.

Triennial surveys were conducted from 1979 to 1991 on the EBSS using a variety of nets, methods, vessels, and sampling locations. The results from these surveys have been summarized in numerous data reports (Bakkala et al. 1985a, Bakkala et al. 1985b, Sample et al. 1985, Walters et al. 1988, Bakkala et al. 1992, Goddard and Zimmermann 1993).

Prior to the current standardized EBSS biennial surveys (2002, 2004, 2008) a pilot survey was conducted in 2000 which tested two versions of the Poly Nor'easterly bottom trawl gear (mud-sweep and rockhopper footropes). The pilot study showed that the Poly Nor'easterly net with mud sweep gear was more efficient and robust for sampling the EBSS survey area bottom than the rockhopper gear (Mark Wilkins, AFSC pers. commun.). Eastern Bering Sea Slope surveys were conducted in 2002 and 2004 and results are detailed in NOAA Technical Memoranda (Hoff and Britt (2003), and Hoff and Britt (2005)). The slope survey was not conducted in 2006 due to budget limitations. The 2008 EBSS trawl survey is the third in this biennial groundfish survey that incorporate the AFSC's latest sampling technologies and

protocols for survey design, catch data gathering, species identification, and net mensuration monitoring.

Comparisons between the post-2000 surveys and those conducted from 1979 to 1991 remains confounded due to the differences in sampling gear, survey design, sampling methodology, and species identification.

This report summarizes the survey design, sampling gear, and survey logistics used as well as the personnel that participated on this survey. Estimates of abundance, distribution, and size frequency are presented for commercially and ecologically important species. The purpose of this report is to provide information on the biological resources encountered to the scientific community, the fishing industry, and the general public. The results presented herein represent the exclusive report prepared from the EBSS survey conducted in 2008. For additional information from this survey please contact the authors at the Alaska Fisheries Science Center, Seattle Washington (G.R. Hoff email: jerry.hoff@noaa.gov or L.L. Britt email: lyle.britt@noaa.gov).

METHODS

Survey Area and Sampling Design

The EBSS survey area was divided into six geographic subareas (1-6) running south to north along the slope (Fig.1) to assist in the distribution of trawl effort in relation to estimated habitat area. The subareas were based on distinct bathymetric types and underwater features: broad low slope areas, canyon areas, and steep slope inter-canyon faces. Subareas 1 and 6 consist

of broad low slope areas with wide bathymetric contours in the 200-600 m depth range followed by a gradual slope to 1,200 m. Subareas 2 and 4 consist of Pribilof and Zhemchug canyons, respectively, which are characterized by semi-enclosed basins with steep walls and narrow bathymetric contours below 600 m. Subareas 3 and 5 are steep slope inter-canyon “faces” with narrow bathymetric contours throughout most of their depths.

Geographic subareas were stratified by depth every 200 m from 200 to 1,200 m resulting in five depth strata for each geographic subarea (200-400 m; 400-600 m; 600-800 m; 800-1,000 m; 1,000-1,200 m). Substratum areas (km^2) were calculated using known bathymetry contour lines (Table 1) and used to determine sampling density. Two-hundred survey stations were selected using a stratified random sampling design from a pool of 140 successful stations completed during 2002 and 240 stations during 2004 as well as additional stations added randomly in most strata. Stratum sampling densities ranged from one haul per 104.62 km^2 to one haul per 337.76 km^2 with a mean sampling density of one haul per 162 km^2 . Sampling densities varied due to difficulties in successfully completing all planned stations in some deep strata due to areas with untrawlable bottom.

Survey Agenda and Personnel

The EBSS survey began on 29 May 2008 near Unimak Pass and concluded on 11 August 2008 in the south-western eastern Bering Sea. Mobilization and demobilization of the survey took place in Dutch Harbor, Alaska. There were two mid-survey exchanges of scientific crews in Dutch Harbor (legs 1-2, legs 2-3). Research personnel for the survey comprised primarily of AFSC staff and one Hollings Scholarship summer intern (Table 2).

Vessel, Scientific Gear, and Procedures

The F/V *Vesteraalen*, a 38 m long commercial stern trawler powered by twin engines with 1,725 continuous horsepower, was chartered for the survey. Electronic navigation and fishing equipment on the vessel included global positioning system (GPS) receivers, video position plotters, radar, single sideband and VHF transmitter-receivers, an EC-150 color video depth sounder, and auto-pilots. The vessel was operated by Captain Tim Cosgrove during the first leg and by Captain Kenneth Sjong during the second and third legs of the survey. A four-member crew aided in the operation of the vessel and in the use of the fishing gear.

The standard RACE Division fishing gear comprised trawls, bridles, and trawl doors. A Poly Nor'easter high-opening bottom trawl equipped with mud-sweep roller gear was used to sample all stations (Fig. 2). This sampling trawl had a 27.2 m headrope with twenty-one 30 cm floats and a 24.3 m long-link chain fishing line attached to a 24.9 m footrope. The body of the net was constructed of 127 mm stretched-mesh polyethylene netting, with 89 mm stretched-mesh polyethylene netting in the codend, and a 32 mm stretched-mesh nylon codend liner. The mud-sweep roller gear was constructed of 203 mm solid rubber disks strung over 16 mm high-tensile chain. The net was fished with 1.83 H 2.75 m (6 H 9 ft; 1,000 kg) steel V-doors rigged with four-point bridles to enhance their stability at slow towing speeds and 55 m bridles between the doors and wingtips. This trawl is a modified version of the standard trawl used for the RACE Division's West Coast Upper Continental Slope survey (Lauth 2000). During fishing the net height and width of the trawl were measured using a Scanmar (Scanmar, Asgardstrand, Norway) net measurement system. The GPS system recorded vessel location recording tow duration, distance fished, and precise location. A tilt sensor (bottom contact sensor) attached to the

footrope recorded bottom contact of the footrope indicating the precise beginning and ending of the tow. Bottom depth and water temperature profiles were recorded using a Sea-Bird SBE-39 microbathythermograph (Sea-Bird Electronics Inc., Bellevue, Washington). All net configuration measurements were recorded electronically as well as on paper. The Haul Log (Appendix) details net performance for each tow.

Each station was surveyed with echosounding over a 1.5-2.0 nautical mile (nmi) horizontal distance. A site was considered towable when the depth changed less than 50 m over the 2 nmi transect and it could be determined there was nothing to impede the completion of the tow or the performance of the gear. Trawl operations followed Stauffer (2004) Standard tow speed was 2.5 knots and standard tow duration was 30 minutes at all depths. For each tow date, time, latitude, longitude, gear depth, surface temperature, bottom temperature, water column temperature profile, net spread, net height, and bottom contact of the footrope were recorded. At the end of a tow these haul characteristics were plotted and examined for appropriate distance, bottom contact, and depth range. Upon viewing net performance from a tow, the tow was scored on a graded scale: successful tows were given a positive score, whereas unsuccessful tows received a negative score. In general, a positive tow was considered valid and used for survey abundance estimates, while a negative tow was not used in the analysis. Table 3 lists the specific models, versions, and serial numbers, and RACE numbers for all significant sampling tools used for this survey.

Catch Processing and Collection of Biological Data

Catches were sorted, weighed, and enumerated for all species of fish and invertebrates.

The catch was processed in one of two ways: either by sorting the entire catch and weighing each species in aggregate or by weighing the net codend and discarding the predominant species (except for a weighed and sexed random length frequency sample) and the rest of the catch sorted and weighed in species aggregates. Random samples of all species that were designated for biological data collection were set aside after the baskets were weighed. Total weight and numbers for each species were recorded onto an on-deck catch form. In cases where individuals were not reasonably enumerated (i.e., corals, sponges, bryozoans, ascidians, fish eggs) only total weight was recorded. For large numbers of an individual species in a single haul, the total number was extrapolated from subsample weight and count of 50-200 individuals. In most cases fish length frequency subsamples were used for extrapolation of the total haul count for individual species.

A random subsample of 100-150 fish, depending on the size range for the species, were selected for length frequency measurements. The sex of fish was determined by internal examination of the gonads or by external characters (e.g., claspers for elasmobranchs), and fish were sorted into baskets of males, females, and undetermined sex. Fork length (FL) was measured for most fish, except elasmobranchs which were measured to total length (TL) and macrourids to preanal-fin length (PAFL). Fish and cephalopod species were measured to the nearest centimeter on a bar-coded length board using a Juniper LS 600 Polycorder which uses a bar-code reader wand and species-specific numerical codes. Data from polycorders were downloaded into a database, examined for accuracy, and paper copies printed. All crab species were measured to the nearest 1.0 mm using vernier calipers and recorded on paper form on deck.

Otoliths (age structures) were randomly selected from commercially and ecologically important fish species utilizing a stratified sampling regime based geographic subarea, depth stratum, and length. Two otolith pairs per cm/sex/depth stratum/subarea were collected for each species sampled except for Greenland turbot (*Reinhardtius hippoglossoides*), for which three otolith pairs were collected per strata. An attempt was made to collect otoliths from all fish encountered for shortraker rockfish (*Sebastodes borealis*), rougheye rockfish (*S. aleutianus*), blackspotted rockfish (*S. melanostictus*), bigmouth sculpin (*Hemitripterus bolini*), and blacktail snailfish (*Careproctus melanurus*). At the time of otolith collection, the sex, fork length (cm) or pre-anal fin length (PAFL), and weight (kg) of each fish were recorded on paper forms on deck.

Stomach samples were collected from selected fish species for the AFSC's Resource Ecology and Ecosystem Modeling Program. Many commercial and ecologically important species were targeted for food habits including the walleye pollock (*Theragra chalcogramma*), arrowtooth flounder (*Atheresthes stomias*), Pacific ocean perch (*Sebastodes alutus*), and Pacific cod (*Gadus macrocephalus*). Specimens were chosen at random and only intact stomachs (non-regurgitated) were chosen for collection. Stomachs were excised and preserved in 10% buffered formalin at sea for later examination. Specimen, haul, and stomach content was recorded on specimen forms at the time of collection.

Voucher specimens were collected from species that were rare, of taxonomic interest, or unidentifiable at the time of encounter. Collections were labeled with a cruise number, vessel number, haul number, species, voucher number, preservative, and collector's name or initials. Voucher specimens were preserved in 10% buffered formalin (most fishes and non-calcareous invertebrates) or 95% ethanol for calcareous invertebrates. A few specimens were stored frozen

and returned to Seattle, Washington. Additional biological samples were collected for study per investigators' requests. Table 4 details the investigators, samples collected, and study purposes.

Abundance Estimates

Catch per unit effort (CPUE) was calculated by dividing catch weight or number for each species by the estimated area swept of the trawl net. Units for CPUE were in kilograms per hectare (kg/ha) and number of fish per hectare (no./ha). Population and biomass (metric tons) estimates were calculated using mean CPUE and extrapolated into the area for each stratum and subsequently all stratum summed. Population size composition for species in which lengths were taken estimated the proportion of fish at each length interval weighted by the CPUE (number of fish/ha) and then expanded to the depth strata population. For details on these methods see Wakabayashi (et al. 1985) and Alverson and Pereyra (1969).

