FORM 600 (September 1997 Edition) [For purposes other than Assignment of Authorization] INFORMATION REQUIREMENTS

Applications received on or after September 19, 2000, can continue to be filed on Form 600 to request a new station license, modify an existing licensed station(s), renew an existing licensed station or reinstate an expired call sign that is no more than 30 days past the expiration date; provided that any additional information now collected on FCC Form 601 is included in the application filing.

In addition, when Form 600 is filed with the Commission on or after September 19, 2000, existing locations, antennas and control points must be identified by using the location, antenna, and control point numbers assigned by the Universal Licensing System (ULS). These numbers may not be identical to the location, antenna, and control point numbers on your current authorization if that authorization was not issued by the Universal Licensing System. If you are unsure of the location, antenna, or control point number that corresponds to a particular location, antenna, or control point, you can query the ULS for the most up-to-date information regarding your authorization. To query the ULS license database for your call sign, point your web browser to <http://www.fcc.gov/wtb/uls> and click on License Search. Alternatively, you may call 1-888-CALLFCC (225-5322) for assistance.

The Location Letters [A-F for fixed sites and G-Z for area sites] on Form 600 Schedule E, Schedule F, Schedule G and Schedule H must be replaced with the ULS Location and Antenna Numbers (as appropriate). In the margin of the schedules you must also indicate the action requested (i.e., **Add**, **Modify** or **Delete**). The applicant must only provide the information pertinent to the add, modify or delete request. Refer to the Form 601 Instructions for further information about action requested and location and antenna numbers.

Form 600, item 26 must be completed using the ULS Radio Service Codes which are listed on the Form 601 Instructions for Item 1.

If any of the answers to the Alien Ownership questions [Items 29, 30, 31 or 32 of the Form 600] is **Yes**, you must provide an attachment explaining the circumstances.

All coordinates on Schedule E of Form 600 must be referenced to the North American Datum of 1983 (NAD83), except for sites in the Northern Mariana Islands, Midway Island, and Wake Island, where applicants continue to reference the applicable local datum. NAD83 information can be determined in many ways, including a GPS receiver, a 7.5 minute topographical quadrangle map of the area, or you may consult the city or county surveyor in your area. Additional information on determining and converting geographic coordinates is available on the ULS Homepage at <http://www.fcc.gov/wtb/uls/nadcon.html>. Topographical maps may be purchased from the U.S. Geological Survey, Washington, DC 20242 or from its office in Denver, Colorado 80225.

Item E10 of the Form 600 Schedule E must be completed with the appropriate ULS area of operation code. Refer to the Form 601 Instructions for a complete listing of the codes and also for the chart that indicates what additional information is required for each code selected. You must provide the ULS area of operation code and additional required information either on the Form 600 Schedule E or on the Appendix A attachment.

Item F7 of the Form 600 Schedule F must be completed for fixed locations if the action requested is to add or modify. The applicant must provide the ULS code for the type of structure on which the antenna is or will be mounted from the following valid ULS structure types:

FCC FORM 313 (September 1999 Edition) INFORMATION REQUIREMENTS

Applications received on or after September 19, 2000, can continue to be filed on Form 313, provided that any additional information now collected on FCC Form 601 is included in the application filing.

In addition, when Form 313 is filed with the Commission on or after September 19, 2000, existing locations, antennas and control points must be identified by using the location, antenna, and control point numbers assigned by the Universal Licensing System (ULS). These numbers may not be identical to the location, antenna, and control point numbers on your current authorization if that authorization was not issued by the Universal Licensing System. If you are unsure of the location, antenna, or control point number that corresponds to a particular location, antenna, or control point, you can query the ULS for the most up-to-date information regarding your authorization. To query the ULS license database for your call sign, point your web browser to <http://www.fcc.gov/wtb/uls> and click on the button labeled "License Query". Alternatively, you may call 1-888-CALLFCC (225-5322) for assistance.

In the margin of the FCC Form 313 you must indicate the action requested (i.e., **Add**, **Modify** or **Delete**) for Locations and Antennas. The applicant must only provide the information pertinent to the add, modify or delete request. Refer to the Form 601 Instructions for further information about action requested and location and antenna numbers.

All coordinates on FCC Form 313 must be referenced to the North American Datum of 1983 (NAD83), except for sites in the Northern Mariana Islands, Midway Island, and Wake Island, where applicants continue to reference the applicable local datum. NAD83 information can be determined in many ways, including a GPS receiver, a 7.5 minute topographical quadrangle map of the area, or you may consult the city or county surveyor in your area. Additional information on determining and converting geographic coordinates is available on the ULS Homepage at <http://www.fcc.gov/wtb/uls/nadcon.html>. Topographical maps may be purchased from the U.S. Geological Survey, Washington, DC 20242 or from its office in Denver, Colorado 80225.

Item 13 of the FCC Form 313 must be completed for each fixed location if the action requested is to add or modify. If antenna structure registration is required, enter the seven-digit FCC Antenna Structure Registration Number (shown on the structure's registration, FCC Form 854R). Otherwise, enter N/A to indicate that FAA notification is not required.
