

Wetlands and Waters of the U.S. Consultants

August 18, 2009

- NOTE:** 1. This list is not necessarily complete. Other firms and individuals are capable of performing wetlands and waters delineations if qualified.
2. This list has been prepared in alphabetical order and should not be interpreted as an endorsement of any firm.
3. Other firms and/or individuals interested in being added to the list should contact the Corps.

The consultant you select should be familiar with and utilize the current 1987 Corps Wetlands Delineation Manual and appropriate regional supplement to perform a wetlands delineation. The consultant's findings should then be provided to the Corps in the form of a report. Corps staff will review the validity of the report and make an agency determination on the presence and extent of wetlands and other waters of the United States on the property.

The consultant you select should be familiar with and utilize the current 1987 Corps Wetlands Delineation Manual and appropriate regional supplement to perform a wetlands delineation. The consultant's findings should then be provided to the Corps in the form of a report. Corps staff will review the validity of the report and make an agency determination on the presence and extent of wetlands and other waters of the United States on the property.