RESULTS

Haul, Catch, and Biological Data

During the 2008 EBSS survey, 200 tows were completed successfully and were used for abundance estimates (Fig. 1). Seven tows were considered unsatisfactory in meeting survey standards and were recorded but in most cases the location was resampled to obtain a successful tow at that station (see Appendix 1).

The EBSS survey sampling was designed to distribute trawling effort in proportion to the total area (km^2) of each stratum. A comparison of the planned total effort distribution by stratum to that actually achieved shown in Table 1. In general, sampling effort in the deepest strata (1,000-1,200 m) were under-represented due to the difficulty in finding trawlable grounds. Shallow strata more commonly received the prescribed sampling density, where on average each a tow represented 162 km^2 of area. The Haul Log (Appendix A) details date, exact location, depth of all hauls attempted, net parameters during the tow, environmental conditions, and individual species or species group total haul weights for all hauls attempted.

Bottom temperatures recorded during the survey ranged from 2.4 °C to 4.1 °C and were correlated with depth below approximately 400 m. Between 200 and 400 m, bottom temperature was highly variable and showed no direct relationship with depth (Fig. 3). Surface temperatures ranged from 4.4 °C to 10.4 °C and both surface and bottom temperatures showed no relationship with latitude.

Approximately 137 fish species and 251 invertebrate species were identified during the 2008 EBSS survey. The actual number of species encountered may be slightly higher or lower given inadequate field identification characteristics for some species. Tables 5A and 5B list all

species of fishes and invertebrates encountered and identified on the 2008 EBSS survey alphabetized by common name or scientific name, respectively.

Overall giant grenadier (*Albatrossia pectoralis*) represented the largest estimated biomass on the 2008 EBSS survey followed by Pacific ocean perch, and arrowtooth flounder (*Atheresthes stomias*). Numerically the most abundant fish species was the popeye grenadier (*Coryphaenoides cinereus*). The cloud sponge (*Rhabdocalyptus* species) had the largest estimated biomass for invertebrates and the notched brittle star (*Ophiura sarsi*) was the most numerous. Table 6 lists all the species encountered during the survey in descending order of total weight, with additional details on the depth distribution and the frequency of occurrence for each species. Table 7 (lengths, weights, otoliths, stomachs) and Table 8 (voucher specimens) detail the species and numbers of biological data collected for each species.

Population, biomass, and CPUE estimates and variance of the estimates were calculated for every species encountered on the 2008 EBSS survey. Table 9 lists the abundance estimates (population and biomass) for every species encountered. The estimates are reported by: shallow strata (200-600 m), deep strata (600-1,200 m), and all strata combined.

Distributions, length frequencies, and abundance estimates

Abundance estimates, population size estimates, CPUE distribution plots, and estimates of population length frequencies are presented in Tables 10-52 and Figures 5-89 for the 43 most abundant and commercially important fish and invertebrates species. Abundance estimates were calculated for each subarea and each 200 m strata within each subarea, and all subareas and strata combined. CPUE distribution plots represent the abundance of the species for each haul. Fishes are presented in phylogenetic order (Nelson 1994).

Table 3. -- Details of sampling and data recording gear used during the 2008 EBSS survey.

NET & MENSURATION GEAR	DATA TYPE/FUNCTION	MODEL/VERSION/SERIAL #
Poly Nor'Eastern trawl	research sampling tool	Net #4 Hauls 1-47; Net #24 Hauls 48-53, 70-71, 74-103; Net#15 Hauls 54-69, 72-73, 148-176, 179-207; Net #16 Hauls 104-147, 177-178
Doors	spread the net	Doors # 885 Hauls 1-207
Vessel skipper and trawl master	conduct trawling operations	Tim Cosgrove-hauls 1-59; Kenneth Sjong-hauls 60-207
Scanmar height sensor	measure net height	Model HC4-HT60 Serial #'s T254C5, T1340C5
Scanmar slave spread sensor	measure net spread	Model MTR serial # 2851, 110, 4190
Scanmar master spread sensor	measure net spread	Model HC4 serial # 2495, A2621, A3654
Scanmar receiver cabinets	receive spread and height signal	Model 4002 C2 RSST946
Scanmar hydrophone	receive spread and height signal	Serial #'s 140, 166, 207
Scanmar program	records data input from net mensuration gear	AFSC (menu) version 5.71 Bxcrpro-3.51, Convert-4.0, Haulpos-8.0, Haultime-6.82, Scangraf-3.54, Scanplot-11.74, SBELob-1.8, Setclock-3.22, Speedplot-2.41
Vessel depth sounder	record depth soundings	Simrad ES60 software 1.5.2.77 1998
Furuno GPS	determine latitude and longitude	
SeaBird SBE-39 V1.8	depth and water temperature	Serial # 258, 854
ONSET computers optic shuttles	download bottom contact sensor	Serial #'s DTA-128B 26518
ONSET computers optic base stations	download bottom contact sensor	Serial #'s DSA-69617, DSA-714277
Bottom contact sensor (tilt sensors)	record footrope bottom contact	Serial # 320625, 224608
Olympic wire counter	measure trawl cable	Olympic wire counter 750-N cable meter #500

CATCH PROCESSING	DATA TYPE/FUNCTION	MODEL/VERSION/SERIAL #
Marel basket scale	weigh baskets of catch	Model 1100 Type U-2
Marel specimen scale	weigh individual specimens	Model 2000 Type M60
Measurement Systems International (MSI) load cell	weigh cod end with catch	Model 4300
Catch data entry program	onboard catch database	Written in Access 2003 AFSC version no. 20070522
Juniper systems LS 600 Polycorder	record fish length data	Serial #'s 3258, P60-5473, P60-5396, 637-5904
Dell computer	data recording	Optiplex 745 Windows v 5.1
Laser printers	produce hard copy of data	HP Laserjet 1012
Digital camera	photograph specimens	Pentax 4.3v 7.1 megapixel OPTIO W30
Federal Scientific Research Permit	allows research sampling	SRP # 2008-12
State of Alaska Research Permit	allows research sampling	CF-08-014

Table 4. - - Projects and collections completed or attempted during the 2008 EBSS survey.

Project Title	Project Description	Investigator(s) and Affiliation	Data/Samples Collected
Age structures for mission critical species	Collection of otoliths from selected fish species for current stock assessment models	Anne Hollowed (AFSC)	see Table 7 for details on otolith collection numbers
Age structures for giant grenadier	Collection of otoliths from giant grenadiers for future stock assessment models	Dave Clausen (AFSC)	see Table 7 for details on otolith collection numbers
Age structures for non-commercial species	Collection of otoliths from a selected group of fishes for future stock assessment models	Gerald Hoff (AFSC)	see Table 7 for details on otolith collection numbers
Biological data on crab	Collection of carapace size, weight, and shell condition on selected crab species	Robert Foy (AFSC-Kodiak), Jan Haaga (AFSC-Kodiak)	see Table 7 for details on species, length and weight collection numbers. Shell conditions were also recorded
Giant grenadier C-14	Collection of otoliths from largest giant grenadiers for C-14 age validation study	Charles Hutchinson, Delsa Anderl, Dan Kimura (AFSC) PAFL	39 otolith pairs collected from female giant grenadiers >44 cm PAFL
Light profiles	Collection of light profiles with light meter on the bottom trawl to determine influence of light on pollock distribution	Stan Kotwicki (AFSC)	Light, depth, temperature, salinity profiles were collected for the complete water column for 207 bottom trawls
Shortraker rockfish tissues	Collection of tissue samples of shortraker rockfish in conjunction with otolith collections for population genetic study	Tony Gharret (UAF), Paul Spencer (AFSC)	400 tissue samples collected from throughout the EBS slope region
Habitat production for POP	Collection of juvenile Pacific ocean perch from two habitats in the Island of Four Mts. in late May and early August	Chris Rooper (AFSC)	Successful trawls were completed in late May and early August and approximately 256 juvenile POP were collected frozen during each sampling period and 7 successful camera transects were completed
Rockfish habitat-Zhemchug	Collection of ES60-hydroacoustic data and video on two unique rocky ridges in the southern arm of Zhemchug Canyon	Gerald Hoff, Chris Rooper (AFSC)	ES60 data were collected from transects conducted during daylight and dark periods and 15 video transects were conducted collecting habitat association data
Shark life history	Collect life history information on sleeper and salmon sharks including gonad, stomachs, lengths and tagging, eye tissue, vertebrate	Robert Foy (AFSC-Kodiak), Gerald Hoff (AFSC)	Spaghetti tags ($n=31$) were deployed and tissue samples ($n=26$) collected from sleeper sharks
Alaska skate tagging	Spaghetti tagging and release of all Alaska skates. Record sex, length, weight and tag number	Olav Ormseth, Gerald Hoff (AFSC)	131 Alaska skates were tagged and released across the survey area

Table 4. - Continued.

Project Title	Project Description	Affiliation	Data/Samples Collected
Skate eggs & juvenile data	Retain and preserve all specified skate egg cases encountered. Measure all juvenile skates (<300 mm TL) disc width, total length and filament length	Gerald Hoff (AFSC)	173 juvenile skates were measured and egg cases were collected identified to <i>B. trachura</i> ($n=116$), <i>B. minispinosa</i> ($n=23$), <i>B. lindbergi/maculata</i> ($n=16$), <i>B. taranetzi</i> ($n=14$), <i>B. abyssicola</i> ($n=7$), and <i>Bathyraja</i> species ($n=4$)
Octopus data collection	Collection of mantle lengths and sex on all octopus species	Liz Connors (AFSC)	Mantle lengths and sex were taken on approximately 214 octopus. The dominant species were <i>Benthoctopus leioderma</i> ($n=78$), <i>B. salebrosus</i> ($n=63$), <i>Octopus dofleini</i> ($n=57$)
Squid data collection	Collection of mantle lengths on all squid species	Olav Ormseth (AFSC)	Mantle lengths were collected on approximately 1260 squid with the dominant species being <i>Berryteuthis magister</i> ($n=1092$) and <i>Gonatopsis borealis</i> ($n=122$)
Snailfish taxonomy & food habits	Collection of tissue samples, specimens, and stomachs of selected snailfish species	Jay Orr (AFSC)	>100 specimens of 26 species of snailfish were collected
Outreach/fishermans festival	Collection of selected fish and invertebrate specimens used for public outreach and teaching and display at Fishermans festival	Jason Connor (AFSC)	2 specimens each of a variety of commercial and unusual fish and invertebrate species were frozen
Ocular muscle of deep-sea fishes	Collection of intact eyes of selected deepsea fishes for a study on the development and neurophysiology of the optic nerve	Christina Wahl (Wells College), Lyle Britt (AFSC)	5 specimens each were collected and preserved in 10% formalin of <i>Bathylagus milleri</i> , <i>B. pacificus</i> , <i>B. ochotensis</i> , and <i>Euroglossus schmidti</i>
DNA barcoding of Alaska fishes	Collection of selected fish species from Alaska for generic barcoding project	Mike Canino (AFSC), Linda Parks (NWFSC)	5 specimens each were collected (frozen) of <i>Coryphaenoides acrolepis</i> , <i>Sebastodes borealis</i> , <i>Sebastes aleutianus</i> , <i>Sebastes melanostictus</i>
Sightings of short-tail Albatross	Report sightings of endangered short-tail Albatross including time, location and maturity	Shannon Fitzgerald (AFSC), Greg Balogh (USFWS)	7 sightings of short-tail albatross were reported
Trophic interactions & feeding ecology	Collections of stomach contents of selected fish species and preserved at sea for later analysis	Kerim Aydin, Troy Buckley (AFSC)	see Table 7 for numbers by species of stomach samples that were collected during the survey
Gadoid liver seasonal energy reserves	Collections of selected gadoid fishes to be frozen for later liver energy reserve analysis	Troy Buckley, Olav Ormseth (AFSC)	<i>Albatrossia pectoralis</i> ($n=59$, 28 female, 31 male) <i>Gadus macrocephalus</i> ($n=29$, 12 female, 17 male) <i>Theragra chalcogramma</i> ($n=41$, 21 female, 20 male)
Energy content & diet of EBS slope forage fishes	Collections of selected forage fish for later examination of energy content and diet analysis	Kerim Aydin, Troy Buckley, Anne Hollowed, Ron Heintz (AFSC)	<i>Leuroglossus schmidti</i> ($n=190$), <i>Stenobrachius leucopsarus</i> ($n=170$), <i>Stenobrachius</i> sp. ($n=46$), <i>Thaleichthys pacificus</i> ($n=52$), <i>Diaphus theta</i> ($n=2$), <i>Bathylagus</i> sp. ($n=87$), Myctophidae ($n=40$), <i>Lampanyctus jordani</i> ($n=1$), <i>Nanobranchius regale</i> ($n=4$), <i>Stenobrachius nanochir</i> ($n=7$)

