Individual settings on FWS computers may result in sub-optimum performance using Internet Explorer, so Mozilla Firefox may be needed. Accept unknown certificates and allow flash viewers to operate. Use the "x" in the corner of each pop-up to close windows; the browser back button will cause ejection from the database.

- <u>First-time users</u> will be prompted to download Microsoft Silverlight if not already installed. Answer "yes" to all security download questions.
- 3. <u>First-time users</u> need to register. Hit "Click Here to Register" and enter your information on the resulting screen. You will create your own username.