Table 5A. -- Alphabetical list by common name of all fish and invertebrates encountered on the 2008 EBSS survey.

Common Name	Species/Taxon
Alaska eelpout	<i>Bothrocara pusillum</i>
Alaska skate	<i>Bathyraja parmifera</i>
Alaska skate egg case	<i>Bathyraja parmifera</i> egg case
Alaska snailfish	<i>Careproctus colletti</i>
Alaska volute	<i>Arctomelon stearnsii</i>
Alaskan hermit	<i>Pagurus ochotensis</i>
Alaskan pink shrimp	<i>Pandalus eos</i>
Aleutian alligatorfish	<i>Aspidophoroides bartoni</i>
Aleutian skate	<i>Bathyraja aleutica</i>
Aleutian skate egg case	<i>Bathyraja aleutica</i> egg case
Arctic argid	<i>Argis dentata</i>
argid shrimp species	<i>Argis</i> species
arrowtooth flounder	<i>Atheresthes stomias</i>
articulated bamboo coral	<i>Isidella</i> species
Atka mackerel	<i>Pleurogrammus monopterygius</i>
bamboo coral species	Isididae unid.
barracudina species	Paralepididae
barrel sponge	<i>Halichondria panicea</i>
barreleye	<i>Macropinna microstoma</i>
basketstar	<i>Gorgonocephalus eucnemis</i>
Bering eelpout	<i>Lycodes beringi</i>
Bering skate	<i>Bathyraja interrupta</i>
Bering skate egg case	<i>Bathyraja interrupta</i> egg case
Berry armhook squid	<i>Gonatus berryi</i>
bigeye smooth head	<i>Bajacalifornia megalops</i>
bigmouth sculpin	<i>Hemitripterus bolini</i>
blackfin poacher	<i>Bathyagonus nigripinnis</i>
blackfin snailfish	<i>Careproctus cypselurus</i>
blackline snipe eel	<i>Avocettina infans</i>
blacklip snailfish	<i>Elassodiscus tremebundus</i>
blacknose sculpin	<i>Icelus canaliculatus</i>
blacksmelt species	<i>Bathylagus</i> species
blackspined sea star	<i>Lethasterias nanimensis</i>
blackspotted rockfish	<i>Sebastes melanostictus</i>
blacktail snailfish	<i>Careproctus melanurus</i>
blob sculpin	<i>Psychrolutes phrictus</i>
blotched snailfish	<i>Crystallichthys cyclospilus</i>
boreal astarte	<i>Astarte borealis</i>
boreopacific armhook squid	<i>Gonatopsis borealis</i>
Bowers Bank snailfish	<i>Careproctus bowersianus</i>
brisigid sea star	Brisingidae
bristlemouth species	Gonostomatidae
brittle star species	<i>Astrochele laevis</i>
brittle star species	<i>Stegophiura ponderosa</i>
brittle star species	<i>Ophiacantha normani</i>
brittle star species	<i>Ophiacantha</i> species
brittle star species	<i>Ophiopholis</i> species

Table 5A. -- Continued.

Common Name	Species/Taxon
broadfin snailfish	<i>Paraliparis pectoralis</i>
broadfin thornyhead	<i>Sebastolobus macrochir</i>
brokenline lampfish	<i>Lampanyctus jordani</i>
California headlightfish	<i>Diaphus theta</i>
California lamp shell	<i>Laqueus californianus</i>
cannonball sun star	<i>Heterozonias alternatus</i>
caridid shrimp unid.	Caridea unid.
chestnut whelk	<i>Buccinum castaneum</i>
chevron-tentacled anemone	<i>Cribrinopsis fernaldi</i>
chrysaora jellyfish	<i>Chrysaora melanaster</i>
chum salmon	<i>Oncorhynchus keta</i>
clam species	<i>Yoldia</i> species
clam species	<i>Clinocardium</i> species
clawed armhook squid	<i>Gonatus onyx</i>
clay pipe sponge	<i>Aphrocallistes vastus</i>
cloud sponge	<i>Rhabdocalyptus</i> species
comb jelly species	<i>Beroe</i> species
comic snailfish	<i>Careproctus comus</i>
Commander skate	<i>Bathyraja lindbergi</i>
Commander skate egg case	<i>Bathyraja lindbergi</i> egg case
common mud star	<i>Ctenodiscus crispatus</i>
common northern feather star	<i>Florometra asperrima</i>
coral species	<i>Lillipathes</i> species B (Clark, 2006)
coral species	<i>Swiftia beringi</i>
coral species	<i>Amphilaphis</i> species
costate whelk	<i>Buccinum costatum</i>
cowardly anemone	<i>Stomphia didemon</i>
crangonid shrimp species	<i>Crangon</i> species
crested bigscale	<i>Poromitra curilensis</i>
crested sea star	<i>Lophaster furcilliger</i>
crested star	<i>Lophaster vexator</i>
crimson pasiphaeid	<i>Pasiphaea tarda</i>
crusty tube sponge	<i>Heterochone tenerum</i>
darkfin sculpin	<i>Malacobottus zonurus</i>
deep sea papillate cucumber	<i>Pannychia moseleyi</i>
deepsea eualid	<i>Eualus biunguis</i>
deepsea skate	<i>Bathyraja abyssicola</i>
deepsea skate egg case	<i>Bathyraja abyssicola</i> egg case
deepsea sole	<i>Embassichthys bathybius</i>
deepwater bigeye	<i>Pandalopsis ampla</i>
Dover sole	<i>Microstomus pacificus</i>
dreamer species	<i>Oneirodes</i> species
Alaska dreamer	<i>Oneirodes thompsoni</i>
dusky rockfish	<i>Sebastes variabilis</i>
eastern Pacific bobtail	<i>Rossia pacifica</i>
ebony eelpout	<i>Lycodes concolor</i>
echiuroid worm species	<i>Echiura</i>
eelpout species	<i>Lycenchelys</i> species
eelpout species	<i>Lycodes</i> species
eelpout species	<i>Bothrocara</i> species
eelpout species	<i>Lycodapus</i> species
egg yolk jelly	<i>Phacellophora camtschatica</i>
emarginate snailfish	<i>Careproctus furcellus</i>

Table 5A. -- Continued.

Common Name	Species/Taxon
empty bivalve shells	Bivalvia
empty gastropod shells	Gastropoda
encrusting coral	<i>Clavularia incrassata</i>
eulachon	<i>Thaleichthys pacificus</i>
eualid shrimp species	<i>Eualus</i> species
euphausiid species	Euphausiacea
fat whelk	<i>Neptunea ventricosa</i>
fiery armhook squid	<i>Gonatus pyros</i>
firm finger sponge	<i>Plicatellopsis amphispicula</i>
fish eggs species	Osteichthyes eggs
Fisher sun star	<i>Solaster</i> species F (Clark)
flabby sculpin	<i>Zesticulus profundorum</i>
flapjack devilfish	<i>Opisthoteuthis californiana</i>
flathead sole	<i>Hippoglossoides elassodon</i>
fuzzy hermit crab	<i>Pagurus trigonocheirus</i>
garnet lampfish	<i>Stenobrachius nannochir</i>
giant barnacle	<i>Balanus evermanni</i>
giant grenadier	<i>Albatrossia pectoralis</i>
giant octopus	<i>Octopus dofleini</i>
giant orange tochui	<i>Tochuina tetraquetra</i>
giant red mysid	<i>Neognathophausia gigas</i>
gigantic anemone	<i>Metridium farcimen</i>
golden king crab	<i>Lithodes aequispinus</i>
graceful decorator crab	<i>Oregonia gracilis</i>
grand snailfish	<i>Paraliparis grandis</i>
grape anemone	<i>Oractis diomedae</i>
great sculpin	<i>Myoxocephalus polyacanthocephalus</i>
green papillate sponge	<i>Latrunculia</i> species A (Clark, 2006)
green sea urchin	<i>Strongylocentrotus droebachiensis</i>
Greenland turbot	<i>Reinhardtius hippoglossoides</i>
grenadier species	<i>Coryphaenoides</i> species
grooved sea star	<i>Crossaster borealis</i>
grooved Tanner crab	<i>Chionoecetes tanneri</i>
hairy-lure dreamer	<i>Oneirodes bulbosus</i>
hat sponge	<i>Phakellia beringensis</i>
heart urchin	<i>Brisaster latifrons</i>
hermit crab species	<i>Pagurus</i> species
hermit crab species	<i>Pagurus cornutus</i>
highsnout bigscale	<i>Melamphaes lugubris</i>
horsehair crab	<i>Erimacrus isenbeckii</i>
humpback snailfish	<i>Elassodiscus caudatus</i>
hybrid Tanner crab	<i>Chionoecetes</i> hybrid
hydroid species	Hydrozoa
jellyfish species	Scyphozoa
jellyfish species	<i>Periphylla periphylla</i>
jellyfish species	<i>Aequorea</i> species
jellyfish species	<i>Atolla</i> species
Kamchatka coral	<i>Paragorgia arborea</i>
Kamchatka eelpout	<i>Lycenchelys camchatica</i>
Kamchatka flounder	<i>Atheresthes evermanni</i>
keeled aforia	<i>Aforia circinata</i>
king crab species	<i>Paralomis verrilli</i>
king crab species	<i>Paralomis</i> species A (Clark, 2006)

Table 5A. -- Continued.

Common Name	Species/Taxon
king crab species	<i>Paralomis multispina</i>
knobbyhand hermit	<i>Pagurus confragosus</i>
kuro argid	<i>Argis lar</i>
ladder whelk	<i>Buccinum scalariforme</i>
lamellarid	Lamellaridae
lampfish species	<i>Stenobrachius</i> species
lampfish species	<i>Lampanyctus</i> species
lanternfish species	Myctophidae
lebbeid shrimp species	<i>Lebbeus</i> species
lion's mane	<i>Cyanea capillata</i>
longfin dragonfish	<i>Tactostoma macropus</i>
longhorned decorator crab	<i>Chorilia longipes</i>
longnose lancetfish	<i>Alepisaurus ferox</i>
longnose skate	<i>Raja rhina</i>
longsnout prickleback	<i>Lumpenella longirostris</i>
lyre whelk	<i>Neptunea lyrata</i>
magistrate armhook squid	<i>Berryteuthis magister</i>
mollusc species	<i>Neomenia</i> species
mud skate	<i>Bathyraja taranetzi</i>
mud skate egg case	<i>Bathyraja taranetzi</i> egg case
Murray sea pen	<i>Anthoptilum murrayi</i>
mysid shrimp species	<i>Neognathophausia</i> species
mysid species	Mysidacea
northern horsemussel	<i>Modiolus modiolus</i>
northern lampfish	<i>Stenobrachius leucopsarus</i>
northern pearleye	<i>Benthabella dentata</i>
northern rock sole	<i>Lepidopsetta polyxystra</i>
northern rockfish	<i>Sebastes polypinus</i>
northern sea star	<i>Dipsacaster borealis</i>
northern smoothtongue	<i>Leuroglossus schmidti</i>
northern sun sea star	<i>Solaster endeca</i>
notched brittlestar	<i>Ophiura sarsi</i>
nudibranch species	Nudibranchia
nudibranch species	<i>Tritonia</i> species
ocean shrimp	<i>Pandalus jordani</i>
octopus species	<i>Octopus</i> species
octopus species	<i>Japatella diaphana</i>
octopus species	<i>Graneledone</i> species cf. <i>boreopacifica</i> (Nesis)
octopus species	<i>Benthoctopus</i> species
octopus species	<i>Benthoctopus salebrosus</i>
octopus species	<i>Benthoctopus oregonensis</i>
orange actinistolid	<i>Sycionis</i> species A (Clark, 2006)
orange-pink sea urchin	<i>Allocentrotus fragilis</i>
Oregon triton	<i>Fusitriton oregonensis</i>
Oregon triton eggs	<i>Fusitriton oregonensis</i> eggs
Pacific ambereye	<i>Hymenodora frontalis</i>
Pacific blacksmelt	<i>Bathylagus pacificus</i>
Pacific cod	<i>Gadus macrocephalus</i>
Pacific colga	<i>Colga pacifica</i>
Pacific flatnose	<i>Antimora microlepis</i>
Pacific glass shrimp	<i>Pasiphaea pacifica</i>
Pacific grenadier	<i>Coryphaenoides acrolepis</i>
Pacific halibut	<i>Hippoglossus stenolepis</i>

Table 5A. -- Continued.

Common Name	Species/Taxon
Pacific herring	<i>Clupea pallasi</i>
Pacific lamprey	<i>Lampetra tridentata</i>
Pacific lyre crab	<i>Hyas lyratus</i>
Pacific ocean perch	<i>Sebastes alutus</i>
Pacific sergestid	<i>Sergestes similis</i>
Pacific sleeper shark	<i>Somniosus pacificus</i>
Pacific viperfish	<i>Chauliodus macouni</i>
pale moonsnail	<i>Euspira pallidus</i>
pasiphaeid shrimp species	Pasiphaeidae
pinchbug	<i>Munida quadrispina</i>
pincushion sea star	<i>Diplopteraster multipes</i>
pink rose star	<i>Crossaster</i> species B (Clark)
pink salmon	<i>Oncorhynchus gorbuscha</i>
pinpoint lampfish	<i>Nannobrachium regale</i>
polychaete worm species	Polychaeta
popeye blacksmelt	<i>Bathylagus ochotensis</i>
popeye grenadier	<i>Coryphaenoides cinereus</i>
Pribilof whelk	<i>Neptunea pribiloffensis</i>
prickleback species	<i>Bryozoichthys</i> species
proboscis snailfish	<i>Careproctus simus</i>
prowfish	<i>Zaprora silenus</i>
purple hermit	<i>Elassochirus cavimanus</i>
purple striated sea anemone	Actiniaria
pygmy snailfish	<i>Lipariscus nanus</i>
ragfish	<i>Icosteus aenigmaticus</i>
red snailfish	<i>Paraliparis dactylosus</i>
red striped sea anemone	Actiniaria
red tree coral	<i>Primnoa willeyi</i>
redbanded rockfish	<i>Sebastes babcocki</i>
reticulate anemone	<i>Actinauge verrillii</i>
rex sole	<i>Glyptocephalus zachirus</i>
ribbed bryozoan	<i>Rhamphostomella costata</i>
robust blacksmelt	<i>Bathylagus milleri</i>
Roger's buccinid	<i>Bathybuccinum clarki</i>
rose sea star	<i>Crossaster papposus</i>
rosy tritonia	<i>Tritonia diomedea</i>
rough China hat sponge	<i>Neoesperiopsis infundibula</i>
rough purple sea anemone	<i>Paractinostola faeculenta</i>
rougheye rockfish	<i>Sebastes aleutianus</i>
roughtail skate	<i>Bathyraja trachura</i>
roughtail skate egg case	<i>Bathyraja trachura</i> egg case
rusty snailfish	<i>Paraliparis</i> species cf. <i>pectoralis</i>
sablefish	<i>Anoplopoma fimbria</i>
salmon snailfish	<i>Careproctus rastrinus</i>
salp species	Thaliacea
sandy sea cucumber	<i>Pseudostichopus mollis</i>
sawback poacher	<i>Leptagonus frenatus</i>
scallop species	<i>Chlamys</i> species
scarlet king crab	<i>Lithodes couesi</i>
scarlet sea star	<i>Pseudarchaster parelii</i>
sea anemone species	Actiniaria
sea anemone species	Actinostolidae
sea anemone species	<i>Actinoscypnia</i> species

Table 5A. -- Continued.

Common Name	Species/Taxon
sea anemone species	<i>Corallimorphus</i> species
sea anemone species	<i>Stomphia</i> species
sea anemone species	<i>Actinistola</i> species A (Clark, 2006)
sea cucumber species	Holothuroidea
sea cucumber species	Cucumaria
sea cucumber species	<i>Bathyplotes</i> species
sea cucumber species	<i>Synallactes</i> species A (Clark, 2006)
sea cucumber species	<i>Synallactes</i> species
sea mouse species	<i>Aphrodita</i> species
sea spider species	Pycnogonida
sea star species	<i>Stephanasterias albula</i>
sea star species	<i>Henricia</i> species
sea star species	<i>Henricia asthenactis</i>
sea star species	<i>Hippasteria</i> species
sea star species	<i>Hippasteria californica</i>
sea star species	<i>Cryptopeltaster lepidonotus</i>
sea star species	<i>Mediaster tenellus</i>
sea star species	<i>Ceramaster</i> species
sea star species	<i>Solaster</i> species
sea star species	<i>Solaster</i> species A (Clark, 1997)
sea star species	<i>Crossaster</i> species
sea star species	<i>Pteraster</i> species
sea star species	<i>Pteraster</i> species A (Clark, 1999)
sea star species	<i>Pteraster tesselatus</i>
sea star species	<i>Pteraster jordani</i>
sea star species	<i>Leptychaster pacificus</i>
sea star species	<i>Nearchaster variabilis</i>
sea star species	<i>Nearchaster</i> species
sea star species	<i>Zoraster evermanni</i>
sea star species	<i>Myxoderma sacculatum</i>
sea urchin species	<i>Strongylocentrotus</i> species
sea whip species	Virgulariidae
sea whip species	<i>Halipteris willemoesi</i>
searcher	<i>Bathymaster signatus</i>
serpent sea star	<i>Asteronyx loveni</i>
shadow eelpout	<i>Bothrocara nyx</i>
shining tubeshoulder	<i>Sagamichthys abei</i>
shortraker rockfish	<i>Sebastes borealis</i>
shortspine thornyhead	<i>Sebastolobus alascanus</i>
shrimp species	Shrimp species
shrimp species	<i>Anuropus bathypelagica</i>
shrimp species	<i>Pandalopsis longirostris</i>
shrimp species	<i>Notostomus</i> species
shrimp species	<i>Bentheogenennema borealis</i>
sidestripe shrimp	<i>Pandalopsis dispar</i>
sinuous whelk	<i>Buccinum plectrum</i>
skate egg case species	<i>Bathyraja</i> species egg case
slender codling	<i>Halargyreus johnsonii</i>
slender fangjaw	<i>Sigmops gracilis</i>
slim snailfish	<i>Rhinoliparis attenuatus</i>
smalldisk snailfish	<i>Careproctus giberti</i>
smooth lump sucker	<i>Aptocyclus ventricosus</i>
smoothskin octopus	<i>Benthoctopus leioderma</i>

Table 5A. -- Continued.

Common Name	Species/Taxon
smoothstem seawhip	<i>Virgularia</i> species
snail egg species	gastropod eggs
snail egg species	<i>Buccinum</i> species eggs
snail egg species	<i>Neptunea</i> species eggs
snail eggs species	<i>Pyrulofusus</i> species eggs
snail species	<i>Neptunea</i> species
snail species	<i>Colus martensi</i>
snail species	<i>Colus jordani</i>
snail species	<i>Pyrulofusus</i> species
snail species	<i>Pyrulofusus melonis</i>
snail species	<i>Beringius frielei</i>
snail species	<i>Plicifusus kroyeri</i>
snail species	<i>Otukaia kiheiziebisu</i>
snail species	<i>Buccinum</i> species
snailfish species	Liparidinae
snailfish species	<i>Elassodiscus</i> species
snailfish species	<i>Careproctus</i> species
snailfish species	<i>Paraliparis ulochir</i>
snailfish species	<i>Careproctus</i> species G
snailfish species	<i>Paraliparis</i> species
snailfish species	<i>Paraliparis</i> species cf. <i>dactylosus</i>
snailfish species	<i>Paraliparis</i> species cf. <i>dipterus</i>
snakehead eelpout	<i>Lycenchelys crotalinus</i>
snow crab	<i>Chionoecetes opilio</i>
snubnosed spiny eel	<i>Notacanthus chemnitzii</i>
soft coral species	<i>Anthomastus</i> species
soft finger sponge	<i>Neoesperiopsis rigida</i>
spatulate sculpin	<i>Icelus spatula</i>
spectacled sculpin	<i>Triglops scepticus</i>
spider crab species	Majidae
spiny dogfish	<i>Squalus acanthias</i>
spiny lebbeid	<i>Lebbeus groenlandicus</i>
spiny red sea star	<i>Hippasteria spinosa</i>
spiny snailfish	<i>Acantholiparis opercularis</i>
spinyhead sculpin	<i>Dasycottus setiger</i>
spinyridge shrimp	<i>Notostomus japonicus</i>
splendid hermit	<i>Labidochirus splendescens</i>
sponge hermit	<i>Pagurus brandti</i>
sponge species	Porifera
sponge species	<i>Polymastia</i> species
sponge species	Yellow papillate sponge
squid species	Teuthoidea
squid species	<i>Gonatus</i> species
squid species	Gonatidae
squid species	<i>Eogonatus tinro</i>
squid species	<i>Galiteuthis phyllura</i>
squid species	<i>Chiroteuthis calyx</i>
squid species	<i>Taonius pavo</i>
stone crab species	Lithodidae
striped sea leech	<i>Notostombodella cyclostomum</i>
sweet sea potato	<i>Molpadia intermedia</i>
swellhead snailfish	<i>Paraliparis cephalus</i>
Swift's sea star	<i>Gephyreaster swifti</i>

Table 5A. -- Continued.

Common Name	Species/Taxon
swimming anemone	<i>Stomphia coccinea</i>
swollen whelk	<i>Buccinum oedematum</i>
tabled whelk	<i>Neptunea tabulata</i>
Tanner crab	<i>Chionoecetes bairdi</i>
tentacle-shedding anemone	<i>Liponema brevicornis</i>
thorny sculpin	<i>Icelus spiniger</i>
three-ribbed whelk	<i>Ancistrolepis eucosmius</i>
Townsend hermit crab	<i>Pagurus townsendi</i>
tree sponge	<i>Mycale loveni</i>
tree sponge species	<i>Mycale</i> species
triangle Tanner crab	<i>Chionoecetes angulatus</i>
tunicate species	Ascidian
twoline eelpout	<i>Bothrocara brunneum</i>
twospine crangon	<i>Crangon communis</i>
ubiquitous brittle star	<i>Ophiopholis aculeata</i>
Vancouver scallop	<i>Delectopecten vancouverensis</i>
vase sponge	<i>Aulosaccus schulzei</i>
vermillion sea star	<i>Mediaster aequalis</i>
walleye pollock	<i>Theragra chalcogramma</i>
warped whelk	<i>Pyrulofusus deformis</i>
western eelpout	<i>Bothrocara zestum</i>
white neptune	<i>Neptunea amianta</i>
white sea urchin	<i>Strongylocentrotus pallidus</i>
whiteblotched skate	<i>Bathyraja maculata</i>
whiteblotched skate egg case	<i>Bathyraja maculata</i> egg case
whitebrow skate	<i>Bathyraja minispinosa</i>
whitebrow skate egg case	<i>Bathyraja minispinosa</i> egg case
whitescaled sea cucumber	<i>Psolus squamatus</i>
wide-eye sculpin	<i>Icelus euryops</i>
worm species	<i>Serpula</i> species
wrinkled star	<i>Pteraster militaris</i>
yellow Irish lord	<i>Hemilepidotus jordani</i>
yellow leafy sponge	<i>Leucosolenia blanca</i>
yellowleg pandalid	<i>Pandalus tridens</i>

Table 5B. -- Alphabetical list by scientific name of all fish and invertebrates encountered on the 2008 EBSS survey.

Species/Taxon	Common Name
<i>Acantholiparis opercularis</i>	spiny snailfish
<i>Actinauge verrillii</i>	reticulate anemone
Actiniaria	purple striated sea anemone
Actiniaria	red striated sea anemone
Actiniaria	sea anemone species
<i>Actinistola</i> species A (Clark, 2006)	sea anemone species
<i>Actinoscyphia</i> species	sea anemone species
Actinostolidae	sea anemone species
<i>Aequorea</i> species	jellyfish species
<i>Aforia circinata</i>	keeled aforia
<i>Albatrossia pectoralis</i>	giant grenadier
<i>Alepisaurus ferox</i>	longnose lancetfish
<i>Allocentrotus fragilis</i>	orange-pink sea urchin
<i>Amphilaphis</i> species	coral species
<i>Ancistrolepis eucosmius</i>	three-ribbed whelk
<i>Anoplopoma fimbria</i>	sablefish
<i>Anthomastus</i> species	soft coral species
<i>Anthoptilum murrayi</i>	Murray sea pen
<i>Antimora microlepis</i>	Pacific flatnose
<i>Anuropus bathypelagica</i>	shrimp species
<i>Aphrocallistes vastus</i>	clay pipe sponge
<i>Aphrodita</i> species	sea mouse species
<i>Aptocyclus ventricosus</i>	smooth lump sucker
<i>Arctomelon stearnsii</i>	Alaska volute
<i>Argis dentata</i>	Arctic argid
<i>Argis lar</i>	kuro argid
<i>Argis</i> species	argid shrimp species
Ascidian	tunicate species
<i>Aspidophoroides bartoni</i>	Aleutian alligatorfish
<i>Astarte borealis</i>	boreal astarte
<i>Asteronyx loveni</i>	serpent sea star
<i>Astrochele laevis</i>	brittle star species
<i>Atheresthes evermanni</i>	Kamchatka flounder
<i>Atheresthes stomias</i>	arrowtooth flounder
<i>Atolla</i> species	jellyfish species
<i>Aulosaccus schulzei</i>	vase sponge
<i>Avocettina infans</i>	blackline snipe eel
<i>Bajacalifornia megalops</i>	bigeye smooth head
<i>Balanus evermanni</i>	giant barnacle
<i>Bathyagonus nigripinnis</i>	blackfin poacher
<i>Bathybuccinum clarki</i>	Roger's buccinid
<i>Bathylagus milleri</i>	robust blacksmelt
<i>Bathylagus ochotensis</i>	popeye blacksmelt
<i>Bathylagus pacificus</i>	Pacific blacksmelt
<i>Bathylagus</i> species	blacksmelt species
<i>Bathymaster signatus</i>	searcher
<i>Bathyplotes</i> species	sea cucumber species
<i>Bathyraja abyssicola</i>	deepsea skate

Table 5B. -- Continued.

Species/Taxon	Common Name
<i>Bathyraja abyssicola</i> egg case	deepsea skate egg case
<i>Bathyraja aleutica</i>	Aleutian skate
<i>Bathyraja aleutica</i> egg case	Aleutian skate egg case
<i>Bathyraja interrupta</i>	Bering skate
<i>Bathyraja interrupta</i> egg case	Bering skate egg case
<i>Bathyraja lindbergi</i>	Commander skate
<i>Bathyraja lindbergi</i> egg case	Commander skate egg case
<i>Bathyraja maculata</i>	whiteblotched skate
<i>Bathyraja maculata</i> egg case	whiteblotched skate egg case
<i>Bathyraja minispinosa</i>	whitebrow skate
<i>Bathyraja minispinosa</i> egg case	whitebrow skate egg case
<i>Bathyraja parmifera</i>	Alaska skate
<i>Bathyraja parmifera</i> egg case	Alaska skate egg case
<i>Bathyraja</i> species egg case	skate egg case species
<i>Bathyraja taranetzi</i>	mud skate
<i>Bathyraja taranetzi</i> egg case	mud skate egg case
<i>Bathyraja trachura</i>	roughtail skate
<i>Bathyraja trachura</i> egg case	roughtail skate egg case
<i>Benthalbella dentata</i>	northern pearleye
<i>Bentheogennema borealis</i>	shrimp species
<i>Benthocotpus leioderma</i>	smoothskin octopus
<i>Benthocotpus oregonensis</i>	octopus species
<i>Benthocotpus salebrosus</i>	octopus species
<i>Benthocotpus</i> species	octopus species
<i>Beringius frielei</i>	snail species
<i>Beroe</i> species	comb jelly species
<i>Berryteuthis magister</i>	magistrate armhook squid
Bivalvia	empty bivalve shells
<i>Bothrocara brunneum</i>	twoline eelpout
<i>Bothrocara nyx</i>	shadow eelpout
<i>Bothrocara pusillum</i>	Alaska eelpout
<i>Bothrocara</i> species	eelpout species
<i>Bothrocara zestum</i>	western eelpout
<i>Brisaster latifrons</i>	heart urchin
Brisingidae	brisiding sea star
<i>Bryozoichthys</i> species	prickleback species
<i>Buccinum castaneum</i>	chestnut whelk
<i>Buccinum costatum</i>	costate whelk
<i>Buccinum oedematum</i>	swollen whelk
<i>Buccinum plectrum</i>	sinuous whelk
<i>Buccinum scalariforme</i>	ladder whelk
<i>Buccinum</i> species	snail species
<i>Buccinum</i> species eggs	snail egg species
<i>Careproctus bowersianus</i>	Bowers Bank snailfish
<i>Careproctus colletti</i>	Alaska snailfish
<i>Careproctus comus</i>	comic snailfish
<i>Careproctus cypselurus</i>	blackfin snailfish
<i>Careproctus furcellus</i>	emarginate snailfish
<i>Careproctus gilberti</i>	smalldisk snailfish
<i>Careproctus melanurus</i>	blacktail snailfish
<i>Careproctus rastrinus</i>	salmon snailfish
<i>Careproctus simus</i>	proboscis snailfish
<i>Careproctus</i> species	snailfish species

Table 5B. -- Continued.

Species/Taxon	Common Name
<i>Careproctus</i> species G	snailfish species
Caridea unid.	caridid shrimp unid.
<i>Ceramaster</i> species	sea star species
<i>Chauliodus macouni</i>	Pacific viperfish
<i>Chionoecetes angulatus</i>	triangle Tanner crab
<i>Chionoecetes bairdi</i>	Tanner crab
<i>Chionoecetes hybrid</i>	hybrid Tanner crab
<i>Chionoecetes opilio</i>	snow crab
<i>Chionoecetes tanneri</i>	grooved Tanner crab
<i>Chiroteuthis calyx</i>	squid species
<i>Chlamys</i> species	scallop species
<i>Chorilia longipes</i>	longhorned decorator crab
<i>Chrysaora melanaster</i>	chrysaora jellyfish
<i>Clavularia incrassata</i>	encrusting coral
<i>Clinocardium</i> species	clam species
<i>Clupea pallasi</i>	Pacific herring
<i>Colga pacifica</i>	Pacific colga
<i>Colus jordani</i>	snail species
<i>Colus martensi</i>	snail species
<i>Corallimorphus</i> species	sea anemone species
<i>Coryphaenoides acrolepis</i>	Pacific grenadier
<i>Coryphaenoides cinereus</i>	popeye grenadier
<i>Coryphaenoides</i> species	grenadier species
<i>Crangon communis</i>	twospine crangon
<i>Crangon</i> species	crangonid shrimp species
<i>Cribrocnopsis fernaldi</i>	chevron-tentacled anemone
<i>Crossaster borealis</i>	grooved sea star
<i>Crossaster papposus</i>	rose sea star
<i>Crossaster</i> species	sea star species
<i>Crossaster</i> species B (Clark)	pink rose star
<i>Cryptopeltaster lepidonotus</i>	sea star species
<i>Crystallichthys cyclospilus</i>	blotched snailfish
<i>Ctenodiscus crispatus</i>	common mud star
<i>Cucumaria</i>	sea cucumber species
<i>Cyanea capillata</i>	lion's mane
<i>Dasycottus setiger</i>	spinyhead sculpin
<i>Delectopecten vancouverensis</i>	Vancouver scallop
<i>Diaphus theta</i>	California headlightfish
<i>Diplopteraster multiplex</i>	pincushion sea star
<i>Dipsacaster borealis</i>	northern sea star
Echiura	echiuroid worm species
<i>Elassochirus cavimanus</i>	purple hermit
<i>Elassodiscus caudatus</i>	humpback snailfish
<i>Elassodiscus</i> species	snailfish species
<i>Elassodiscus tremebundus</i>	blacklip snailfish
<i>Embassichthys bathybius</i>	deepsea sole
<i>Egonatus tinro</i>	squid species
<i>Erimacrus isenbeckii</i>	horsehair crab
<i>Eualus biunguis</i>	deepsea eualid
<i>Eualus</i> species	eualid shrimp species
Euphausiacea	euphausiid species
<i>Euspira pallidus</i>	pale moonsnail
<i>Florometra asperrima</i>	common northern feather star

Table 5B. -- Continued.

Species/Taxon	Common Name
<i>Fusitriton oregonensis</i>	Oregon triton
<i>Fusitriton oregonensis</i> eggs	Oregon triton eggs
<i>Gadus macrocephalus</i>	Pacific cod
<i>Galiteuthis phyllura</i>	squid species
gastropod eggs	snail egg species
Gastropoda	empty gastropod shells
<i>Gephyreaster swifti</i>	Swift's sea star
<i>Glyptocephalus zachirus</i>	rex sole
Gonatidae	squid species
<i>Gonatopsis borealis</i>	boreopacific armhook squid
<i>Gonatus berryi</i>	Berry armhook squid
<i>Gonatus onyx</i>	clawed armhook squid
<i>Gonatus pyros</i>	fiery armhook squid
<i>Gonatus</i> species	squid species
Gonostomatidae	bristlemouth species
<i>Gorgonocephalus eucnemis</i>	basketstar
<i>Graneledone</i> species cf. <i>boreopacifica</i>	octopus species
<i>Halargyreus johnsonii</i>	slender codling
<i>Halichondria panicea</i>	barrel sponge
<i>Halipteris willemoesi</i>	sea whip species
<i>Hemilepidotus jordani</i>	yellow Irish lord
<i>Hemitripterus bolini</i>	bigmouth sculpin
<i>Henricia asthenactis</i>	sea star species
<i>Henricia</i> species	sea star species
<i>Heterochone tenerum</i>	crusty tube sponge
<i>Heterozonias alternatus</i>	cannonball sun star
<i>Hippasteria californica</i>	sea star species
<i>Hippasteria</i> species	sea star species
<i>Hippasteria spinosa</i>	spiny red sea star
<i>Hippoglossoides elassodon</i>	flathead sole
<i>Hippoglossus stenolepis</i>	Pacific halibut
Holothuroidea	sea cucumber species
<i>Hyas lyratus</i>	Pacific lyre crab
Hydrozoa	hydroid species
<i>Hymenodora frontalis</i>	Pacific ambereye
<i>Icelus canaliculatus</i>	blacknose sculpin
<i>Icelus euryops</i>	wide-eye sculpin
<i>Icelus spatula</i>	spatulate sculpin
<i>Icelus spiniger</i>	thorny sculpin
<i>Icosteus aenigmaticus</i>	ragfish
<i>Isidella</i> species	articulated bamboo coral
Isididae unid.	bamboo coral species
<i>Japatella diaphana</i>	octopus species
<i>Labidochirus splendescens</i>	splendid hermit
Lamellaridae	lamellarid
<i>Lampanyctus jordani</i>	brokenline lampfish
<i>Lampanyctus</i> species	lampfish species
<i>Lampetra tridentata</i>	Pacific lamprey
<i>Laqueus californianus</i>	California lamp shell
<i>Latrunculia</i> species A (Clark, 2006)	green papillate sponge
<i>Lebbeus groenlandicus</i>	spiny lebbeid
<i>Lebbeus</i> species	lebbeid shrimp species
<i>Lepidopsetta polyxystra</i>	northern rock sole

Table 5B. -- Continued.

Species/Taxon	Common Name
<i>Leptagonus frenatus</i>	sawback poacher
<i>Leptychaster pacificus</i>	sea star species
<i>Lethasterias nanimensis</i>	blackspined sea star
<i>Leucosolenia blanca</i>	yellow leafy sponge
<i>Leuroglossus schmidti</i>	northern smoothtongue
<i>Lillipathes</i> species B (Clark, 2006)	coral species
<i>Liparidinae</i>	snailfish species
<i>Liparisus nanus</i>	pygmy snailfish
<i>Liponema brevicornis</i>	tentacle-shedding anemone
<i>Lithodes aequispinus</i>	golden king crab
<i>Lithodes couesi</i>	scarlet king crab
<i>Lithodidae</i>	stone crab species
<i>Lophaster furcilliger</i>	crested sea star
<i>Lophaster vexator</i>	crested star
<i>Lumpenella longirostris</i>	longsnout prickleback
<i>Lycenchelys camchatica</i>	Kamchatka eelpout
<i>Lycenchelys crotalinus</i>	snakehead eelpout
<i>Lycenchelys</i> species	eelpout species
<i>Lycodapus</i> species	eelpout species
<i>Lycodes beringi</i>	Bering eelpout
<i>Lycodes concolor</i>	ebony eelpout
<i>Lycodes</i> species	eelpout species
<i>Macropinna microstoma</i>	barreleye
<i>Majidae</i>	spider crab species
<i>Malacocottus zonurus</i>	darkfin sculpin
<i>Mediaster aequalis</i>	vermillion sea star
<i>Mediaster tenellus</i>	sea star species
<i>Melamphaes lugubris</i>	highsnout bigscale
<i>Metridium farcimen</i>	gigantic anemone
<i>Microstomus pacificus</i>	Dover sole
<i>Modiolus modiolus</i>	northern horse mussel
<i>Molpadia intermedia</i>	sweet sea potato
<i>Munida quadrispina</i>	pinchbug
<i>Mycale loveni</i>	tree sponge
<i>Mycale</i> species	tree sponge species
<i>Myctophidae</i>	lanternfish species
<i>Myoxocephalus polyacanthocephalus</i>	great sculpin
<i>Mysidacea</i>	mysid species
<i>Myxoderma sacculatum</i>	sea star species
<i>Nannobrachium regale</i>	pinpoint lampfish
<i>Nearchester</i> species	sea star species
<i>Nearchester variabilis</i>	sea star species
<i>Neoesperiopsis infundibula</i>	rough China hat sponge
<i>Neoesperiopsis rigida</i>	soft finger sponge
<i>Neognathophausia gigas</i>	giant red mysid
<i>Neognathophausia</i> species	mysid shrimp species
<i>Neomenia</i> species	mollusc species
<i>Neptunea amianta</i>	white neptune
<i>Neptunea lyrata</i>	lyre whelk
<i>Neptunea pribiloffensis</i>	Pribilof whelk
<i>Neptunea</i> species	snail species
<i>Neptunea</i> species eggs	snail egg species
<i>Neptunea tabulata</i>	tabled whelk

Table 5B. -- Continued.

Species/Taxon	Common Name
<i>Neptunea ventricosa</i>	fat whelk
<i>Notacanthus chemnitzii</i>	snubnosed spiny eel
<i>Notostomobedella cyclostomum</i>	striped sea leech
<i>Notostomus japonicus</i>	spinyridge shrimp
<i>Notostomus</i> species	shrimp species
Nudibranchia	nudibranch species
<i>Octopus dofleini</i>	giant octopus
<i>Octopus</i> species	octopus species
<i>Oncorhynchus gorbuscha</i>	pink salmon
<i>Oncorhynchus keta</i>	chum salmon
<i>Oneirodes bulbosus</i>	hairy-lure dreamer
<i>Oneirodes</i> species	dreamer species
<i>Oneirodes thompsoni</i>	Alaska dreamer
<i>Ophiacantha normani</i>	brittle star species
<i>Ophiacantha</i> species	brittle star species
<i>Ophiothrix aculeata</i>	ubiquitous brittle star
<i>Ophiothrix</i> species	brittle star species
<i>Ophiura sarsi</i>	notched brittlestar
<i>Opisthoteuthis californiana</i>	flapjack devilfish
<i>Oractis diomedaeae</i>	grape anemone
<i>Oregonia gracilis</i>	graceful decorator crab
Osteichthyes eggs	fish eggs species
<i>Otukaia kiheiziebisu</i>	snail species
<i>Pagurus brandti</i>	sponge hermit
<i>Pagurus confragosus</i>	knobbyhand hermit
<i>Pagurus cornutus</i>	hermit crab species
<i>Pagurus ochotensis</i>	Alaskan hermit
<i>Pagurus</i> species	hermit crab species
<i>Pagurus trigonocheirus</i>	fuzzy hermit crab
<i>Pagurus townsendi</i>	Townsend hermit crab
<i>Pandalopsis ampla</i>	deepwater bigeye
<i>Pandalopsis dispar</i>	sidestripe shrimp
<i>Pandalopsis longirostris</i>	shrimp species
<i>Pandalus eous</i>	Alaskan pink shrimp
<i>Pandalus jordani</i>	ocean shrimp
<i>Pandalus tridens</i>	yellowleg pandalid
<i>Pannychia moseleyi</i>	deep sea papillate cucumber
<i>Paractinostola faeculenta</i>	rough purple sea anemone
<i>Paragorgia arborea</i>	Kamchatka coral
Paralepididae	barracudina species
<i>Paraliparis cephalus</i>	swellhead snailfish
<i>Paraliparis dactylosus</i>	red snailfish
<i>Paraliparis grandis</i>	grand snailfish
<i>Paraliparis pectoralis</i>	broadfin snailfish
<i>Paraliparis</i> species	snailfish species
<i>Paraliparis</i> species cf. <i>dactylosus</i>	snailfish species
<i>Paraliparis</i> species cf. <i>dipterus</i>	snailfish species
<i>Paraliparis</i> species cf. <i>pectoralis</i>	rusty snailfish
<i>Paraliparis ulochir</i>	snailfish species
<i>Paralomis multispina</i>	king crab species
<i>Paralomis</i> species A (Clark, 2006)	king crab species
<i>Paralomis verrilli</i>	king crab species
<i>Pasiphaea pacifica</i>	Pacific glass shrimp

Table 5B. -- Continued.

Species/Taxon	Common Name
<i>Pasiphaea tarda</i>	crimson pasiphaeid
Pasiphaeidae	pasiphaeid shrimp species
<i>Periphylla periphylla</i>	jellyfish species
<i>Phacellophora camtschatica</i>	egg yolk jelly
<i>Phakellia beringensis</i>	hat sponge
<i>Pleurogrammus monopterygius</i>	Atka mackerel
<i>Plicatellopsis amphispicula</i>	firm finger sponge
<i>Plicifusus kroyeri</i>	snail species
Polychaeta	polychaete worm species
<i>Polymastia</i> species	sponge species
Porifera	sponge species
<i>Poromitra curilensis</i>	crested bigscale
<i>Primnoa willeyi</i>	red tree coral
<i>Pseudarchaster parelii</i>	scarlet sea star
<i>Pseudostichopus mollis</i>	sandy sea cucumber
<i>Psolus squamatus</i>	whitescaled sea cucumber
<i>Psychrolutes phrictus</i>	blob sculpin
<i>Pteraster jordani</i>	sea star species
<i>Pteraster militaris</i>	wrinkled star
<i>Pteraster</i> species	sea star species
<i>Pteraster</i> species A (Clark, 1999)	sea star species
<i>Pteraster tesselatus</i>	sea star species
Pycnogonida	sea spider species
<i>Pyrulofusus deformis</i>	warped whelk
<i>Pyrulofusus melonis</i>	snail species
<i>Pyrulofusus</i> species	snail species
<i>Pyrulofusus</i> species eggs	snail species eggs
<i>Raja rhina</i>	longnose skate
<i>Reinhardtius hippoglossoides</i>	Greenland turbot
<i>Rhabdochalyptus</i> species	cloud sponge
<i>Rhamphostomella costata</i>	ribbed bryozoan
<i>Rhinoliparis attenuatus</i>	slim snailfish
<i>Rossia pacifica</i>	eastern Pacific bobtail
<i>Sagamichthys abei</i>	shining tubeshoulder
Scyphozoa	jellyfish species
<i>Sebastes aleutianus</i>	rougheye rockfish
<i>Sebastes alutus</i>	Pacific ocean perch
<i>Sebastes babcocki</i>	redbanded rockfish
<i>Sebastes borealis</i>	shortraker rockfish
<i>Sebastes melanostictus</i>	blackspotted rockfish
<i>Sebastes polypinnis</i>	northern rockfish
<i>Sebastes variabilis</i>	dusky rockfish
<i>Sebastolobus alascanus</i>	shortspine thornyhead
<i>Sebastolobus macrochir</i>	broadfin thornyhead
<i>Sergestes similis</i>	Pacific sergestid
<i>Serpula</i> species	worm species
shrimp species	shrimp species
<i>Sigmops gracilis</i>	slender fangjaw
<i>Solaster endeca</i>	northern sun sea star
<i>Solaster</i> species	sea star species
<i>Solaster</i> species A (Clark, 1997)	sea star species
<i>Solaster</i> species F (Clark)	Fisher sun star
<i>Somniosus pacificus</i>	Pacific sleeper shark

Table 5B. -- Continued.

Species/Taxon	Common Name
<i>Squalus acanthias</i>	spiny dogfish
<i>Stegophiura ponderosa</i>	brittle star species
<i>Stenobrachius leucopsarus</i>	northern lampfish
<i>Stenobrachius nannochir</i>	garnet lampfish
<i>Stenobrachius</i> species	lampfish species
<i>Stephanasterias albula</i>	sea star species
<i>Stomphia coccinea</i>	swimming anemone
<i>Stomphia didemon</i>	cowardly anemone
<i>Stomphia</i> species	sea anemone species
<i>Strongylocentrotus droebachiensis</i>	green sea urchin
<i>Strongylocentrotus pallidus</i>	white sea urchin
<i>Strongylocentrotus</i> species	sea urchin species
<i>Swiftia beringi</i>	coral species
<i>Scyzonis</i> species A (Clark, 2006)	orange actinistolid
<i>Synallactes</i> species	sea cucumber species
<i>Synallactes</i> species A (Clark, 2006)	sea cucumber species
<i>Tactostoma macropus</i>	longfin dragonfish
<i>Taonius pavo</i>	squid species
Teuthoidea	squid species
<i>Thaleichthys pacificus</i>	eulachon
Thaliacea	salp species
<i>Theragra chalcogramma</i>	walleye pollock
<i>Tochuina tetraquetra</i>	giant orange tochui
<i>Triglops scepticus</i>	spectacled sculpin
<i>Tritonia diomedea</i>	rosy tritonia
<i>Tritonia</i> species	nudibranch species
<i>Virgularia</i> species	smoothstem seawhip
Virgularidae	sea whip species
Yellow papillate sponge	sponge species
<i>Yoldia</i> species	clam species
<i>Zaprora silenus</i>	prowfish
<i>Zesticelus profundorum</i>	flabby sculpin
<i>Zoraster evermanni</i>	sea star species

Table 6. -- All species encountered on the 2008 EBSS survey with depth range and frequency of occurrence. Species are listed in descending order by total catch weight.

Species name	Total Weight (kg)	Total Number	Min-Max Depth Encountered (m)	Mean Depth Encountered (m)	Frequency of Ocurrence (hauls)
<i>Albatrossia pectoralis</i>	109,440.19	30,946	222-1178	691	139
<i>Sebastes alutus</i>	20,889.31	24,130	201-525	322	73
<i>Atheresthes stomias</i>	16,685.69	16,760	201-804	386	121
<i>Coryphaenoides cinereus</i>	11,868.87	71,877	415-1178	774	104
<i>Theragra chalcogramma</i>	6,411.55	6,087	201-676	332	77
<i>Sebastolobus alascanus</i>	6,362.69	8,646	201-1122	609	123
<i>Atheresthes evermanni</i>	6,059.34	5,222	201-1093	508	167
<i>Hippoglossoides elassodon</i>	4,467.69	10,949	201-605	337	95
<i>Reinhardtius hippoglossoides</i>	4,321.24	1,300	207-1148	578	133
<i>Bathyraja aleutica</i>	4,079.19	1,449	201-1165	559	158
<i>Anoplopoma fimbria</i>	3,073.02	1,017	293-1148	660	114
<i>Bothrocara zestum</i>	2,865.46	4,625	218-1148	646	72
<i>Glyptocephalus zachirus</i>	2,751.32	4,394	201-847	350	95
<i>Hippoglossus stenolepis</i>	1,935.75	256	201-676	362	69
<i>Sebastes borealis</i>	1,700.54	431	300-776	451	28
<i>Rhabdochalyptus</i> species	1,218.07		204-1065	621	28
<i>Pannychia moseleyi</i>	1,144.65	9,912	201-1165	627	58
<i>Bathyraja parmisera</i>	1,075.42	182	201-444	269	35
<i>Bathyraja maculata</i>	1,071.35	373	204-1090	441	62
<i>Chionoecetes angulatus</i>	1,052.41	7,543	206-1178	714	96
<i>Coryphaenoides acrolepis</i>	971.92	3,511	679-1178	981	38
<i>Bathyraja lindbergi</i>	822.23	446	207-1090	675	70
<i>Gadus macrocephalus</i>	798.37	264	201-355	250	43
<i>Liponema brevicornis</i>	767.62	6,436	201-1165	453	123
<i>Hemitripterus bolini</i>	698.46	177	202-632	370	68
<i>Paractinostola faeculenta</i>	674.22	2,100	235-1178	621	46
Porifera	661.14		201-1090	451	63
<i>Bathyraja interrupta</i>	623.02	545	201-1081	397	95
<i>Lycodes concolor</i>	579.67	620	329-1148	604	51
<i>Ceramaster</i> species	556.99	6,066	201-1093	533	132
<i>Bathyraja trachura</i>	509.21	281	274-1178	870	53
<i>Bathyraja minispinosa</i>	463.74	357	207-1178	620	111
<i>Somniosus pacificus</i>	460.87	30	207-1043	492	28
<i>Brisaster latifrons</i>	456.78	22,952	255-1165	512	15
<i>Chionoecetes tanneri</i>	443.61	1,478	212-1148	679	97
<i>Berryteuthis magister</i>	414.46	1,091	201-1165	510	128
<i>Florometra asperrima</i>	403.05	28,468	586-1178	948	6
<i>Crossaster borealis</i>	320.26	2,861	201-1178	558	155
<i>Lithodes aequispinus</i>	308.57	398	207-1090	441	60
<i>Aphrocallistes vastus</i>	291.48		202-1148	580	70
<i>Psychrolutes phrictus</i>	281.90	96	685-1178	972	31
<i>Bothrocara brunneum</i>	250.18	216	319-1093	753	59
<i>Malacocottus zonurus</i>	242.11	1,746	201-819	366	89
<i>Bathyraja taranetzi</i>	227.52	264	204-819	381	41
<i>Ophiura sarsi</i>	194.69	233,448	494-1007	620	13
<i>Dipsacaster borealis</i>	165.16	919	201-1097	431	64
<i>Neptunea pribiloffensis</i>	159.13	1,667	201-1148	541	89

Table 6. -- Continued.

Species name	Total Weight (kg)	Total Number	Min-Max Depth Caught (m)	Mean Bottom Depth (m)	Frequency of Occurrence (hauls)
<i>Pandalus eous</i>	146.94	22,192	201-616	278	58
<i>Balanus evermanni</i>	141.50	1	206-355	296	3
<i>Nearchester variabilis</i>	129.63	3,454	201-1178	688	93
<i>Heterochone tenerum</i>	126.73		321-999	745	6
<i>Lithodes couesi</i>	120.09	199	513-1148	823	29
<i>Embassichthys bathybius</i>	116.99	99	561-993	763	28
<i>Sebastes melanostictus</i>	115.84	137	201-525	332	31
<i>Chionoecetes bairdi</i>	110.55	999	201-466	275	42
<i>Dasycottus setiger</i>	96.74	765	201-846	348	59
<i>Synallactes</i> species A (Clark, 2006)	87.04	2,333	212-1178	642	15
<i>Octopus dofleini</i>	84.01	57	202-565	332	26
<i>Tritonia</i> species	83.04	485	206-1072	505	13
<i>Sebastes aleutianus</i>	80.10	76	201-819	322	22
<i>Microstomus pacificus</i>	77.62	82	202-582	381	29
<i>Paralomis multispina</i>	75.97	143	381-1178	933	25

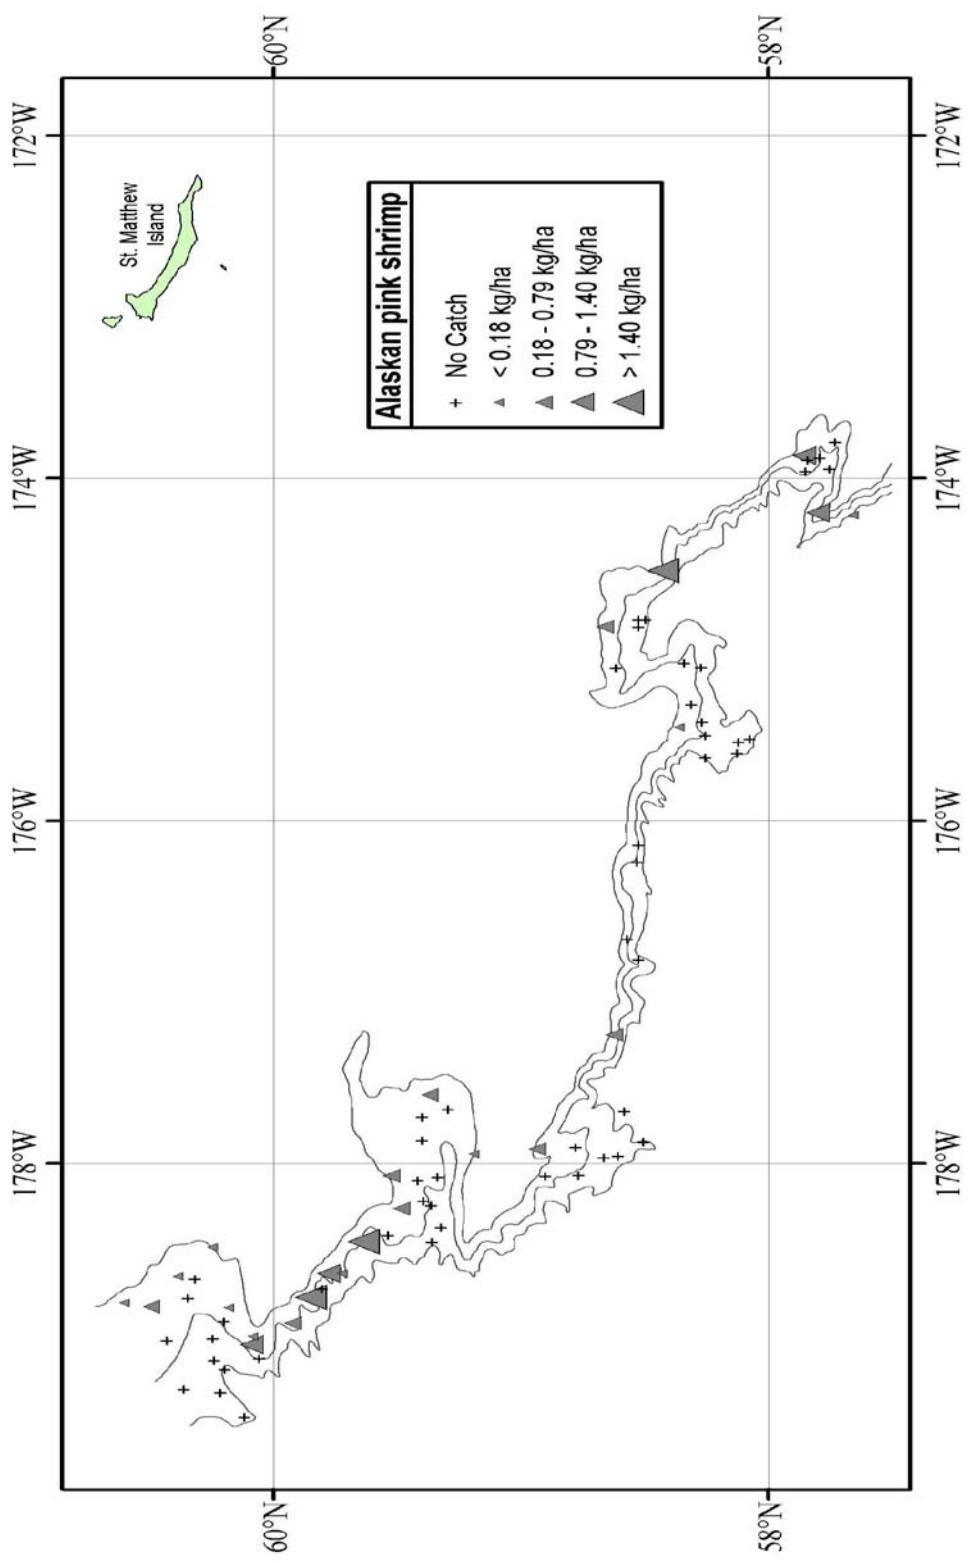

Figure 88. - Distribution and relative abundance of Alaskan pink shrimp from the 2008 EBSS survey. Relative abundance is categorized by no catch, sample CPUE less than the mean CPUE, between the mean CPUE and one standard deviation above the mean, between one and two standard deviations above the mean CPUE, and greater than two standard deviations above the mean CPUE.

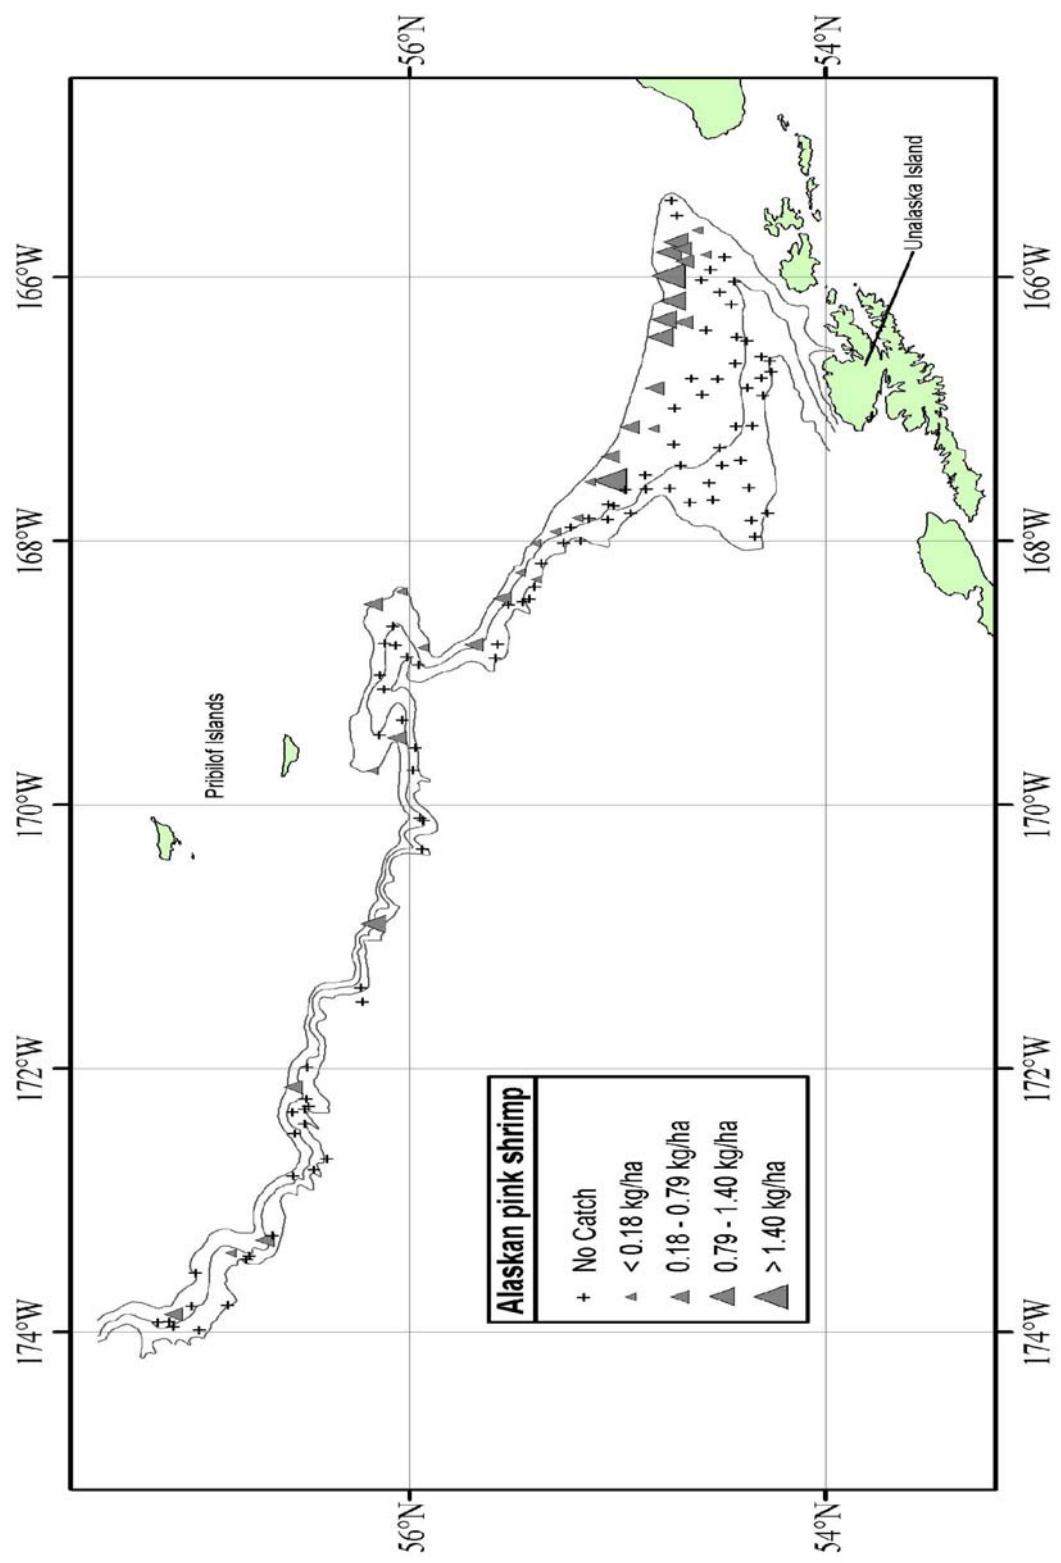

Figure 88. - Continued.

ACKNOWLEDGMENTS

We would like to sincerely thank all the scientific survey participants for all their hard work during the 2008 EBSS survey. Thanks also go to the skippers and crew of the F/V *Vesteraalen*. Their cooperation and knowledge was greatly appreciated. A special thanks to Stan Kotwicki for stepping in as Chief Scientist during Leg 3.

APPENDICES

Haul Log

The haul log details the location, depth, time, temperature and net mensuration parameters of each haul conducted during the 2008 EBSS survey as well as each haul's catch by weight (kg) with a breakdown of the species composition and the individual species weight or a grouped weight for less abundant species. Appendix Table 1 describes the trawl warp/bottom depth ratio used for each trawl. Appendix Table 2 lists the number of trawl hauls completed by trawl performance code during the survey. Zero and positive performance codes are considered successful tows and were used for the standard abundance estimates and negative performance tows were not included in the estimates of abundance. Appendix Table 3 is the detailed haul log for every haul completed with data during the survey. For quick reference, the unsuccessful tows not used for abundance estimates are shaded in gray in the haul log.

Appendix Table 1 - - Scope ratio table used during the 2008
EBSS survey.

Bottom Depth		Warp Length	
Minimum (m)	Maximum (m)	Meters	Fathoms
146	176	550	301
177	206	600	328

Appendix Table 2 - - Performance codes assigned to trawl hauls conducted on the 2008 EBSS survey. Performance codes zero or greater are considered successful hauls, and codes less than zero are unsuccessful hauls.

Performance Code	Description	Number of Hauls
6.24	Satisfactory performance, scope changed during tow	2
6.12	Satisfactory performance, depth range over tow exceeds stratum defined limits	10
6	Satisfactory performance, unspecified problems	6
5.8	Satisfactory performance, light footrope contact	1
5.1	Satisfactory performance, net came off bottom	9
5	Satisfactory performance, unspecified gear performance problem	8
4.2	Satisfactory performance, caught large quantity of mud	1
4.1	Satisfactory performance, caught large rock	3
4	Satisfactory performance, caught unspecified object	2
1.11	Satisfactory performance, completed tow	1
0	Good performance	157
-1.2	unsatisfactory performance, major hang, stopped forward progress of vessel	1
-2.4	unsatisfactory performance, belly damage	3
-4.1	Unsatisfactory performance, caught large rock	3
